#### CANADIAN STATEMENT.

The statement of Messrs, Jette and orth, the Canadian commission ers, regarding the award is as follows The decision of the Alaskan bound-aty tribunal has been given and in view of its character the people of Canada are, in our judgment, entitled to such explanation from us as will enable them to comprehend fully the manner in which their interests have manner in which been dealt with. Leen dealt with. We take up t points of the decision in the order which they are presented under t We take th th treaty under which the tribunal was constituted:

## PORTLAND CANAL.

First-The Portland canal. There are o channels parallel with each other, th four islands between them. The Canadian contention was that the northern channel should be adopted. The United States contended for the southern channel. On the result of the decision depended the possession of the four islands. Kanaghunut, Sitkian, Tales and Pearse. When the tribunal onsidered this question, the view of he three British commissioners was but the Canadian contention was absolutely unanswerable. A memorandum prepared and read to the commis-ners, embodying our views and wing it to be beyond dispute that Canadian contention in this branch the case should prevail, and that the indary should run to the northward the four islands, thus giving them lanada. Notwithstanding these facts members of the tribunal, other than arselves, have now signed an award lying two of the islands, Kanaghunut ad Sitklan, to the United States. These two Islands are the outermost of the four. They command the entrance of the Portland canal and the ocean pas-sage to Port Simpson. Their loss wholy destroys the strategic value to Canada of the Wales and Portlands of the Wales and Pearse islands. There is in our opinion, no process of reason-ing whereby the line thus decided upon by the tribunal can be justified. It was never suggested by the counsel in the course of argument of such a line was possible. Either the four islands belong to Canada or belong to the United States. In the award Lord Alverstone agrees with the United States commissioners that the islands should be divided, giving the two which possess strategic value to the States, United

Manager Campbell of the Utah Light & Power company has organized a larap department which will give special attention to the maintenace of lamps throughout the city, and he wishes that all patrons who are at all troubled with their lamp service would notify his office without delay. It has been found that a prolific gource of complaint is partially burned out lamps. It is anything but economical for con-sumers to use a lamp after it has been burned so that the interior of the bulb burned so that the interior of the bulk has become dimmed. This is due to the separation of minute particles of plati-num from the wire within the bulk which dim the glass, reduce the ca-pacity of the wire, and result in the consupration of more fluid than a new and full sized wire would recuire. The lamp department will send a man to examine lamps on any premises that may be desired where the service is unsatisfactory, and make such changes and give such instruction as to care and maintenance as may be required.
