DESERET EVENING NEWS: FRIDAY, JANUARY 18, 1901.

OGDEN NEWS. JAN, 18, 1901. KIDNAPS HIS OWN CHILD.

\$ quel to the Suggs Divorce Suit - Husband Will File Cross Complaint.

seats of McGaw Van Dyke - Court Notes-Two Divorces - Harrisville piiry-Ogden Canyon Roadway.

Late yesterday afternoon considerable erdtement was caused on 24th street by Mrs. Louisa Suggs running down the street, crying that her little sixyear-old daughter had been kidnapped by a man who had ran down the street with the child. The police and sheriff officers were notified of the affair, and immediately started out on the search. The man who had stolen the child was soon located in the office of an attorney, and it developed that he is Mr. W. G. Suggs, the father of the child, Last August Louisa Sugga filed suit in Last August Louisa Suggs filed suit in the Second district court against her husband, W. G. Suggs, praying for a de-cree of divorce and cutody of the minor child on the grounds of desertion, fail-ure to provide; but the case never came up for hearing. The report of the filing reached Mr. Suggs, who came to Ogden Tuesday from San Jose, Cal., and immediately took steps to secure a decree of divorce and the custody of a a decree of divorce and the custody a decree of alvorce and the clistody of the child and yesterday he went to the house where Mrs. Sugge was Hv-ing, and seeing the child in the yard playing, took it and ran away, and his alterney is note comparing any his playing, took it and rail away, and this attorney is now preparing an answer and cross-complaint for filing. The an-swer will deny many of the allegations in the complaint of Mrs. Suggs, and the cross-complaint will set forth certain allegations and pray for a decree of diree and custody of the child for Mr. Sugga. DEATH OF MCGAW VAN DYKE.

McGaw Van Dyke, one of the most popular young men of Ogden, died yes-erday at his home in this city from neumonia, from which he only suffered one week. The deceased was born at Plain City, Weber county, 37 years ago, and has spent the major portion of his He was married in Ogden life here. He was married in Ogden and his widow, and one son, Howell, 15 years of age, survive him. His fa-ther, William Van Dyke, now at the point of death from the effects of a paralytic stroke, residues in Salt Lake, as do three brothers, Lewis, Alfred and Robert, and two sisters, Mrs. Parish and Mrs. Saddler. MEETING OF ASYLUM BOARD.

Reorganize and Appoint Officers Courts-After Canadian Lands.

Special Correspondence,

Provo, Jan. 18 .- The new board of insane asylum commissioners, consisting of the Governor, the State auditor ing of the Governor, the State auditor, and the State treasurer, met yesterday. Governor Wells, Auditor Tingey and Treasurer Dixon, were all in attend-ance. The board was organized with Governor Wells, president, and Audi-tor Tingey, vice president. Charles DeMolsy and Jos. T. Farrer, who held the offices of secretary and treasurer, respectively, under the former adminrespectively, under the former admin-istration, were again appointed to the offices named. Medical Superintendent Hardy re-

ported the movement of patients for December as shown by the following Fe. Males, males, Total,

In asylum Nov. 20th.,160 154 - 214 155 317 Discharged

Remaining Dec. 30th .. 160 154 314 Appropriations for December were made in the following amounts: Sal-aries, \$1,365.65; current expenses, \$1,-533.99; sundry expenses, \$54.95.

The report of the treasurer showed the following: Balance on hand Dec. 1st, \$495.66; received, \$4,205.75; total re-ceipts, \$4,601.41. Disbursed, \$4,578.81; balance on hand Jan, 1st, \$122,60, A requisition was ordered to be made

on the State auditor for \$2,833.59, to pay expenses for December. The following appointments of offi-

cers were made: Dr. M. H. Hardy, medical superin-

tendent (reappointed). W. R. H. Paxman, steward. Mr. Smallpox Situation - Fine Weather Paxman will commence his official duties on February 1st. Dr. Hardy reported that he had con-tracted for 160 tons of ice to be deliv-

much travel the roads are kep A Hair Food packed and one can go anywhere. I few years ago the Jackson Hole coun try was entirely shut off during mos of the winter, and the only way on There is this peculiar thing could get in or out was with snow shoes, but the last two years we have

a good sleigh road, Last season was a prosperous one among the farmers, having harvested good crops of grain and hay. Cattle and sheep men also enjoyed their share of the favored good times. Hay is getting to be scarce, owing to so many new settlers coming in last season, be sides sheep are being fed here. Mi C. Nickerson drove his herd of sheep out and will feed at Lyman, Idaho having sold his hay here for six dollar per ton, and bought, where he will feet for \$3.75. Messrs, Driggs and Pric And it stops falling of the hair. will also drive out to the lower val-ley to feed the balance of the winter Even if your hair isn't comnd will sell their hay here. The shee ing out, isn't turning gray, isn't too short, isn't in the least

histness is becoming the main indus-ity of the valley. The population of Teton valley is estimated at 3,000. There are eight school districts, each having an aver-age attendance of fifty pupils. Here are also six ward organizations estab-lished. The Y, M, and Y, L, M, I, A, of this place hold conjunct see along each f this place hold conjoint sessions each unday evening, and have very interesting programs. Conference of the M. I. A. of Teton vailey will be held on Jan. 20 at this place at 2 o'clock in the afternoon, and 7 in the evening An interesting time abong the young folks is expected.

This place is pushing right ahead. The Con. I. Company have through their egent, Mr. H. L. Cannon, decided o make this point their headquarters or implements and machine extras fo this valley, and Mr. Cannon is build ing n 20 by 40 square front frame and will put in a complete stock soon as building can be finished. Mr. Hillman, formerly of Pleasant Grove, Utah, has commenced work on his hotel building. commenced work on his hotel building. Two new dwellings were just finlshed this winter, and several lots have been sold lately for residence and business. The Driggs postoffice is the distributing office for three other offices, namely Alta, Wyo., Bates, Idaho, and Darby, Idaho. This goes to show that we are centrally located, and all business will naturally come here. Taking eve-rything into consideration, inside of a year or so we expect to have a little year or so we expect to have a little city in a large valley. There are still inducements for home

vaccinated or properly 'immuned' from smallpox, thereby depriving our chil-dren of the benefit of the public schools. "We further state to your honorable body that the disease commonly called seekers; there is much land unoccupied and several large desert tracts for sale cheap. There is room yet in the Teton valley for thousands of set-tiers, in a land of abundant water, tim-ber and feed. We are located some 300 miles north of Salt Lake, and 40 miles smallpox, that is prevailing in our midst, has been of a very mild form, resulting in but very little sickness and no deaths , and the said disease having ow almost disappeared, we therefore deem the recent action taken by the State and local boards of health as befrom St. Anthony, the nearest rail ing unwarranted and without sufficient. road point.

Mr. Wm. W. Taylor of Forest Dale was here looking after his sheep inter-est; he is feeding 1,800 head. He has also a large heard on the desert near American Falls, Idabo, Mrs. H. L. Cannon, will go to Salt Lake in a few days. Mrs. Cannon intends putting in a complete stock of millinary in the spring, and she goes to Zion to learn the new styles prepara-

LAYTON, ARIZONA.

Organization of a Branch of the

Church at Lebanon.

A "liquid bronze" that is free from metal is thus made by a German chem-ist: In 100 parts of alcohol dissolve by gentle heat 10 parts of aniline red and 5 of aniline purple; then add 5 parts of benozic acid, and boil 5 or 10 minutes. This is exceptibly adapted for bronzing Layton, Graham Co., Arizona, Jan. 14. -A branch of the Layton ward was or-ganized in the St. Joseph Stake of Zion yesterday. In the midst of the desert the last few months water has flown wood or paper. out of the earth and the dry places made to blossom as the rose. The new was organized in the flowing well district, and was named "Leba-non," as found in Isalah 35, and Deut, 1 Within a few months land has been located, wells driven, crops planted, or-chards set out, houses built, and a school district established, and yester-day Elders Andrew Kimball, Chas. M. Layton of the Stake Presidency, acc panied by Joseph G. Alired of the High Council, and Bishop J. R. Welker of Layton ward, visited this favored dis-triet and gave them a branch organization with a Sunday school. Thomas G. Alger was set apart as presiding Elder, and Henry U. Russell was called to preside over the Sunday school.

concluded that photographic effects s concluded that photographic effects nay sometimes result from molecular of obysical change, although chemical ac-ion probably plays a part in the presence of moisture or any oxidizing conditions.

The ordinary understanding of color lindness is incomplete. Besides blindtess for colors, it is pointed out, there may be a short-sightedness and a weak ight for them, the colors to some evi inishing when still quite near, while to hers there is only a dim perception of Dr. Herbert Seager has mention d another form of color blindness, his, the vision is normal by day, there may beeven farsightedness, while at night colors can be distinguished at only a very short distance.

Sighing is explained by Prof. Lumdsden as an effort to get oxygen. In moments of worry or depression, respiration is greatly reduced, until the need of the lungs causes a deep inhalation ollowed by the exhalation that we term a slight

Blast furnace tests have proven that the coke required to produce a ton of iron is from 200 to 300 pounds greater when the air is charged with moisture than when it is dry.

A study of the flow of racks under uneven pressure has been begin by Messrs. F. D. Adams and J. T. Nicolson, English physicists. Their first experiments were trade with pure Carrara marble, of which polished columns an inch in di-ameter and an inch and a half in jength were placed in a wrought iron tube, the ends of which were left free, and press-ures up to 12,000 atmospheres were exures up to 12,000 atmospheres were ex-erted by means of an accurately fitting steel plug. Dry marble was compressed at ordinary temperature, at 200 degrees C, and at 400 degrees C.: and the moist marble at 200 degrees C. The time of experiment varied between 10 minutes and 64 days. Under all these conditions, the marble was permantly deformed, its flow being like that of metals and in some respects like that metals and in some respects like that of glaciers. The color was changed to dend white, the strength being weaken d more or less according to the time re ed more or less according to the time re-quired for the change. At ordinary tempertures the deformation was due in part to granular movement, and in part to twinning and gliding in single crystals comprising the rock; but at elevated temperatures only the twinning and glid. ing took place. The presence of water had no apparent effect.

and it was concluded that the magnetic pole had shifted much to the north and

cause, we therefore petition your honor-able body to take such action by proper egislation as will secure us against compulsory vaccination. 'And we further petition your honorable body to do away with the State board of health as at present constituted, and leave matters of public health in the hands of local hoards of health; also to more particularly tory to putting in stock fine the duties of local boards of health A committee of ten persons was appointed by the chairman to act in con-nection with the above committee to ter and spring. canvass the town to get signatures to the foregoing petition.

There are fully 90 per cent of the people of this place bitterly opposed to compulsory vaccination, and they

are waiting eagerly for the Legislature to act on this question, Special Correspondence,

flowers from red to blue on applying alum, etc, to the roots of the plants has een long known; but it has remained late systematic Minyoshi, a Japanese botanist, to open up remarkable new possibilities of coloration by the florist. This experi-menter prepared watery extracts of seventy-three different flowers of lilac, purple and red colors, and of a number red leaves, treating these solutions in turn with acids, alkalles and salts. What seemed to be the same coloring natter in different solutions gave greatvarying results. In most cases, alum turned filac to blue, pink or deeper lilac hydrochloric acid changed lilac or pair ed into deeper red, seldom producing liac, green or brown; and causic potash hanged lilac into green or, son llow. In practice these color trans-mations should follow the application of the chemicals to the plant roots A speck of land in the Indian Ocean separated from Java by 200 miles of sea reaching a depth of 3000 fathoms, is one of the most interesting spots on earth to the naturalist, for it has an isolated fauna and flora not yet changed by man, It is known as Christmas Island. In his recent exploration, Mr. C. W. An-drews, of the British Museum, found the island to consist of a variety of tertirecent limestones ary and sensons rocks, and to be able to claim about 10 per cent of its plants and 45 pe cent of its animals as peculiar to itself. In all, 319 animal species were enumer-ated. They include 31 species of birds, 5 of mammals and 6 of reptiles, not less than 16 species in these groups being unknown elsewhere. "Molten wood" is the name given the new product of M. De Gall, inspector of forest at Lemur, France. Wood is heated under great pressure, the gases developed being prevented from escap ing. On cooling, the mass becomes coal, like in appearance and very hard, but it can be shaped and pollished. It is im-pervious to water and acids, and a perfeet non-conductor of electricity.

Peter Streble of this city, a native of Germany, was admitted to citizenship. DEATH OF MRS. JORGENSEN.

Mrs. Anna Jorgensen, wife of Mada Jorgensen, of Lake View, died yester-day. The deceased was about 75 years of age, and leaves a husband and many descendants and friends to mourn her departure. She came to Utah from her netive country. departure. She came to Utah from her hative country. Denmark, in the early sixtles, and has, since that time, lived in Provo and Lake View. The funeral will be held Monday at 11 o'clock from the Lake View Hall.

AFTER CANADIAN LANDS.

Jesse Knight and his two sons, Ray-mond and J. William Knight, expect to leave for Alberta, Canada, in a few days for the purpose of examining range lands there. If they are suited they intend to buy several thousand

acres and go into the cattle business on a large scale. LEHI.

to force the order.

compulsory vaccination mass meeting was held in the Lehi tabernacle yester. day afternoon at 2 o'clock for the purpose of discussing the late action of the State and local boards of health in closing the district schools against all unvaccinated children or those who are not immune from smallpox. There were about 300 citizens present. A. M. Davis was elected chairman and W. L. Webb secretary. The first business done was to elect a committee of five to draft a petition to the Legislature asking them to enact suitable laws against compulsory vaccination and to curtail the powers of the State board of health. The committee as elected were as fol-lows: John Woodhouse, Elisha H. Davis, George Webb, Arthur Bradder and J. E. Ross, While the committee were at work on the petition the meeting was thrown open for discussion and re-marks were made by a number of citi-

marks were made by a number of the zens denunciatory of compulsory vac-cination; some of the speakers cited cases where serious results had foi-lowed vaccination. Mr. Prime Evans, attorney of Lehl, stated that the local DRIGGS, IDAHO. board of health had considered the question well before taking the action they did, having secured the best legal advice possible, and he further stated that the other secures the secure stated

that the only recourse they had was - The Sheep Industry.

> Driggs, Teton Valley, Idaho, Jan. 14 -Sleighing has been good since Dec. lst: the snow at present is one foot deep and in the mountains it is piled up

OASIS.

Special Correspondence. Oasis, Utah, Jan. 15.-Several citizens from this part of Millard county are attending the National Live Stock conention in the capital.

This ward has been fortunate in escaping the visit of smallpox although the neighboring wards of Deseret, Hinkley and Abraham have each been isited by the disease. We are pleased o state, however, that no cases now to state, exist in the fast named places.

The present beautiful weather causes many to remark that we are to have a repetition of last summer's drouth. It is to be hoped that their fears shall prove groundless. The mountains now ntain more snow than was found in them at any time last year and with ten weeks yet to come that often witness deep falls of snow, let not the ambitious farmer become impatient nor doubt the liberal hand of rovidence. "All is well that ends

SANTAQUIN.

Does Not Believe in Vaccination Must We Submit to Compulsion?

To the Editor: Santaquin, Utah Co., Jan. 16 .-- Dear Sir: I have been watching the vaccha-tion question for over a year pretty closely from the fact that my opinion was, many years ago, that vaccination was just a humbug and I am perfectly satisfied now that it is nothing else, and I wonder now if we as citizens shall be driven by a few doctors and lawyers to the slaughter yard like a flock of sheep. I am personally ac flock of sheep. I am personally ac-quainted with a oung man who had to be vaccinated over a year ago or else lose a job of work, and he became very Notice to

sick. I saw him three months after that, I asked him how he liked the vaccination, he told me if what he heard of smallpox was true, if he had to have specting Vaccination of School Children.

either of the two, that he would pre-fer to have smallpox a half a dozen times rather than vaccination once, and he was far from well then, and I know personally that he was a very healthy person from his childhood up; now is not that cruel? One of my sons was very sick a year ago of typhoid fever and was attended to I think by a good bysician for that elemens bur who

Lehi, Utah county, Jan. 18 .- An anti-

physician for that sickness, but who did not pretend to know anything about smallpox. For the purpose of consulta-tion he brought with him another docwho had tended successfully orty cases of smallpox, and this man told us that there was no smallpox at all in this case. But it was said afterwards by other prominent doctors that this man could not be relied upon because he was not a diplomaed doctor, but I think he knew more than all the rest in that case anyway, Two othe doctors had to visit us because o smallrox scare but more I think to get a chance to vaccinate. Now since ing statistics furnished by Mr. Miller and others and noticing the designs of boards of health I ask, shall we submit ourselves to such crueities as may be imposed by a compulsory vaccination I never had anything against strict sanitary regulations or isolation when necessary, but I have against vaccination. PETITION TO LEGISLATURE. Special Correspondence. The petition adopted at the meeting

The petition adopted at the meeting was as follows: "We, the people of Leh', in mass meeting assembled, being opposed to vaccination, and believing it not to be a sure preventive of smallpox, and be-lieving it to be an infringement on our rights and personal liberty, and also

SCIENTIFIC MISCELLANY.

Nature's photographic laboratory may yet have many undiscovered wonders. Continuing his researches with silver, Mai. Gen. J. Whitehouse has found that visible images are formed on exposing pure silver folls or silvered glass to sun-light in vacuum tubes, and that the action is apparently increased by watery vapor. Invisible, but developable, images were readily obtained, however, in exhausted tubes showing no signs of moisture. A curious effect upon glass has been also observed. A silvered glass plate upon whose unsilvered surface a ut out screen of aluminum had lain a month in sunlight was put aside for a fewdays in contect with the sliver. ed surface of another plece of polished silvered glass, when the latter was found to be impressed with an image of the design cut from the aluminum. The image was distinct and quite sharp. It

RBAIN AND BODY.

Debating societies have often discussed the topic of the relative ability of short men and tall men, but the Chi-cago board of education has gone into the subject in a very scientific manner It has examined all the school children on the following points: Height, height sitting, weight, strength of grip, hear-ing and acuity of vision. The conclusions thus far reached are that there i a physical basis of precocity, that dull children are lighter and precocious children heavier than the average child, and that mediocrity of mind is associated with medioerity of physique BURSTING BOMBS.

Some extraordinary experiments are described by M. E. Vidal in a French paper. When a thunderstorm is near paper. When a thunderstorm is near an artilleryman stationed in the field most threatened explodes a bomb to cal the attention of his colleagues in the neighborhood, who repeat the signal in ach of the stations, which are spread over the fields. Immediately afterware a regular bombardment is begut against the clouds by means of bomb that explode at a height of about 45 yards. Three bombs per minute ar said to be sufficient to prevent the for mation of halistones, but if the peril seems extra great the number and rapidity of the explosions are increased.
