

WANTON WASTE OF WEST'S RESOURCES

Speakers Place Before Trans-
Mississippi Congress Rec-
ords of Consumption.

ADDRESSED BY GOV. CUTLER.

Country's True Policy is to Use With
Economy and Prudence Our
Wonderful Resources.

San Francisco, Oct. 7.—Asserting the rights of unborn generations of Americans and censuring the policy that has squandered with prodigal recklessness the forests and lands, the waters and the minerals upon which the future prosperity of the west depends, half a score of speakers today placed before the delegates to the nineteenth trans-mississippi congress the records of consumption and waste established by the pioneers and their sons in the west and pointed the way to economic conservation and remedial legislation. Except for a brief period allowed for the in-which were passed, the entire day was devoted to addresses of this character, some improvised upon the call of President J. B. Case, but the majority constituting the regular program and showing by careful compilation of facts and figures, the time expended in their preparation.

MANY PROMINENT SPEAKERS.

The governor of one state, the attorney general of another, the president of a university and the traffic director of a great railway system succeeded one another upon the platform, and each, from his particular standpoint, paid his tribute to western America and its people and indicated some step onward—some short cut toward its ultimate destiny. The interest and earnestness of the largest attendance of any previous session of the congress was manifested throughout the extended series of addresses by an unflagging attention and discriminating outburst of applause.

The reception accorded the address of J. C. Stubbs, traffic director of the Harriman line, who arrived last night from Chicago to confer with the congress, the regrets of E. H. Harriman at his inability to attend and to assume the place on the program, reserved for today's deliberations. In the course of his remarks, Mr. Stubbs reviewed the intimate association existing between the extension of transportation facilities and the regions they reached from the wilderness. His clear-cut references to the Panama canal, to the merchant marine and to other subjects which the transmississippi congress has adopted as its own problems, impressed many of the delegates with the belief that the sentiments expressed were inspired by a sincere desire on the part of the transportation interests of the country to co-operate in the plans for western advancement.

Gov. Cutler of Utah also addressed the congress, speaking as follows:

GOV. CUTLER'S ADDRESS.

"I am proud to represent a state that can claim credit for a great deal of the growth of the transmississippi region. A pioneer in its settlement, Utah has been a leader in movements for its development. I recall with pleasure that Utah men have been prominent in this congress, and that I, P. F. Perry was its second president. I am sure you will agree with me that his work and that of two other presidents Utah has provided, Hon. George C. Cannon and Hon. John Henry Smith, a source of great pride to Utah people.

"I accepted with pleasure the invitation to address the congress on the conservation of resources, because I had seen the vast importance of the policy of preserving the natural wealth of the country for the benefit of our children. I feel that there is little need for me or for other men to justify or defend this policy of the government. Opposition to it is based on a lack of understanding or short sighted selfishness, and opposition based on these two principles usually descends to calling names, ap-

The foods we eat furnish energy for the body just as burning coal makes steam for an engine.

The experiments of Prof. Frankland, Ph. D., of London, show that cod liver oil yields two and one-half times more energy than starches or sweets.

Scott's Emulsion

is pure cod liver oil combined with hypophosphites of lime and soda. It forms fat, gives strength, enriches the blood, invigorates the nerves, and repairs tissues.

Send this advertisement, together with name of paper in which it appears, your address, five cents to cover postage, and we will send you a "Complete Handy Atlas of the World" : : SCOTT & BOWNE, 409 Pearl Street, New York

plying epithets or attacking with ridicule or misrepresentation the measures proposed and the men advocating them. "The true conservation policy is to use with economy and prudence the wonderful resources we possess. But we are to give those reserves, not only unimpaired and undiminished, but increased and improved, to our children, and to be so transmitted to coming generations. If, by inducing us to do this, it is tyranny let its opponents make the most of it. Anything less is downright injustice to unborn generations, and a tacit acknowledgment that we are not the advanced and civilized people we claim to be.

"Broadly, the resources we wish to conserve under the policy now contemplated are the soil, the water, the forests and the minerals. Every state is interested in each of these subjects in its own way. I shall say nothing of the nature and the extent of Utah's interest, my aim being to indicate cash plans briefly.

"We have not yet reached the point in Utah where conserving the soil interests us so much as getting more of it under cultivation. The scarcity of water is still keeping millions of acres in barren and unproductive, although rich in potential fertility. Therefore, to western America and its people and indicate some step onward—some short cut toward its ultimate destiny. The interest and earnestness of the largest attendance of any previous session of the congress was manifested throughout the extended series of addresses by an unflagging attention and discriminating outburst of applause.

"There is another plan for increasing the acreage of irrigated lands which deserves attention. The rapid fall of mountain torrents makes it possible to build two or three power plants on each of them. By long distance transmission of the electricity thus generated pumping plants situated on the shores of lakes or the banks of rivers that run below the arable soil can be operated and the water lifted up and poured on the land.

"The land lying along the foot of our mountain ranges is of immense value for orchards. By lifting the water up to this land it may be reclaimed from its barren state, or advanced from its status of grain land, with a yearly production of \$15 or \$20 an acre, to the dignity of fruit land, producing annually hundreds of dollars an acre.

"The subject of forest preservation is closely allied with that of the water. In Utah, as elsewhere, replenishing and controlling the streams must depend upon the forests.

"I think I am safe in saying that the main reason all our forests are not preserved is that very many of them are inaccessible. Until the strong hand of the federal government was laid on loggers and sawyers, they seemed to attach no sacredness to our timber. The devastating ax and saw and the still more destructive forest fire have laid bare thousands of acres of splendid timber lands in Utah.

"In view of the fact, however, that additional timber is needed not only for the sake of the water supply, but also for use, I am pleased to be able to say that the government has taken in hand the reforesting of our mountain sides. A planting station has been installed near Salt Lake City, with a capacity of about 2,000,000 trees a year. In a few years these trees will be doing their share in the way of water conservation; and in due course our grandchildren will be cutting them and calling down blessings on the heads of the men who are now doing this work of reforesting.

"Mineral conservation has been crowding on our attention for some time. The need of it is seen in the case of coal more than any other mineral. With the establishment of power plants on the mountain streams we cannot only run pumps, but we can electrify railroads now

operated with steam and run our machinery, smelters, mills, factories, and after a while our farm machinery, by electricity. Indeed, where water power is so cheap and of so easy access, it is not surprising that in Utah the use of electricity is rapidly supplanting the use of coal.

"The other minerals we are not endeavoring to conserve to any great extent. In fact, we are only too anxious to dig them out of the ground as rapidly as possible in order to pay good dividends on our mining stock. However, the recent discovery of a large foreign population who seek employment largely in mines and smelters has given rise to the question whether it is better to exhaust our mines so rapidly, and allow those people to send the money the mines produce to their old homes in Europe, or to employ Americans exclusively, even though the mineral is not extracted quite so rapidly. I think this might be a good subject for our deliberations here and elsewhere.

"If possible, you who pass through Utah on your way home should seize the opportunity to visit with us. It may be well worth your while. And although the mineral has gained some idea of conservation from my remarks today, I invite you to a closer inspection of it, and incidentally to the enjoyment of Utah's proverbial hospitality."

The third session of the second day was held this evening. Charles J. Blanchard, congressman for New York, and congressmen, and E. B. Thompson delivered an illustrated lecture upon reclamation work.

NEVER WORRY.
About a cough—there's no need of worry if you will treat it at its first appearance with Ballard's Horehound Syrup. It will loosen the cough at once and put your lungs and throat back into perfectly healthy condition. For sale by Z. C. M. I. Drug Store, 112-114 South Main St.

BOMB THROWER CONVICTED.

New York Court of General Sessions Sentences Him to Long Term.

New York, Oct. 8.—For the first time in many years, a man who has thrown a bomb has been convicted in general sessions court. He was at once sentenced to imprisonment for not less than nine years, nor more than ten, the latter being the maximum penalty. He is Salvatore Sillina, 22 years old, a barber.

At half-past 3 o'clock in the morning of Sept. 18, a bomb was exploded in a hallway in Prince street, forcing out the walls of that and the adjoining building. Several persons were asleep in the buildings, and there was much excitement but no one was injured. Sillina was arrested and charged with the crime.

The jury did not believe his story, denying that he had thrown the bomb.

CONVICTED CRIMINAL DEPORTED

San Francisco, Oct. 8.—Robert Souza, the son of a Chinese, was a wealthy manufacturer of Mazatlan, Mexico, was yesterday deported by the United States immigration authorities on the ground that he had been convicted of killing a man and he sold a sentence for that crime in Mexico. Although during his sojourn in this city Souza had become a favorite in social circles of the Chinese colony, he was recently arrested by Inspector Da la Torre and forced to admit that he was a convicted felon.

JOCKEY FREIT SUES AUGUST BELMONT FOR LIBEL

New York, Oct. 8.—August Belmont is defendant in a suit for \$100,000 damages for alleged libel which will come on in the supreme court today. The suit is brought by John H. Freitag, a jockey living in Jersey City, who sues through a guardian.

According to the complaint Freitag was apprenticed to Mr. Belmont for five years while he was 12 years old. He worked as an exercise boy for three years and was then discharged, as Mr. Belmont for family reasons, discontinued racing.

The boy says that his mother, Mrs. Freitag, then apprenticed him to Louis V. Bell, and that he worked a year for Bell. The following season Mr. Belmont, the papers say, put in a claim for Freitag's services. Freitag then threatened to "post" him and did "post" him in the ring. Freitag then threatened to "post" him and did "post" him in the ring. Freitag then threatened to "post" him and did "post" him in the ring.

WHERE IS I. G. GWYN?

Seattle, Wash., Oct. 8.—I. G. Gwyn of the Gwyn-Waggoner company of Vancouver, B. C., one of the best known men of the British Columbia city, disappeared from Seattle two weeks ago, and in spite of expert detective work by private agencies, has not been located. Gwyn had several thousand dollars in his possession when he left Seattle, and it is feared that he has met with foul play.

The Gwyn-Waggoner company has large connections of a financial nature in Canada and in New York and Chicago.

PRESIDENT WILL NOT GO ON THE STUMP

Washington, Oct. 7.—President Roosevelt told Senator Homer Cummings today that he did not consider it necessary for him to make speeches in support of Mr. Taft. The speeches in support had received numerous requests to go on the stump, but he had decided not to accede to them.

The president conferred on the political situation today with William L. Ward, national committeeman for New York, Senator Hemenway and D. W. Mulvane, Republican national committeeman for Kansas. Both Senator Hemenway and Mr. Mulvane told the president everything was favorable for Taft in their states.

Mr. Ward announced that Seelye Root will deliver an address in New York on Oct. 31, and that he is trying to induce the secretary to make other speeches in favor of the Republican ticket.

ANDREW SCHENCK,

President of the Germania Fire Insurance Co. Cough Remedy.

I have used Chamberlain's Cough Remedy in my family for over a year, and can say that it has cured every cold and the most stubborn cough I could find. I can recommend it to any family as a sure and safe children's cough remedy. Andrew Schenck, Astoria, Ore. This remedy is for sale by all druggists.

COFFEE

THIRTEEN ARE KILLED IN ELEVATOR ACCIDENT

Richford, Vt., Oct. 7.—With a concussion which shook the entire village, a large grain elevator, having a capacity of 500,000 bushels, exploded today, causing the death of 13 workmen and two women. The explosion blew off the entire roof of the building, scattering timbers in all directions, and instantly flames burst out. Mrs. John Jello, who was walking near the elevator, was burned to death. The elevator was owned by the Pacific & Boston & Maine railroad, and was operated by the Quaker Oats company of Chicago. The flames are supposed to have been started by spontaneous combustion. The elevator and its contents were destroyed, causing a loss of \$400,000.

ANIMALS FOR FOOD.

In Berlin Must be Slaughtered Under Strictest Surveillance.

Washington, Oct. 8.—All animals intended for food purposes in Berlin and Hamburg must be slaughtered in abattoirs under the strictest police and veterinary surveillance, reports Consul Gen. A. W. Thacker. He says that only the most humane methods of killing the animals are permitted to be used and the utmost attention must be paid to cleanliness and to the prevention of infection. The Berlin abattoirs cost \$4,500,000 and cover 115 acres.

In the railway station for cattle trains 45 cars each may be loaded and unloaded simultaneously. The department for infection and disease and the veterinary tracks, stalls, and slaughter houses, animals being brought from districts where the diseases are prevalent or from suspected cattle yards. Consul Norton in a report from Chemnitz states that Saxony alone of all states comprising the German empire totally forbids the slaughtering of animals for food by methods which involve the drawing of blood without previously rendering the animal unconscious.

WHY COLDS ARE DANGEROUS.

Because you have contracted ordinary colds and coughs, and without treatment of any kind, do not for a moment imagine that colds are not dangerous. Everyone knows that pneumonia and chronic catarrh have their origin in a common cold. Consumption is not caused by a cold but the cold prepares the system for the reception and development of the germs that would not otherwise have been able to infect. It is the same with all infectious diseases. Diphtheria, scarlet fever, measles and whooping cough are more likely to be contracted when the child has a cold. You will see from this that more real danger lurks in a cold than in any other of the common ailments. The easiest and quickest way to cure a cold is to take Chamberlain's Cough Remedy. The many remarkable cures effected by this preparation have made it a staple article of trade over a large part of the world. For sale by all druggists.

TWENTY-FIVE MEN DROWNED ON GRAND BANKS

St. Pierre, Miq., Oct. 7.—Twenty-five men were drowned as the result of the foundering of the French fishing schooner Juanita on the Grand Banks last week. The sole survivor, the captain, who managed to cling to some planks for several hours was brought here today. He has lost his leg. The disaster occurred during a heavy gale.

HAD A CLOSE CALL.

Mrs. Ada L. Croom, the widely known proprietor of the Croom Hotel, Vaigin, Miss., says: "For several months I suffered with a severe cough, and consumption seemed to have its grip on me, when a friend recommended Dr. King's New Discovery. I began taking it, and three bottles affected a complete cure." The fame of this life saving cough and cold remedy, and lung and throat healer is world wide. Sold at Z. C. M. I. drug store, 112-114 Main St. 50c and \$1.00. Trial bottle free.

TAFT OR BRYAN.

Handsome large pictures of both candidates on sale by the Deseret News. Call and see them. Only 10c to "News" subscribers. To all others 25c.

Fatigued people should try "Pleur de Lis" dainties, a new line of delicious home made chocolates now in the market. 75 cents per pound, the cents half pound. To be had at Williams-Horne Drug store, Smith Drug Co., Halliday Drug, Brigham Street Pharmacy, Jeff's "Smoke House" and the Rialto Clear store.

Pioneer Rubber Sanded Roofing

The Roof that "proves," sun-proof and rain-proof; needs no paint or repairs. Following are a few "Won'ts" about Rubber Sanded Roofing:

Won't chip. Won't warp.
Won't tear. Won't crack.
Won't rust. Won't decay.
Won't shrink.
Won't need repainting.
Won't absorb moisture.
Won't attract electricity.
Won't need any paint to preserve it.
Won't be affected by any climatic changes or conditions.
Won't cost as much, in the long run, as other roofing.

What Rubber Sanded WILL do is told of in our booklet "ROOF TALK," which will be sent free upon request, together with samples of the Roofing itself.

HIGH SCHOOLS.

Head of Chicago Normal School Favors Co-education.

Chicago, Oct. 8.—Mrs. Ella Flagg Young, principal of the Chicago normal school, does not agree with psychologists who maintain that woman's mental processes differ from those of a man. "Much of our educational system is based on a false idea," said Mrs. Young yesterday at a meeting of the educational department of the Chicago Woman's club. "If I understand the situation, there is no such thing as sex in mind. When you fail to recognize this fact and leave woman clear and fair in her position in the community, you are being misled."

Mrs. Young's venture into the field of feminine psychology was a part of an impromptu debate with Miss Jane Addams of Hull House on the subject

of segregation of high school pupils. Miss Addams had entered a vigorous plea for the establishment of high schools for the training of girls in the distinctly feminine industrial occupations.

"I don't agree with Miss Addams on separate high schools for boys and girls," said Mrs. Young. "I am a decided co-educationalist. I am sure, although there is a great tendency in the other direction all over the country, that boys and girls are educated better together."

MONTANA PIONEER DEAD.

Butte, Mont., Oct. 7.—A special to the Miner from Helena says: J. M. Smith, one of the pioneer residents of Meagher county, and one of the best known stock masters in the state, died yesterday at Battle Creek, Mich., according to word received here today. He was 75 years old. Before following ranching, Mr. Smith mined at Diamond City.
