

In addition to the above goods, we sell the Peerless Reapers and Mowers, California Concord Harness, Buffalo Barbed Wire, also a great variety of Farm and Garden Hand Implements, consisting of Rakes, Forks, Hoes, Lawn-Mowers, etc., etc.

The Mitchell Farm and Spring Wagons and Road Carts are manufactured expressly for the Utah, idaho and Moutana trade, of the very bear material that money can buy and under the superintendency of Henry Mit-chell, a practical wagon manufacturer of over fifty years experience. We personally guarantee that they are first class in and respects, and second to none in the market.

The Walter A. Wood's Harvesting Machines are absolutely unequalled for strength, Durability, Easy Running and Simplicity. Read the following record of machines made and sold by the Wood Company 1, e · 1880 -27,9 3; 1881, 40,413; 1882, 44,226, 1883, 45,632; 1884, 48,315; nothing but the superiority of the machines made and sold by the Wood Company 1, e · 1880 -27,9 3; of the machines could possibly cause such extensive and constantly increasing sales. The above figures speak louder words of praise than anything we could possibly say They have enlarged their factory so as to be able to fill increased orders for 1855.

The John Deere Plows have a world-wide reputation for excellence The fact that Deere & Co, have the bargest steel plow manufactory in the world is sufficient guaranty of the superiority of the goods they manufacture.

Russell & Co's Threshers, Engines and Saw Mills, are fast taking the lead, and in the near future will stund without a rival. A person that ha ever used a Massillon Thresher will never use any other. *Livery Machine* we have sold has given the most perfect satisfaction.

The Gilpin Sulky Plow is the only single iever sulky plow made. Th "Gilpin" to-day stands without a rival for strength, lightness of draught, simplicity and quality of work. No person having any regard for horse desh will purchase any other sulky plow after using the one-lever Gilpin.

The Gale Manufacturing Company spare no expense to make their Sulky Rake superior to any in the market. Call and examine their goods, and be convinced of the superiority of their Bakes also of their Chilled Plows.

We shall Incorporate our Business in April. GRANT, ODELL & CO.

46 YEARS SUCCESSFUL BUSINESS. Antedating and Excelling all Competitors.

In this way peace was restored, and higs went on smoothly as before orter while he is making up the berths. He wished to cross over to Fox Chan This is a good way to let people see el, but was prevented by the do isease breaking out again, whic ust how little sense you had left after our brain began to soften. Th

killed all his dogs except two. The natives also had not antinals enough In traveling, do not take along a lot and cruel in dealing with those he disof off clothes that you know you will likes. On the other hand, the Fenians left to get to their scaling grounds So he had to give up the plan of visiting Foxland, and wintered at the settle

Never walk through a car staring everbody out of countenance, like a Jim Crow detective hunting for the General O'Neil into Canada in 1881 only In March, 1884, two Eskimos stopped to prove himself a traitor. Others look upon him as a hero and patriot, James boys, but mind your own busat the settlement and lotd Boas that there were plenty of dogs in their ness, be quiet, polite and patient, and SEE THAT YOUR TICKET TAKES YOU seeking after years of peaceful agha-over THE GREAT ROCK ISLAND ROUTE. tion, to right the wrongs of his peocountry; accordingly he accompanied them to their settlement, where he was heartly welcomed. They provided him with dogs, sleds and provisions, Then you will feel as though you were among friends ALL THE TIME, and you will leave the train with a pang of the sives evidence of the train is the sives evidence of the trainer. and he was soon ready to start on his cuulae regret.

In the end of The outworks, however, are very few. simply an ordinary type-writer, with The main line of fortifications may the letters, numerals, etc., ou raised August his provisions were all used up The main line of fortifications may be described as a wall about twenty-rive feet high, built on huge earthworks and surrounded by a ditch about forty feet wide and sixteen feet deep. The whole enclosure is in the form of a square, or rather oblong-about 1,600 yards long, by 1,500 yards wide. The ditch is, or may be, flooded from the Heri Rud river, which flows westward to Kusan, and thence northward past and he was now anxious to get back civilization, and spent all his time look-ing for ships bound South. A sail was seen on the horizon, but a dense for came up, and he was offerly disap-pointed in not being able to make himself seen. Soon after, however, two more ships put in an appearance; he attracted the attention of one of them by his signals, a boat was sent out for him, and to his joy he found himself on a vessel bound for the Gulf of St. Law-rence, at which place he arrived in September. Such is the exciting tale of Dr. Boas' struggles and hardships in the fright North. He certainly deserves great credit for courage and pluck for stay-ing in that wild country and facing all its dangers. Dr. Boas was able to gather much interesting information respecting the Eskimos during his stay among them. y his signals, a boat was sent out for

terns, in which it has been aneged, stood are inter the sparent complication water may be stored up in sufficient quantity to supply the civil population and the garrison for twelve months. separate wire leads from each key to a and the garrison for that the water Eskimos during his stay among them. A study of their migratory habits proved very instructive-and yet they can hardly be called "migratory," as But it appears, too, that the water single common wire, and each of these at the same season of the year they are stores might be destroyed with the key-connected wires serves either for greatest case by cannonade from the transmission or reception of messages. dways to be found at the same place. elevated ground on the northern side The sending or receiving of a partic In the month of May they leave their In the month of May they leave their winter settlements and go inland, tak-ing with them bags of blubber and reindeer fat, which they burn in their iamps. In the expeditions made by the Eakimos the old men and women remain behind and live on salmon until the hunters return with supplies. In March the seal brings forth its young, and the available of the city. The population of Herat is supposed to be about twenty-five or thirty thou-sand—the merest fraction of its popu-latiou in the days of its prosperity. Christie, who visited the city in 1809, estimated its population at 100,000. Conolly, who saw the town in 1828, said March the seal brings forth its young, and these young seals are esteemed a great delicacy by the natives. In the and these young sears are concluses. In the great delicacy by the natives. In the Spring months the walrus and polar bear are hunted, the former of which the latter skins. The regular seal hunting is done at this time also. Dogs are used to scent out the air-holes in the latter skins is open they hunt the mwith spears in boats. In August the auther that time their skin is best for use. at that time their skin is best for use.
