# MINING, BUSINESS AND STOCKS.

## THE WEEK ON THE EXCHANGE.

Incident to Summer.

UNCLE SAM REACTS TO \$1.67

Tesora Weaker-Ajax Not So Strong-Tetro Active at Lower Prices-Star Con. Sells.

The sales on the mining exchange for the past week amount to 406,020 shares, which brought \$276,635.75. The sales today were 23,200 shares, which sold for \$18,297,38. The market has been much weaker this week. Ajax declined to \$1.571/2 as compared with \$2.00 on Monday. The high price earlier in the week was partially due to reports from the mine. An ore body of splendid proportions was expected but it has not materialized yet and the stock has declined to around normal limits. Uncle Sam has been one of the features of the week's dealings. It made its appearance on Tuesday last, when it sold at close to \$2.00. From that figure it has since dropped to \$1.50, but was stronger today around \$1.67. Tesora has also shrunk for some unexplained rea-son. The mill seems to be doing good work, but prices have fallen from 1.191/4 to 1.07. West Morning Glory has been very active around 5, while Ben Butler fell from 14 to 10% on news of the law-suit by the owners of the Liberal claim. Sunbeam has weakened to 85 after selling at 99 on Monday. Daly West which sold at \$44.25 on Monday has fallen of to \$42.92%, at which figure 100 shares changed hands today. May Day sold at \$1.55 today as compared with \$1.70 on Monday. Northern Light, which was offered at 4½ earlier in the week has since sold at better than 5. South Swansea has also gained several points, selling as high as 61. Mammoth is unchanged, but Lower Mammoth is a little weaker. Star Con. has done a lit-tle business between 45 and 47 while Dexter continues quite weak, as does Grand Central and Sacramento. kee Con, was weaker today around \$4.75. Closing quotations were posted as fol-Bid. Asked.

## EXHIBIT TO THE MINING CONGRESS

Shows General Softening in Prices | Utah's Carload of Samples Will Be Ready on the 20th Inst.

CONTRIBUTIONS DESIRED.

Returns to Cariboo-Will Visit Black Pine-Shawmut Mill to Start Next Week.

Messrs. Bamberger, Doscher and Pendergast the Committee who have charge of the Boise exhibit of the Salt Lake Mining exchange, report contributions coming in from the various camps and they expect to have a full carload of 30 tons of ore samples for the International Mining congress which convenes at Boise on the 23rd, 24th and 25th of the present month. The gathering threatens to be a thoroughly representative one. Delegates are scheduled to meet in Idaho's capital from all over the United States and other places and it is very necessary that jusice should be done to Utah's mineral resources, as far as this can be accorplished in an exhibit of this kind. With this object in view the committee desire to stir up the mine owners to forward more ore for the exhibit so that it will not be necessary to use much of that which was exhibited at the hall of relics at the corner of Main and South Temple streets some months ago. The ore, as it omes is being stored at the railway freight office and on or about the 20th inst., it will be loaded into a car and forwarded to Boise. A fine showing should be made from the twelve or more prominent mining districts Utah which will encourage the feeling now growing in the East that Utah is one of the greatest mineral states in the country. The delegates from the mining camps are talking of going to the congress in a special car. Every-thing points to Utah doing her part to wards making it a huge success.

#### Anent Ben Butler Lawsuit.

Regarding the Ben Butler sult the Bingham Bulletin says it is informed that the action was decided upon as a result of the plaintiffs having what they consider good evidence of trespass. While working in the Liberal many feet from Ben Butler lines they say they can distinctly hear defendant's em-

on the other hand, the situation in the Ben Butler, as the writer saw it the week Wm. McQueen retired from the superintendency, suggests that there has been no trespass but that the max agement was put to expense to avoid it. After the Ben Butler main tunnel had been run some distance the discovery been run some distance the discovery was made that it was nearing Liberal ground, Superintendent McQueen wen back a number of feet and began run ning in a direction east of south, form ing an elbow in the tunnel which is nov nearly in shape of a horseshoe. estimated that the point where the vein was encountered was 40 feet east from Liberal side line. Afterward a drift was run 15 feet west and from there the west raise was begun. If there has been any other drifting toward the Lib it is from some station main tunnel level and has been done

#### very recently.

Returns to Cariboo District. Manager S. F. Hunt of the Pittsburg Mining company, operating in the Cari-boo district, Idaho, expected to leave this evening for camp, after a stay of a couple of weeks in the city. Since Mr. Hunt's arrival a contract has been let for the erection of a \$15,000 amalgama tion plant with which to treat about 125,000 tons of ore said to be in sight in the present workings. The lowest tunnel is about 550 feet below the outcrop of the vein, which varies between 2 and 12 feet in width. The ore is free milling and looks like a good proposition. The present owners, who consist principally of Dr. Castleman Martin Mahnkin and Mr. Wilde, have patiently developed the property for about three years and their friends wish them sucventure. The mill is expected to be ready for business on Oct.

#### Will Visit Black Pine.

W. D. Livingston is up from Manti on business connected with the Biack Pine Mining company, which owns a large group of claims in Casala county, Idaho, just over the Utah border. The company spent about \$15,000 and the claims last year and it is now preparing to resume operations with moderate force. Messrs. Livingston and Alder expect to make a visit to the camp next week with the object of laying out the summer's work.

#### Decision is a Good One.

The decision of the governing board of the mining exchange as given in last night's "News" is unanimously voted a ove. Not only is a heavy penalty of from \$5 to a \$100, made to apply to those who "wash" sales, but the hours of business is restricted to 6 p. m. Gen. eral satisfaction is felt that the "curb ers" are allowed to ply their vocation which means more business for the ex change as they often reach people who are not closely in touch with the exchange.

Shawmut Mill to Start Next Week. It was planned to start the Shaw at was planned to start the shaw mut mill, after its long shutdown, next Monday, says the Bingham Bulle, ton, but probably everything can-not be gotten ready before Wednesday

or Thursday as the electric motor is not yet to place and various adjustments will have to be made. This week Superintendent Heaston of the Telluride Power company has run a line between transformer house and mill, setting the last pole and stringing wire today. The mill's transformers vill also arrive today, so that ample irtually ready for delivery. Thirty-two

oles were used in making the connec The mill will for the present run on the from upper level of U.& I mine. A 60-ton bin and chuts connecting it with jump will be completed at the mine to day; while the wagon road, washed ou by the spring freshet, has been rebuilt and made one of the best ore roads in the district. A large area of good mil-ing ore is blocked out in U & 1 upper sume work under most favorable aus-pices. On the U & I dump are two caroads of first class that will be hauled to depot some time next week.

THE WOODS AND THE PROPERTY OF wide their vein is. Since striking the body they have cross-cut nineteer feet from the foot wall and are not yet across the voin. These people are not doing much talking, but we are of the opinion that they have uncovered one of the biggest and strongest bodies of high grade ore in the camp.

The Dalton is pushing development work and has increased the working force to fourteen men. They are taking out some good ore.

The Cascade property, which was ac quired under a bond and lesse, by Messrs. Krotki, Culbertson and Powers, is showing up a three foot vein of solid galena, from which has been taken during the past week over sixty tons of concentrating ore. The mill will be

unning in the near future. The Copper Belt is in fine ore on the 200 and 400 foot levels, and fine stoping ground between.—Piute Pioneer.

#### New Incorporation.

Articles of incorporation of the Lucky Star Mining company were filed with the secretary of state yesterday after-The capital stock is \$60,000, in 600,000 shares of the par value of 1 cents each. John H. Anderson is president of the company; Lester A. Her-rick, vice president; Leo P. A. Nielsen, secretary: G. Lundstrom, treasurer, who, with Willard W. Maughan, form the directorate. The company owns the Sunshine and four other mining claims in Blacksmith Fork canyon, Cache county.

#### MINING NOTES.

The Honorine of Stockton reached the market today with four cars of ore. The Utah Queen of Dry canyon had a car of ore on the market today.

Last night's assays from the West Morning Glory show 181 ounces silver and a little over 5 per cent copper per

from Beaver county more than ever impressed with its possibilities as a mineral producer. Prof. O. A. Palmer left today for Reno, Nev., from which place he ex-

Dr. P. A. H. Franklin has returned

pects to go south to Sodaville to examine some copper properties. Pat Condon, the well known mining man, who went to California recently for his health, was brought home yesterday. Mr. Condon is said to be a

very sick man. Bingham Bulletin: The second 60horse-power boiler for Yampa power-house was delivered yesterday. There will ultimately be three of them in a

The Queen mill belonging to the Butterfield Mining company has resumed shipments now that the crushing capac-ity of the mill has been increased. A car of concentrates was on the market today.

Richfield Reaper: Lorenzo Nielson, who was down from Marysvale this week, reports a big strike in the Elephant mine. A cut has been made ten feet in an ore body without reaching the hanging wall. The ore is very rich, spotted with brittle sliver,

Blingham Bulletin: Since the 1st a party of engineers have been making a preliminary survey for Carr Fork branch of the Copper Belt railroad. We understand the line that has been run crosses main canyon near Rosers' and will round Carr Fork point at such an elevation as to secure a good grade as Muddy Gulch and the Highland Boy.

## DECLINED, THEN CAINED.

Such Was the Characteristic of an Irregular and Uneven Market.

Movement of Shorts to Cover Stopped By Bank Statement-Closing Was Very Active.

New York, July 13 .- At the opening some stocks showed violent declines and a large number of others moderate gains. No attention was paid to the gains in London of St. Paul, Union Pacific and Atchison, and those stocks fell 1 to 2 points. The break in United States steel stocks was foreshadowed in the quotations from London. The preferred fell 2% here and the common an extra 1%, the latter on sales of 8,000 shares.

After the opening dealings there was an abrupt rally in St. Paul, Union Pacific and Atchison, which lifted them from 1 to 1% over yesterday's close. Fractional recoveries in United States Steel issues brought out renewed offerings, sending the preferred under \$1. The sustained advance of the leading grain carrying roads on the break in the corn market drove the shorts to cover and they bought liberally all around toward 11 o'clock, causing a pretty general cancellation of losses and placing the market above last night. The movement to cover shorts expended itself before the bank statement appeared and there was a recession of a point in active stocks. United States Steel preferred fell back to near the lowest. The trading was thrown into confusion by successive correcions of the bank statement on the tape, but there were some sharp rallie les and prices ran off again. losing was active and irregular,

# THE CLEARINGS.

Manager Green Does Not See That Bradstreets Erred.

FINE SHOWING THIS WEEK

Although Less Than Last Week the Increase Over Last Year is Very Gratitying.

Last week quite a stir was made in Salt Lake by the publication in the newspapers of a dispatch received through the Associated Press, giving igures quoted from Bradstreets which were alleged to have underrated the city's bank clearings for the week before last. "The newspapers devoted considerable attention and space to the matter, and it was expected that Bradstreets would make a correction," said Manager Green of the Salt Lake agency this morning, "but I am unable to discover wherein Bradstreets had made any error and am at a loss to know the reason for such a hue and cry. In the issue of Bradstreets of Saturday July 6, the clearings are given at \$4. 336,390, but with an accompanying asterisk referring to a foot note which states that those returns were for the week ending June 27. A failure to notice the foot note may have led to the error. Inasmuch as the issue of Bradstreets containing the figures for the week in dispute has not yet arrived, the firm's quotations for that

week are not before me." For the week ending Thursday night the report gives the clearings at \$6,-523,829, which is a gain of 129.7 per cent over the corresponding week in last year. This is double the per-centage of increase in any other city This is double the n the United States. The cities whos learings were about equal with Salt Lake's were Omaha, Galveston, Mil-waukee and Buffalo, while the neighring city of Denver fell \$2,000,000 behind this town.

Today's clearings were \$848,361.25, as against \$340,591.57 for the corresponding day of last year. For the week the clearings were \$8,859,356.42, as against \$3,582,483.61 for the corresponding week in last year.

#### BUSINESS NOTES.

The week has been one of duliness in all local stocks except Utah Sugar, which last night reached \$17.00 bid with but few sellers, and which, acidiy on the way to the figure at which it stood before the capital was increased. The new developments in Soxelder county, and the likelihood 310,950 tons. that the property owners of the east side of Boxelder county will make some finish the east branch of the canal, coupled with the unexcelled condition of the crowing beet crop, have operated to set investors on a hunt for the Broker Cutler reports it ex-scarce, with much more wanted at \$17.00 than can be furnished. Following are the latest quotations:

#### FLOUR AND GRAIN.

There is no change in the price of our and the present market is normal Although harvesting has begun there is no new wheat moving, it being in the reaping stage now. Oats bring from 5 to 10 cents more than last week and other grains are the same as before.

#### WOOL.

The wool clip is about all cleaned up There remains a very little in the southern part of the State, but that will all be handled and shipped in a few days and the season will be over.

## BUSINESS **CONTINUES GOOD**

New York, July 12 .- R. G. Dun & Co.'s Weekly Review of Trade tomorrow will say: "General business continues its even course, with all the leading industries well employed and with confidence expressed on every hand. Bountiful crops of wheat seem assured, and the damage to corn, while considerable in some directions, does not promise to be sufficiently general or serious to at all impede the progress of the country. Labor troubles are in process of settlement and speculators have been responsible for most of the unrest which has been reflected in the markets.

"Steel mills are actively employed and there is a distinct improvement in the demand for finished products while quotations are without alteration. In bars for use by makers of agricultural implements there is a brisk movement, plates are taken readily and there is structural material. Rails are ordered freely, with notable pressure for trolley and other light-weights. Billets are more quiet and few new transactions are recorded in pig iron. The total number of pig iron furnaces in blast on July 1st as recorded by the Iron Age, was but three less than a month pre-

"Improvement is general in the footwear industry, although no higher strong inducements to the company to prices can be obtained. Leather is in

tensive preparations for the light-weight season. Manufacturers are well employed and exhibit increasing inter est in raw material. Wool has not altered in price, but the tone is firmer and sales increase. Growers are sale to be selling rather than consigning, while many ranchmen refuse to do any

business at present prices. "Grain crops this season are occasioning much uneasiness among specucated situation. According to the latest official and unofficial prognostications there is reason to anticipate the heaviest wheat yield ever harvested, and making the customary allowances for domestic consumption, even with the small supply on hand when year opened, there appears available for export about 50 per cent more than went abroad in the year of greatest shipment. Yet prices are far above the low record and vigorous rallies follow each decline. Extensive needs abroad continue, the movement from Atlantic ports for the week amounting to 3,208,-634 bushels against 2,189,443 bushels a

year ago. Failures for the week numbered 208 in the United States against 196 last year, and 27 in Canada against 24 last

#### EAGLES' EXCURSION.

Mercur, Sunday, July 14. Via the Oregon Short Line. Round trip rate only \$2.00. The De La Mar Mercur mines will be open to the excurtionists for inspection. Special train leaves Salt Lake at 19:00 a. m. and special leaves Mercur returning at about 11:00 p. m.

## AMERICAN TRADE IN PACIFIC OCEAN.

It Did Not Hold Its Own During Last Year.

GREAT INCREASE IN EUROPE

it Was One Hundred Millions for Eleven Months Ending May 31, 1901.

New York, July 13 .-- A special to the Tribune from Washington says:

The Pacific ocean is the only part of

the statistical map of the world which

presents an unfavorable appearance in the study of American commerce in the fiscal year just closed. For all other parts of the world the figures of American exports show a large increase. Exports to South America have increased \$6,000,000; to Africa, \$6,000,000; to North America, \$10,000,000, and in Europe, \$100,000,000, during the eleven months ending with May, 1901, as compared with the corresponding months of the preceding fiscal year; while to Asia and Oceanica there is an apparent reduction of over \$20,000,000. But this appearance of a reduction in American trade with Asia and Oceanica is more apparent than real. If the exact figures of exports to the Pacific coast and islands could be given they would show little if any decrease, despite the fact that the conditions in thing have cut off one-half of the exports to that country, and that the over-purchases of cotton in Japan last year have momentarily reduced sales to the Yankees of the orient. Total American exports to Asia and Oceanica in the eleven months ending with May, 1900, were, in round terms, \$101,-000,000, and those of the corresponding months of the present fiscal year only \$76,000,000—an apparent shortage of \$25, 000,000. This showing is chiefly due to the inability of the treasury bureau or statistics to present any figures of exports to the Hawaiian islands during fiscal year, owing to the fact that the Hawaiian islands are now considered a customs district of the United States, and exporters to those islands plates are taken readily and there is take advantage of that fact and de-no sign of diminished purchasing in cline to furnish the information formerly supplied under the law which required all exports and imports to stated when passing out of or into the country, but which does not require a statement of movement of merchandise between ports and customs districts of

the United States. A careful study of the exports to the Hawaiian islands, however, justifies the assertion that the total for the year will be fully \$20,000,000, and this, if added to the total of experts to the other Pacific islands and countries, would bring the total within \$4,000,000 of that of last year.

Bank Clearings.

New York, July 12.-The following compiled by Bradstreet, shows the bank clearings at all principal cities for the week ended July 11th, with the percentage of increase and decrease as compared with the correspanding week last year:
