## HOW TO BEAUTIFY YOUR CITY HOME

Timely Suggestions as to Spring Planting Made by Park Commission.

## PRACTICAL INSTRUCTIONS.

Formula for Spraying Mixture—Proprietary Method of Planting Trees—Some Annual Flowering Seeds.

The April bulletin of the recently organized park commission has been issued, the object being to offer suggestions and recommendations to citizens in planting trees and shrubs and otherwise improving their property. The bulletin reads as follows:

The month of April may rightly be called the most important for garden work, as the planting of trees, shrubs and plants, and the seeds of nearly all kinds of annuals, are the best time to add beauty to your garden during the coming summer, is to be done this month.

Finish the pruning of shrubs and roses and cultivate all your borders and beds for flowers. Clean the lawns and make good use of the rake and roller to bring it to a level and compact surface. Take care of the square rod, this will prevent your lawn and such places with soil, and such places. During this month, if we have good weather, we recommend for poor and worn out lawns the use of a chemical fertilizer (prepared fertilizer) to be applied just before or during a rainstorm, at the rate of not less than 10 pounds to the square rod.

This treatment will keep your lawn an unexpected beauty by giving color and strength to the grass.

Trees spraying should be done now, before the trees are leafing. The spraying solution should consist of the lime and sulphur mixture. However, unless this solution is properly made it is useless to go to the expense or it. The "cycle cop" will begin a warfare once on violators of the ordinance, and from now on, it may be expected that arrests will occur with considerable frequency. This is no April fool joke.

He was glad that so much was being done for the old folks and believed they deserved it, for he knew that nearly all of them had earned it by their lives of usefulness to others, and their honest and straightforward lives. This was written on the back of a card given to him by a member of the church. In his opinion nothing was too good for these people who had helped in worthy ways for the upbuilding of the state. He ended with a prayer that they might be blessed and their lives preserved to enjoy many pleasant occasions such as this.

Thanks were tendered all those who had contributed to the entertainment of the aged guests, and after the performance, the audience dispersed, much pleased with their afternoon's entertainment.

ONE TOUCH OF NATURE MAKES THE WHOLE WORLD KIN.

When a rooster finds a big fat worm he calls all the hens in the farm yard to come and share it. A similar trait of human nature is to be observed when a man sees a worm, something exceptionally good—he wants all his friends and neighbors to share the benefit of his discovery. This is the touch of nature that makes the whole world kin. This applies to the members of the church. Dr. Chamberlain's Cough Remedy writes letters to the manufacturers for publication, that others similarly ailing may also use. One of these letters is a warm hearted wish of the writer to be of use to someone else. This remedy is for sale by all drugstores.
