ITS THEORY Is that all Food Bakerd or Gooked should be cooked in fresh all freely admidted to the coven. This is done by discarding the close oven door heretofore used, and substituting for it a door containing a sheet of Wire Ganze nearly as large as the door itself.

Through this Gauze Boor the air freely circulates, facilitating the process of cooking, and producing food that is macqualled in flavor and nutrillon, and actually cooked with less consumption of fue than in an oven with a closed door.

It makes ar enormous saving in the weight of mess.

It also produces larger Lonves of Bread, requires less attention from the cook, and promotes the health of the family by the superior quality.

OPINION OF AN EXPERT.

MRS. MARY B. WELCE, Teacher Domestic Economy, lows State University, says:
"My deliberate judgment is that the even of the Range, as compared with others, is not only more equally heated in every partront and rear—but as a result of its superior ventilation the food placed therein is better cooked, while retaining a sweeter flavor, and a larger proportion of its best juices. I find, also the consumption of fuel in this Hange is much less than any other for same work.
