important to Wool Growers!

I take pleasure in announcing that I am making a pure "TO-BACCO SHEEP DIP" from the best Kentucky Leaf, which makes an article of uniform strength and purity, without the addition of poisonous substances, and should be diluted 100 parts to one (although safe to NUSCANADENSIS use at any degree of strength) for dipping sheep.

This dip is convenient for use, as it only requires water to dilute it. As tobacco is so well known to wool growers who have used the same, I can only add that I have it in this convenient form for them-put up in one and five gallon tin packages, sealed tightly.
