## DESERET EVENING NEWS: SATURDAY, SEPTEMBER 12, 1903.

of agriculture to open the congress by an address in the name of the presi-

dent. This congress, then, marks a new rooch in the history of the beet sugar industry. It is opened under the aus-industry. It is opened under the aus-industry. It is opened under the aus-industry is opened under the sugar time the avowed enemies of the sugar beet, and that now officially announce that the beet sugar war is over. Beet sugar has triumphed and chained its preatest enemies to its triumphal char-ter.

Freatest enemges tot. Of one thing the beet sugar people may rest assured: Their industry will be the center of attraction at the con-gress. No better assurance is needed than the fact that Mr. Truman G. Pal-mer, the secretary of the American Beet Sugar Manufacturers' Association, will represent the industry in Ogden. He will show in a specially prepared address that the future of the Ameri-can beet sugar industry is worth more to arid America than are all other pos-sible industries of that region comable industries of that region comquent plea, his audience will know on what side to stand.

## Has Sold a Pile of Chamberlain's Cough Remedy.

have sold Chamberlain's Cough temedy for more than twenty years nd it has given entire satisfaction. I and it has given entire satisfaction. It always affords quick relief and is pleasant to take. For sale by all druggists.

LEARN TO MILK PROPERLY.

In answer to a query sent the New York Tribune Farmer as to the cause and remedy for hard milking, Dr. C. D. Smeal offers the following suggestions: The cause of the milk coming so slow. ly is a hardening or callousing of the ducts that allow the milk to come down into the milk cistern at the base of the feat. You will, likely, when you com-mence to draw the milk from this quarter experience no difficulty in getting a few streams of milk. Then difficulty will begin, as the milk will not come down in the teat as fast as you desire to milk it out. I am sorry to tell you there is no known remedy for this. A close examination will show you that close examination will show you that there is a small, hard lump well up above the base of the teat. At this point are the ducts or openings of sev-eral tubes which allow the milk to come down into a cavity at the base of the teat, called the milk cistern. When-ever these openings (ducts) become swollen, or closed partly, the milk can-not come down. Now as to the cause or this I will say: Sometimes the buntof this I will say: Sometimes the bunt-ing of a calf will cause it; but a more common cause is hard mflking. Some have a habit of milking with the thumb and forefinger and, when that person is and foreinger and, when that person in-gers, by the squeezing he gives the parts he injures these delicate ducts, and the result is they begin to thicken from inflammation. The next milking from inflammation. The next milking they are macerated again, and in a few days or weeks a lump is formed. It happens more frequently with cows af-ter milking is stopped entirely, when the cow is dried off before becoming fresh, than otherwise.

Many a man has reported thus: I have a fine milch cow that milked all right up to the time I stopped milking her; but when she dropped her calf I found that from one or more teats ] not get a drop of milk; yet the ud-is full of milk and does not seem to be inflamed. The cause of this is that as long as she was daily milked the ducts were kept open; but when mllking stopped there was a healing of

until a lawyer from Worcester, Mass. had offered \$110. Then a Boston wholesale merchant arose and said it was a shame to make such a sacrifice when there was no need such a sacrince when there was no need of it, and said if he had money enough about his person to protect the girl the hair should not be cut off. It was then agreed that as the rivals made their bids they should deposit the money on a table in front of the auc-tioneer. ioneer.

tioneer. The contest was spirited for half an hour, and more than \$1,000 in bills was on the table when the Worcester man said he had no more money this side of the bank where he made his depos-its. As it was agreed that nothing but cash should be taken during the auc-tion, the Hoston merchant paid down \$356 and Miss Swythe went home wear. \$536, and Miss Smythe went home wear ing her hair and knowing that the

These are decidedly THE SWELL novelties for handsome street cos-

learning to milk properly, without stripping with the thumb and finger. I know some will ask, How can this be done with a heifer with short teats and perhaps a caked udder. Well, I will say that milking can be done more easily with the whole hand than with the thumb and fingers, when you have trained your hand to squeeze the udproperly, using the thumb and two first fingers to squeeze the udder and two small fingers and the palm of hand to bring the milk from the Some will say when they read "Bosh! With a large hand like one can milk a helfer with the id." To such I will say: The writer has a hand like le hand. heart, very large; in fact, larger n bine out of ten men's hands in than nine When spread out it covers a of nine and one-half inches and distance of nine and one-half inches from the of thumb to the of little finger. I will bet a yellow cat against a new hat any doubter's hand can't covhat distance. Yet I never have seen heifer with a teat so small I could not milk her without stripping. I there-fore say that the habit that is ruining so many fine cows can be dispensed with. You can milk with the whole hand as well as I, if you will only train your hand to do it. In short, learn to milk a cow properly. That is all there is to it, and prevent these troubles.

## The Genuine vs. Counterfeits.

genuine is always better than a counterfeit, but the truth of this statement is never more forcibly realized or more thoroughly appreciated than when you compare the genuine De-Wilt's Witch Hazel Salve with the many counterfeits and worthless sub-stitutes that are on the market. W. S. Ledbetter, of Shreveport, La., says: "After using numerous other remedies without benefit, one how of DeWitt's the dusing numerous other remeties hout benefit, one box of DeWitt's tch Hazel Salve cured me." For. nd, bleeding, itching and protruding es no remedy is equal to DeWitt's itch Hazel Salve. Sold by all drug-ts.

## HER HAIR AT AUCTION.

Castine, Me .- For more than a year nembers of the Union church have en making efforts to pay off the mortgage on the property and get money chough to paint the building on the out-, and so soon as the summer visitarrive they are besieged by wo-l, who call at all hours, asking for butions to the cause. month the parishioners held a

Is month the parishioners held a ch fair to secure money that was led immediately. Most of the sum-colonists attended, paying the ad-sion fee, and sitting back to witness performance which had been an-need.

After prayer and singing the pastor mounced that Miss Bessie Smythe, aughter of a farmer who lived on the priand road, had consented to sell her all at auction and to have it cut off in the presence of the company to be diven to the one who would pay most or it, the money to be devoted to the ause in which all were interested. The hair was uncoiled and shaken
