CONGRESS PROGRAM.

Exhaustive and Important Questions Scheduled for Consideration.

An outline for the program of the Transmississippi Commercial Congress has been prepared by Vice President Whitmore and forwarded to Mr. Calmer. This is not yet the official program and will not be until passed on by the advisory and executive committees. These bodies may make some changes but it is probable that these, if there be any, will not be of great importance. The advisory committee will be called by Mr. Whitmore next Tuesday afternoon and the executive at 10 o'clock Wednesday morning. The executive committee will be very short and they will doubtless make official what is suggested by the advisory committee.

There was some objection allowing the press to print the program at this time, but through the courtesy of Secretary Calmer this was done, with the understanding that it should be explained that the program is merely a suggestive one and subject to revision.

The following letter has been received by Secretary Calmer of the Transmississippi Congress:

CAMDEN, Arkansas.

Dear Sir—On account of the opposition in this county to the city council to the expense of sending a delegate to the Transmississippi Commercial Congress, and the two committees not believing it to be of sufficient importance, how billed to be represented, the council dropped the matter. I will, therefore, not be with you, although I have made every preparation to come. We are specially interested in improving our river, the Ouachita, in fact it is of great importance to Arkansas, Louisiana and in the nation at large; for with locks and dams it would pay, all the year, navigation to 2,000 miles of waterway now available from six to nine months in the year, to a value of more than three than $200,000,000 of business yearly. I think a great mistake has been made. This section should have been represented.

The endorsement of such a body as the Transmississippi Commercial Congress would, in my opinion, be next to the unanimous consent of what we most desire and need—the slack water navigation of the Ouachita. I regret for my people and this section of weakness and lack of spirit should be known.

Most respectfully,
MILTON A. ELLIOTT.
