

MINING, BUSINESS AND STOCKS

MANHATTAN CON. STAKES WATER.

Work Stopped in Shaft Until Pumps, Ordered Recently, Are Installed.

TWO HOISTS ARE GOING UP.

Novel Manner of Placer Mining on Cowboy Property—Other Manhattan News.

Special Correspondence.

Manhattan, Nevada, May 20.—Work in the shaft of the Manhattan Consolidated was stopped a few days ago on account of water. At a depth of 75 feet a large flow was encountered, and work cannot be resumed until the pumps which have just arrived, are put in place. This is a great feather for the Consolidated, as now water is assured for the large mill which the company is contemplating building in the near future. Two hoists are in the course of construction.

Quite a stir was occasioned last Wednesday by a panning from a sample found in the tunnel of the Manhattan Mother Lode Mining company. E. E. Kain, while prospecting the hill on the Mother Lode property, found a piece of very good looking float directly above the tunnel. He thereupon entered the tunnel to a point below his find, and upon prospecting the sides, found a tale streak cutting through the tunnel, and took several samples therefrom. He came out into the light and noticed several particles of free gold on his sample. He brought it to town, and upon panning it, found one of the largest panings ever seen in this district. Mr. Kain, a local miner, estimated the value at \$20,000 per ton. The sample was about the size of a hen's egg. The management is at present tracing the source of this rich vein.

A strike was made a few days ago on the Virgin Mary Fraction of the Manhattan Consolidated Extension Mining company, adjoining the Manhattan Consolidated. At a depth of 90 feet, a 12-foot vein of ore was encountered. The nature of the ore is a schist with stringers of quartz running through it. The peculiarity of the strike is that the free gold is found in large quantity in the schist. Some of the finest specimens ever seen in Manhattan were brought in from this property. Selected samples were taken, and showed an average of 15 cents per ton, while the whole lot will average around \$75.

Drifting was begun Friday last from the 75 foot level of the Manhattan Consolidated, and it is expected that a three-foot vein of fine looking quartz carrying heavy iron sulphides, was encountered. This vein was found in the shaft, but only in small quantities. It has opened up strong in the drift, and returns values of a little over \$18. Mining men are strong in their belief that the Cowboy has a permanent mining proposition, and are confident that a rich shoot will soon be found, which will place the Cowboy in the ranks of the steady producers.

The dry washer, which is at work on level No. 3 of the Cowboy, is giving excellent satisfaction. This is a novel process. The dirt is thrown on a screen at the top of the machine, sifted below onto a shaker, then deposited on a fine board. A bellows is constantly sending a current of air across these riffle boards. This blows off the sand, and the gold being heavier is deposited at the bottom of the board, and is caught by the riffles. Considerable iron is caught in this way, and therefore is separated by quicksilver, after being taken from the riffle board.

On the Raycroft vein of the Little Gray, a 12-foot vein of high grade mill ore has been encountered. Selected samples pan very high in free gold, and the entire ledge will average about \$40 per ton. This is a very good quality of free milling ore.

The hoist on the Mustang claim has been erected on the company's property, and is about ready to operate. It is a very prominent place on the hill, and can be seen from quite a distance down the canyon. A very good grade of mill ore is being taken from the company's shaft on this property.

The drift from the company shaft on the Georgey group of the claims of the Manhattan Nevada Gold Mines is now in 41 feet, and the entire face of the drift is in ore of a high mill grade. The large black quartz ledge has not yet been encountered on account of the dip of that ledge, but very high values are expected at the juncture of these two veins. It is expected that the next five feet will bring the drift at the point desired.

A contract for a foot shaft on the property of the Manhattan Express Mining company was closed yesterday, and the men will begin active work today. The shaft will be sunk on a good looking quartz ledge, and the property developed in a thoroughly modern fashion. From the showings already uncovered, it is quite evident that a good body of high grade ore will be developed at depth.

The Manhattan Georgey Extension Mining company has been incorporated. The company's holdings adjoin the famous Georgey group at Central, and contains an extension of the same big ledge which crosses that property. Active development work will at once be started on the Oregon Fraction and the ore-bodies opened up in a satisfactory manner.

The tunnel on the Consolidated Manhattan property at East Manhattan is now in the hill 12 feet, and is all in ore of a mill grade. A force of men is at work driving the tunnel with all possible speed, to develop the large 300-foot ledge on the property. Already they have tapped four veins which cut through this ledge, all of which contain very good values. The vein at the face of the tunnel is the best looking one yet encountered, and pans very good in free gold. This is destined to make one of the big mines of this country.

Work on the Buffalo is progressing rapidly, and from the character of the ore now being extracted, a paying mine is assured. This property, the Consolidated Manhattan and the Manhattan Mother Lode Mining company, E. E. Kain, same big ledge, and many mining men of this section are of the opinion that some of the largest mines will be in this vicinity.

Today's Metal Quotations.

Local settling prices are reported by the American Smelting and Refining company:

SILVER, 67 3/4
COPPER, (Casting), 18 1/4
COPPER, (Electro), 18 1/2-32

ON MINING EXCHANGE.

No Sales During Forenoon Regular Call—All Done on Open Board.

The regular call of the mining exchange this forenoon resulted in a whitewash. Charles Goodwin went down the entire line of listed stocks and not a sale was recorded. Brokers came to on the open board, however, and sold 14,225 shares of the valuation of \$1,452.75. The first to participate was Columbus Consolidated, when 400 shares were taken in at \$7.05 and another 1,000 lot at \$7. A small bunch of Daily Judge, offered at \$11.75, was taken in at \$12. The rest of the day was continued weak, selling as low as 15 1/2 cents. The closing quotations and sales were:

RECEIVER APPOINTED.

Management of Final Copper Company Not Satisfactory.

St. Louis, May 23.—A petition asking for a receiver for the Final Copper company was filed today by Albert B.

Campbell of Pittsburgh and James K. P. Boggerl, C. C. Ward and W. B. Nichols of Cincinnati, stockholders in the company.

The Arizona Banner Copper company is made co-defendant, as are also Charles A. Lewis, W. A. Kannerer, Geo. B. Teasdale, W. M. Kinney, St. Louis business men, who are named as directors in the petition. The company is capitalized at \$2,000,000.

Prior to Dec. 1, 1903, the petition states, there was complaint among the stockholders of the copper company as to its management. On that date the directors bought in the stock of the complaining stockholders, and a short time later, it is charged, issued \$115,000 in bonds to cover the expenditure. The bonds were not affected by the petition.

The petition says that there was an accumulated sale and ask that the bond issue, the mortgage securing it, and the sale be declared void so that the defendants be restrained from the sale of the copper company's property, and that a receiver be appointed.

WHITE HORSE DIRECTORS.

Displaced With Methods of Promoter Mark Musgrave.

The Reno Evening Gazette is making a fight against wild cat mining schemes in Nevada, and, in a recent issue, it takes Mark Musgrave to task for indulging in spectacular advertising of the White Horse tunnel. The tunnel, owned by the Nevada Exploration syndicate.

Musgrave was well known in Salt Lake several years ago. He poses as a promoter and is known to have been responsible for the launching of the White Horse Tunnel proposition. He succeeded in getting Governor John Sparks to serve on the board of directors; besides, he has secured other prominent business men of Reno.

The advertisement in question has appeared in a well known New York paper. The directors, says the Gazette, deny the knowledge of the advertisement is called in they will resign in a body.

SALT LAKERS AT FAIRVIEW.

Peery and Luce Form a New Company for Nevada Camp.

D. H. Peery of Salt Lake City arrived in camp the early part of the week, and immediately went into action on property in which he and Ben D. Luce are interested. The property is the Peery-Luce group. The personal of the company will be made up of Goldfield and eastern people, and work on the property will commence at once.

Mr. Peery is a well known Salt Lake City miner. The result of their labors is the formation of the Eagle's Nest-Fairview Mining company, and the property holdings of the company will be made up of Goldfield and eastern people, and work on the property will commence at once.

the haul from this city would not be long, and the number of properties being developed in Butte bids fair to make another smelter a necessity.

CONCENTRATES.

Patrick Ryan departed for the east last night on mining business.

A car of ore from the Utah mine at Fish Springs is at the sampler today.

Manager W. C. Orem of the Utah Apex Mining company is in Bingham today.

Rol Benita has returned from making an examination of a mining property in California.

H. L. J. Warren, the Boston mine promoter, has arrived in the city on a brief business trip.

Brother William H. Child has returned from a trip of several weeks' duration in the east.

Frank L. Wilson expects to leave for the Deep Creek region tomorrow to look after mining interests.

Captain Duncan McVie did not reach home last evening as expected, but will come in this afternoon.

Supt. Newton Dunyon says the Little Bell mine of Park City can supply the market with 50 tons of ore per day.

John W. Royer, manager of the Lucky Dutchman properties in the recent Nevada district, is up from camp.

John A. Kirby, having completed the new Fairview Nevada, is expected to depart this afternoon for Fairview, Nevada.

The Sacramento Gold Mining company has posted its regular monthly dividend of 4 cent a share, or \$5.00, payable on June 1.

President David Keith and General Manager Thomas Kearns of the Silver King Mining company have returned from a business trip to the east.

The Calumet & Arizona Mining company has declared a dividend of \$3 a share payable on June 20 to shareholders of record on June 4.

A control of the Silver Glance properties in the Hannabach district of Nevada has been purchased by John W. Brock and associates of Philadelphia.

Frank B. Cook departed this afternoon for Fairview Nevada, to make an inspection of the Nevada Hills property and to look over the camp in general.

The ore and bullion settlements reported last yesterday by McCormick & Co. were: Crude ore and concentrate, \$30,000; bullion, \$45,000; gold bullion, \$5,000.

The T. & B. Samplers at Murray, which have been undergoing repairs, resumed operation this morning and Manager Copeland was on hand to witness the start.

President Charles M. MacNeill and General Manager D. C. Jackson of the Utah Copper company are in Bingham today looking over the properties of that big corporation.

Brother H. B. Cole departed on a sad journey to Wichita, Kansas, last night, taking with him for burial the remains of Mrs. Cole, who died on Tuesday after a lingering illness.

M. B. Sowles has returned from a trip to Washington county where he is in the charge of a road improvement proposition. While the one to which his attention has been attracted, in his opinion is a good one, yet he thought the price asked by the owners was too high to present development would justify.

Charles S. Wilkes, a former Salt Lake business man, but who is now engaged in mining pursuits in Nevada, is in the city on a brief business trip. Mr. Wilkes recently became interested in the Yungstons copper country and yesterday afternoon arranged with the purchasing department of the United States smelter to ship ore to this market.
