

BLACK HOSTILE TOWARD RALEIGH

Feeling Between Councilman and Street Supervisor Not Friendly.

LIVELY TILT WITH CARTER.

Man From Fifth Accused of Blocking Improvements for Personal Reasons—Charges Made Both Ways.

That there is not a very friendly feeling between Councilman T. R. Black and Street Supervisor Jake Raleigh was very evident at the meeting of the city council last night. On two occasions Black displayed his hostility to the street supervisor, and in one instance he had quite a tilt with Councilman Carter in regard to work being carried on by the street department. Carter charged that Black opposed the improvement merely because it was in the second precinct instead of in the fifth where Black resides. Black denied that there was any personal motive in his stand.

The trouble arose over a resolution by Black prohibiting the heads of departments from expending funds on any public improvements without first furnishing an estimate of the cost of the same to the council, and getting the authority from that body to make the improvement. The resolution was opposed by several councilmen, on the ground that it would delay many needed improvements and repairs necessary to the various departments, and would be of no avail.

SERIOUS CHARGES.

The matter of repairing Second West street was cited by Black as an instance where the street department was spending money without authority from the city council, and he thought that such matters should be legally authorized before the work was done. Carter said that the work of laying macadam on Second West was merely a repair to the street which was required in the regular monthly regulation of the street department, and further that Black would not have made any complaint if the work had been done in the east side of the city instead of the west.

Black denied that there was any personal motive behind the resolution, and still maintained that the work was being done without proper authority. At some little argument on the matter the resolution was referred to the streets committee for consideration, and there will no doubt be an adverse report upon it.

BLACK WAS OPPOSED.

When Street Supervisor Raleigh recommended the purchase of two new street graders at a total cost of \$200, Black again showed his opposition, and denied that he wanted to see the money before he would vote to purchase them. Councilman Carter and Street Supervisor Raleigh both explained that the graders had been tried on the streets here for several days, and that they worked satisfactorily. This did not satisfy Black, and he still opposed the matter, and, upon his motion, it was referred to the streets committee for consideration.

BOARD MEMBERS NAMED.

Mayor Thompson submitted the appointments of Dr. J. E. Scallan, Mrs. S. M. Barlow and Mrs. Joseph M. Cohen as members of the library board for the term ending June 30, 1909. The first two appointments were made to succeed Alfred Lambourn and Mrs. H. J. Hayward. Mrs. Cohen was reappointed to succeed herself. The appointments were confirmed by a unanimous vote.

PROPOSED COMPROMISE.

A proposition was received from the Alcatraz Asphalt Paving company offering to compromise its suit against the city brought to recover \$7,500 withheld by the city as a forfeit for failure of the company to complete certain street paving contracts within the specified time. The company claims the amount stated together with interest from Dec. 31, 1902, and costs of suit, but it offers to accept \$7,500 without interest and costs. The matter was referred to the finance committee with the city attorney and engineer associated.

VETO SUSTAINED.

The veto of the mayor to the reduction of license for the Adam Foreman and Sells Bros. circus from \$400 to \$150 was sustained by the unanimous vote of the council. The streets committee recommended that the bridge over City creek between Canyon road and State street be widened and that a fence be built along the north side of the creek between the streets named so as to protect children passing to and from the Lafayette school. The total cost of the work will be \$275. The report of the committee was adopted.

DEPARTMENT APPOINTMENTS.

Upon request of the city treasurer, Chief of Police Sheets appointed Dog Tax Collector M. I. Morris as a special policeman and the appointment was confirmed by a unanimous vote. Chief of the Fire Department Vail submitted the appointment of A. Buckenham as a member of the department to fill a vacancy. This appointment was also unanimously confirmed.

E. E. Johnson notified the council that he had purchased the city waste paper boxes and franchise for maintaining the same from L. C. Duncan and asked that the transfer of the franchise be approved. The matter was referred to the municipal laws committee with the city attorney associated.

WIDE TIRE ORDINANCE.

The ordinance requiring wide tires on vehicles hauling heavy loads, which has been hanging fire for several months was read and referred back to the municipal laws committee so that several changes may be made in it. The supplement dealers of the city will be called before the committee to help in making the ordinance suitable to all requirements.

CHURCH NOTICES.

The regular monthly meeting of the high priest of Granite stake will convene in the Granite stake tabernacle on Sunday, July 15, at 10 a. m.

J. W. COOK.

N. V. JONES.

C. S. MILLER.

Presidency.

The Ensign stake Relief society conference will be held in the Eleventh ward meetinghouse, corner Eighth East and First South streets, on Friday, July 13, 1906, at 10 a. m. and 2 p. m.

MARGARET A. ROMEY.

THE RELATION OF SOUND TO HEARING

Topics in Nature Study for Schools in Winter Months.

GIVEN AT STATE UNIVERSITY.

How to Teach Science by Observation And to Socialize Knowledge by Actual Use.

"The nature work for the winter months in the common schools," said Prof. H. Cummings yesterday in the nature-study class at the university, "should take up those subjects which may be treated irrespective of the season of the year, such as sound, light, heat, mechanical principles, etc. The fall and the spring seasons are each distinguished by certain work to be done at these seasons only, so that independent topics may be considered during the winter months. Each topic should be approached by experiment and from the stand-point of the child's own knowledge. After the subject is considered, the knowledge gained is utilized or made practical by some form of socialization, that is by showing its relation to the child's interests and activity and by finding practical or profitable applications of it."

EXPERIMENTS IN SOUND.

Several weeks of interesting work may be devoted to the subject of sound. Ask the children of what use sound is to them. Visit a class of deaf mutes and notice their devices to overcome their deficiency of hearing. Visit a band, call attention to the different sounds and their harmonies. Have the children notice the difference in sound of hearing among animals, and report instances of cases of remarkable hearing. Show by simple experiments that sound is due to the vibrations of the sounding body by experiment with the tuning-fork, which when sounding is easily proved to be in rapid vibration. Further experiments showed that sound is propagated by waves in the air, the difference between noise and music, the effect of a sounding board, etc. What a spherical wave in air is like was approximately shown by making waves in water, by sending a wave along a rope, by a row of boys in a line, etc. Any simple text-book on physics may be used as a basis for these lessons. The surfaces of spheres are proportional to the squares of their radii. Thus a sphere of one foot has only one sixteenth the surface of a sphere with a radius of four feet; hence the intensity of the sound diminishes at a rate equal to the square of the distance from the sounding body.

PROPERTIES OF SOUND.

The different kinds of media—air, wood, water, iron, stone, etc.—the fact that they transmit sound, were next investigated by means of experiment. That sound requires time in which to travel was brought out by observation: It goes 1,080 feet per second through air at 70 degrees. To judge the distance, allow about five seconds for a mile. To show the reflection of sound have the children hold two books or their hands alternately in front of and behind their ears, while the organ is playing, etc. This shows the utility of the outer ear, and the children may show which animals the rabbit, the deer, etc., are able to hear by external ears, or ear-trumpets, to reinforce the sound.

At this point, a study of the ear—its mechanism, its functions, its discriminative power of selection, etc.—is taken up because of its relation to the preceding topics.

HAD GREAT SCHEME.

Plan of the Late Prime Minister Seddon of New Zealand.

The late R. J. Seddon, prime minister of New Zealand, whose recent death was noted in these columns, had a great scheme for the benefit of aged persons, which would undoubtedly have been carried out had he lived.

He outlined his plans briefly in a letter to Bishop Wm. B. Barton of this city. The letter was dated, Wellington, May 12, and is as follows:

Dear Bishop Barton—I duly received your letter of the 12th of February and I was indeed pleased to hear from you and that you and your wife are all well, and I am happy to be able to say the same of my family and myself. I am leaving this afternoon for Australia and expect to be absent from New Zealand for a few weeks.

I am glad to hear that your state is so flourishing a condition, and that the practical development of its natural resources is being so energetically carried on, and I trust you will be successful in the satisfactory solution of social and

\$5,000 Reward

will be paid to any person who can find one atom of opium, chloral, morphine, cocaine, ether or chloroform or their derivatives in any of Dr. Miles' Remedies.

This reward is offered because certain unscrupulous persons make false statements about these remedies. It is understood that this reward applies only to goods purchased in the open market, which have not been tampered with.

Dr. Miles' remedies cure by their strengthening and invigorating effect upon the nervous system, and not by weakening the nerves.

"I consider that there are no better remedies put up than Dr. Miles' Nerve, Anti-Pain Pills, and Nerve and Liver Pills. We have used them for years, and for comfort, they are to many others. My wife is using the Nerve, and considers it the best medicine in the world. A lady friend of mine, who was almost a total nervous wreck, through my earnest solicitation has used several bottles of the Nerve pills, with wonderful result. Wm. CROMBIE, Salt Lake City, Utah."

Dr. Miles' Anti-Pain Pills are sold by your druggist, who will guarantee that the first package will benefit. If it fails, he will return your money. 25 doses, 25 cents. Never sold in bulk. Miles Medical Co., Elkhart, Ind.

Industrial problems as we in this part of the world have been much interested in the past, have been accomplished here in the past interests of the community, much still remains to be done. I am now devoting my energies to the formulating of a scheme for the providing of universal pensions for the aged needy, for whilst our present form of old age pension is of immense benefit and is widely appreciated, there are certain restrictions in connection with it which preclude its being granted to many deserving aged persons who have not resided in the colony the prescribed number of years laid down by the act, and these are the persons I now wish to reach. Should I succeed in evolving a workable scheme for this purpose I shall regard it as the crowning achievement of my career.

I am pleased and grateful to say that the prosperity and content of the people and the kindly congeniality and the surplus of revenue over expenditure for the financial year just concluded amounted to three-quarters of a million pounds sterling.

I am exceedingly sorry to hear of the death of your fine old native chief. Let us hope he has reached those happy hunting grounds which the native race hope to see when the end of their life's journey is attained.

AT THE RESORTS.

The annual outing of the Spanish War veterans is scheduled to occur on Friday at the Salt Palace. At the meeting of the organization held in the hall of the Scott building last evening there was an attendance of 125 and during the session 27 new members were received.

Next Tuesday will be Catholic day at Salt Lake, when about 250 children will be included in the big picnic. Among these will be the children of the St. Anne's orphanage, who will be guests of the management. The junior choir of St. Mary's cathedral, the St. Cecilia chorus and the scintillating boys will also be there as guests of Bishop Scanlan. Members of the congregation also will be present and it goes without saying that they will have picnic baskets for all.

By Monday next the season at Brighton will be in full swing. Quite a number of people have gone to take up residence there during the hot weather already.

A unique feature of the Pioneer stake outing to Calder's tomorrow, will be a good old-time spelling match, conducted on the lines so characteristic of school work in early days. Already the contest has stirred up considerable interest and many are brushing up on their orthography in the hope of walking off with the first prize. The excursion is under the auspices of the Mutual Improvement association, which have arranged a most excellent program for the day. Commencing at 4 o'clock there will be a spirited game of baseball between Mutual and Sunday school workers, to be followed by horse racing, boat racing and a bowling contest. Supper will be served at 7:29, all being expected to take their picnic and eat together.

A record breaking crowd is at the park today where the Sunday schools of Granite Stake are holding the fort. The program includes a match game of ball between the north and south ends of the stake, horse races, boat races and a number of prize foot races for the little folks.

DOCTOR SAYS CREFFIELD'S SLAYER WAS INSANE.

Seattle, July 9.—The defense in the case of George Mitchell, now on trial for the killing of Franz Edmund Creffeld of Holy Roller fame, at the opening of court this morning gave evidence that it feared the influence on the jury of the shooting Saturday night of former Judge G. Meade Emory by young Chester Thompson. As soon as Judge Frazer took the bench, Atty. Will H. Morris called attention to the fact that the courthouse flag was flying at half mast and requested that the balliffs having the jury in charge be ordered to take special precautions not to let the jury find out the reason and to also take the jury from the courthouse to the hotel by a route which would make it impossible for the flag to be observed. The court issued the orders asked for.

The only witness examined today was Dr. John W. Wetherpoon, a Seattle physician, who has made a study of insanity cases. The witness gave it as his opinion that George Mitchell was acting under an insane delusion both before and at the time he killed Creffeld. The rigorous cross-examination on the part of the state failed to shake the witness. One more witness will be called in by the defense and then, after a short time spent in rebuttal testimony and possibly a day given over to the arguments, the case will be given to the jury when a verdict is looked for by Thursday evening.

LE DOUX MURDER TRIAL.

Stockton, Cal., July 9.—In the motion today for a new trial for Emma Le Doux, convicted of the murder of A. M. Vickers, whose body she placed in a trunk the attorneys for the defense introduced several affidavits alleging that one of the jurors had talked with persons about the case and had declared before and after the trial that he would hang the woman.

MUTINY IN KASAREV REGIMENT OF CAVALRY.

Tambov, July 9.—A mutiny broke out Saturday in the Kasarev regiment of cavalry and during the consequent disorder an infantry officer and a soldier of the Nejlina dragoons who attacked the mutineers were killed. The mutineers have barricaded themselves in their barracks.

St. Petersburg, July 9.—The news of the mutiny at Tambov, which apparently is the most serious of such affairs since the Sebastopol mutiny, is confined to the bare details of a censored agency dispatch showing that the mutineers when attacked by loyal troops offered armed resistance before retreating to their barracks where they are now barricaded. Up to 1:30 o'clock this morning the newspapers have received no further particulars. In previous mutinies this year the disaffected troops have submitted when confronted by loyal detachments. The outbreak is a quick commentary on the claims of the native press in the interview with him published July 7, in which he affirmed that the cavalry could be more depended upon than the infantry because their officers were in closer touch with their men.

SENATOR W. A. CLARK THINKS BRYAN THE MAN.

Los Angeles, Cal., July 9.—United States Senator W. A. Clark of Montana, in an interview here tonight, declared his belief that William J. Bryan will be nominated by the Democrats for president in 1908. The senator expressed himself as confident that the Nebraskan would have no opposition in the convention. Referring to Montana politics, Senator Clark said that his successor would "probably be a Democrat," his advice on the political situation in his state being that the next legislature would be Democratic. He did not think, however, that E. Augustine Heinze would be nominated, and stated that he had understood Heinze had expressed himself as not desiring political preferment. The senator stated that his own retirement from the senate was due to his desire to be more at home. His duties at the capital, too, he said, had taxed his strength.

ROSE GETS A WRIT.

Justice Brewer of U. S. Supreme Court Grants Kansas Mayor One of Error.

Kansas City, July 9.—W. W. Rose, mayor of Kansas City, Kan., was tonight granted a writ of error by David J. Brewer, justice of the supreme court of the United States, which reverses the decision of the Kansas supreme court and stays the judgment of that body in fining Mayor Rose \$1,000 and demanding that he relinquish his office.

Mayor Rose will continue to perform his official duties as mayor until the case is acted upon by the supreme court.

JACKSON McKENTY'S WILL.

Nephews Bring Contest on the Ground Of Forgery.

Reading, Pa., July 9.—Today's Associated Press dispatch from San Francisco that Clayton and Howard Mc-

Kenty had contested the will of their uncle, Jackson McKenty, on the ground of forgery, created unusual interest in this city. McKenty, who was a pioneer and Pacific coast gold hunter, died in Nice, France. He was a native of this county and his death gave his entire fortune of \$300,000 to Col. M. H. Messerschert of this county, who was a millionaire and formerly a member of the Philadelphia bar.

PROTECT PROPRIETARY MEDICINES.

Did it ever occur to you that proprietary medicines are a blessing to mankind generally? The good ones have long continued sales, for the poor ones have short life and soon leave the market.

If we had to depend entirely upon physicians and druggists it would be expensive and very inconvenient at times, especially in the country, and at night when neither could be conveniently reached. For nearly forty years Rosche's German Syrup has been used in many families, and thousands of lives of adults and children have been saved by its use, when it was impossible to reach a physician. German Syrup is the best household remedy for coughs, colds, throat and lung trouble. It quickly relieves the hacking cough, loosens the phlegm, and brings sound and refreshing sleep. Twenty-five and seventy-five cents. Get a copy of Green's Prize Almanac.

BUTTER LEGS

Are Really Unfit for a Hot Climate.

A sarcastic one said, "A person who won't quit the coffee habit when heart and nerves are crying for relief, has less stability of character than a pair of butter legs in hades." Truly a melting remark.

It seems hard-hearted to poke fun at the coffee "crank" who "Just can't give up my coffee" for the habit sometimes becomes a disease just as truly as the whisky habit, but it is easy for the worst old coffee toper to shift over to Postum Food Coffee, provided it is well made.

Postum has the deep, seal brown color of drip coffee and a certain snappy flavor, not of the rank, strong, bitter coffees but much like the mild and high grades of Java.

It supplies in liquid form the needed food elements required to rebuild the nerve centres, hurt or destroyed by coffee. What do we mean by "nerve centres"? These are found in various parts of the body and each little nerve sack or envelope is filled with a soft, pulpy, gray substance that is really the life and energy of the nerve. Coffee and other stimulant narcotic poisons tend to destroy this gray matter and when enough is broken down, nervous prostration or other form of disease will set in. The trouble may show in weakened heart, lungs, stomach, bowels, eyes or any other organ, for the lack of life power or nervous energy is likely to attack the weakest part first.

The remedy is, (and get to work in time) to quit the drug and therefore destruction. Then take a liquid food such as Postum and go to rebuilding.

That is a sure and dependable road to Wellville.

"There's a Reason."
