## GREAT ACTIVITY IS STARTING ABOUT FAY

Work Is Being Pushed at Many of the Old Mines at Deer Lodge and Properties in Vicinity.

There is more activity being shown in the vicinity of Deer Lodge, Pay and other places in that part of Nevada than has happened for a number of years, declares J. J. Treman, who returned from the district this morning. The old Horseshoe mill and mine, formerly owned by A. W. McCune and others, has been leased to E. E. Fuller and other men from Chicago, and the mill is now in operation. The company has about 60,000 tons of tailings on the dump and the best of these can be worked at a good profit. The old 18-ton mill has been put in shape and a good tonnage of ore is being sent through the mill each day. It is the intention of the lessees to treat copper ore and the mill and several have already made small shipments.

At the Gold Bug property Mr. Treman declared that there is from 18 to 20 tons of ore which has run from 800 to 1,000 ounces in silver and \$20 in gold to the ton.

Three strikes have been made at as many places in the White Horse property. One of the strikes is 30 inches of ore which has produced samples running as high as 800 ounces in silver and \$60 in gold. In another place, 600 feet from this, there is three feet of ore opened up that shows 500 ounces in silver and \$50 in gold. Within 100 feet of the first strike a good breast of ore has been uncovered that runs as high as 200 ounces in silver and \$30 in gold. All the rich ore has been discovered at a depth of about 30 feet. What will be the results on getting depth it is hard to tell. All the work thus far has been with shallow shafts.

The Intercean property is reported to have 18 inches of ore and considerable quantities of it. It is estimated that it will run as high as 1,000 to 1,200 ounces in silver and gold values of \$10. In one place there is a vein four feet wide that now carries \$30 in gold and one ounce in silver. According to Mr. Treman there is another place on the property 1,000 feet away where ore has been found on the surface that ran high in silver, but the gold values have not been determined.

The Iris property south of Deer Lodge has material on the ground for its new shaft. Work has been started and it is the intention of the management to send the shaft down on the Indiana ledge for 300 feet.

At Buck Mountain the company has commenced mining operations and will shortly be sending ore to the mill. The Pope company is also reported to have opened up a fine body of ore.

**RECEIVING STANDARD BONDS.** Bondholders of the Bingham Central Standard Mining Company are receiving notices from Walter B. Farmer, president of the Utah Metal Mining company, which is the consolidation of the Bingham Standard, Bingham Central, Bingham Metals and the Bingham Utah Savings and Trust company of this city and the Consolidated Trust company of Boston have been authorized to receive the bonds and issue receipts for the same. The bonds are being received in exchange for the clearing up of the affairs of the company.

It is most probable that there will be no new issue of bonds as they will either be taken up by the company or sold.

**There is also a Reason—** Why there are Parasites who attach themselves to the Paralytic Body of Cascarets' success—imitators, counterfeiters, Substitutes.

They are Trade Thieves who would rob Cascarets of the "Good Will" of the people, and sneak unearned profits, earned and paid for by Cascarets.

**A Dishonest Purpose means a Dishonest Product and a Dishonest Product means a Dishonest Health or Welfare.** Beware of the Slick Salesman and his ancient "Just as Good" story that common sense refutes.

Cascarets are made only by the Sterling Remedy Company, and the famous little Ten Cent "Vest Pocket" box is here shown. They are never sold in bulk. Every tablet marked "CCC."

**BE SURE YOU GET THE GENUINE.**

**IF FREE TO OUR FRIENDS!** We want to send to our friends a beautiful French-designed, MARBLED BOX, hard-covered in colors. It is a beauty for the dressing table. Ten cents in stamps is asked as a means of good faith and to cover cost of Cascarets, with which this beauty is packed. The sending is free, mentioning this paper. ## Volume Five Church History

Published by the Church With Introduction by Elder B. H. Roberts.

This volume deals with the history of the Church from May 1847, to 1851 of August, 1847. It therefore covers a period of about sixteen months. The main external events may be set down as follows: First, exposure of the wickedness of John C. Bennett, and his departure from Nauvoo; (2) the charge against the Prophet Joseph of complicity in an attempted assassination of Governor Lilburn W. Boggs, under whose celebrated exterminating order the body of the Church was driven from Missouri; (3) the attempt of the state of Missouri to extradite the Prophet from the state of Illinois, to be tried as an accessory before the fact to an assault on ex-Governor Boggs; (4) a second attempt on the part of Missouri to extradite the Prophet from the state of Illinois on the old charge of "murder, treason, burglary, arson, larceny, theft and stealing;" first brought against him in the year 1838; (5) a preliminary prospecting of the west, doubtless, with a view to the contemplated removal of the Saints to the Rocky Mountains.

Of events that relate more nearly to the Church as an organization, there should be mentioned: (1) the introduction of the endowment ceremonies and enlarged instructions on the subject of baptism for the dead; (2) an extension of auxiliary organization by bringing into existence the Young Men's and Women's Societies.

Another item of great interest in this volume is the manifest development of the character and spiritual strength of the Prophet during this period. The trying, trying, trying through which he passed seemed to discover new qualities of soul power which him, and to emphasize those which were known to have possessed.

The doctrinal development of the period covered by this volume deals with several items which may be regarded as preliminary to that richer unfolding of philosophical thought to which the last year of the Prophet's toiling life was so largely devoted.

## TRADE CONDITION IS AGAIN NORMAL

Chief Drawback is High Prices in Some Directions.

New York, Oct. 1.—R. G. Dun & Co.'s weekly review of trade tomorrow will say:

The industrial and commercial situation, as a whole, is that of a full return to normal conditions. The chief drawback in the situation is to be found in the high prices, which serve to check operations in some directions. Business in steel rails to expanding and much activity is expected next year, as the railroads are covering future requirements freely. In addition to the demand for domestic consumption, the leading producers have received a contract for 12,000 tons for export to Mexico.

**A BAD MIX-UP.** "Say," remarked one government clerk to another, "I'm up against it good and proper."

"What's the trouble?" queried a second.

"I got two medical certificates from two different doctors yesterday," explained the party of the first part. "One was a certificate of health for a life insurance company, and the other was a certificate of illness to be sent to my chief with a petition for two weeks' leave of absence."

"Oh, that's nothing," rejoined his fellow-clerk. "I've done that myself."

"Yes," continued the other, "but I mixed the certificates in mailing. The life insurance company and the certificate of good health went to my chief, and the other to the doctor."

## Jensen Creamery is Pronounced Sanitary

City Food and Dairy Commissioner Submits Score—Little Improvement Can be Made

The local dairy situation has of late been attracting much attention on account of the unsatisfactory condition of a fairly large portion of the milk and cream shipped into this city by independent dairymen, but it is most satisfactory to note that the largest creamery in the state and in the west has been subjected to the inspection of the city food and dairy commissioner, and the result is a report which is a credit to the dairy industry of this city.

The following facts speak for themselves:

"Salt Lake City, Utah, September 24th, 1909."

"W. E. Jensen, President of the Jensen Creamery Co."

"Dear Sir:—Please and enclosed a copy of the score card of your creamery. I cannot see where you can improve the same except outside surroundings could be paved."

Your very truly,

"WALTER FRAZIER, Food & Dairy Com."

The report referred to was made under the supervision of the United States Department of Agriculture, Bureau of Animal Industry, and in one of many such reports on the results of sanitary inspection of the country's creameries. The total score is on the scale of 100, though in each case the perfect score on any one subject is given before the actual score allowed.

The plant situation has a score of 10 out of 10; the surroundings 10 out of 10; arrangements, 7 out of 10; construction, 5 out of 10; machinery and equipment, 10 out of 10; in the handling, bottling, machines, drying racks, crates, sinks, pasteurizer and cold storage, 10 out of 10; water for cleaning, 10 out of 10; salaried, 10 out of 10, making a total score of 92.5 points out of a possible 100. The plant shows the following:

Excellent condition: Floor, 5 points out of 6; the walls, 4 out of 5; machinery and equipment, 10 out of 10; in the handling, bottling, machines, drying racks, crates, sinks, pasteurizer and cold storage, 10 out of 10; water for cleaning, 10 out of 10; salaried, 10 out of 10, making a total score of 92.5 points out of a possible 100. The plant shows the following:

This excellent report is ample evidence of the fact that Jensen Creamery Company, manufacturers of the well known "Blanchard" brand, is considered by experts to be one of the most sanitary creameries in the country. It is also a credit to the dairy industry of this city, and a credit to the city food and dairy commissioner, who has been so successful in his efforts to improve the dairy industry of this city.
