DESERET EVENING NEWS: SATURDAY, MAY 19, 1900.

MRS. M'CUNE'S ART LECTURE.

A Most Excellent Paper on Silk Culture.

INTEREST IS AWAKENED.

rab Might Manufacture as Superb a fabricas is Made Anywhere-A Collection of Beautiful Silks.

The series of art lectures terminated is swaing with Mrs. A. W. McCune's miles paper on the silk and lace inor in Dials. The university lecthe fall was well filled by an attracse audience. The lecture was introered by a series of stereopticon views, miling the latest work in art, both month and painting. Levi G. Richards abed the views in a most interest-Ar manner,

esthusiasm of Mrs. McCune's naan specially on the subject of slik nists entered into her lecture. She s had a number of varieties of slik on she purchased in Europe, and stiention to the fuster displayed he Franch sliks. She contended that could manufacture a fabric of as superb, and urged the ladies at to become intersated in the inary, and take it up at once. In McCuno's paper was as follows:

e profitable employment of the is a subject which demands the ion of the day. Tonight I wish upe the morits of sericulture as a is of labor sulted to the youth of

four thousands years silk culture en known to mankind. It was no that the process of silk makas first discovered. Appreciating regith contained in this great art, regith contained in this great art, regith contained in this great art, is any who druge the secret of its man-are to other nations. The Chiarrelly kept the secret for two and years. In 555 A, D., the Roemperor, Justinian, succeeded in fig some silk worm eggs from two n monks, who had brought them stantinople conceased in their r. From this time the art of sing fourished in Europe.

tells us that wherever serihas been largely engaged in non has become rich. The wealth an is due largely to her silk in-France is today the largest duing country in the world. are is the greatest factor in dih and is one of the influences made France a center of art. and of the Franco-Prussian a was forced to pay a large inin the fact that the strength of t was wanted in wars, had not thers and daughters come to the

www.woman, high and low, rich and wally and with a noble purpose, making of silk. In the spring e the silk in winter hours tions came to buy the beauti-acts of their labors and the s debt was soon paid. France gained the wealth she had high innumerable wars, but doped the industry which has nce maintained her national And to this day it is the in France for even women and wealth to make silk for n gowns. inquire, has been the this vastly important in-our own country? Thousands have been expended in Amerestablishment of the silk More has been expended in d Sintes in the effort to find a for slik than would be neces stablish the slik industry in corgia an attempt was made as sericulture but it failed.

GOVERNOR M'CORD

Hon, M. H. McCord.

Hon, Myran H. McCord, Ex-Governor of New Mexico, in a letter to Dr. Hartman, from Washington, D. C., says;

Dear Sir-At the suggestion of a friend I was advised to use Pe-rn-na for catarrh, and after using one bottle I began to feel better in every way. It helped me in many respects. I was troubled with colds, coughs, sore throat, etc., but as soon as I had taken your medicine I began to improve and soon got well. I take pleasure in recommending your great remedy to all who are afflicted with catarrh,-M. H. McCord.

The spring presents a much more favorable opportunity for the permanent cure of chronic catarrh, especially old, stubborn cases. Now is the time to begin treatment. Insist upon having Pe-ru-na. There are no successful substitutes for this remedy. Send to Dr. Hartman, Columbus, Ohio, for a free catarrh book.

of industrial activity. Today is the time to begin. Apply to the silk worn commission, Margaret A. Caine, secre-

get free of cosi, together with any in-formation that you may ask for. The leaves on the mulberry trees are now

ready for use. There are many trees in Salt Lake that can be used. Inform

the owners of mulberry trees that plucking leaves three or four times will improve the trees, then they will not object to allow you the use of their

leaves. If you are wise you will not begin with too many eggs. Take just a few, and gain experience the first year. Six

weeks is all the time required from eggs to cocoons. The worms require

nothing but mulberry leaves, and that

they be kept in an airy, wholesole, clean room. It is best to have a room emptied of carpets, curtains and furni-ture, so that it may be kept perfectly free from dust or disease germs.

tary, for silk worm eggs, which you

wages were small for nursing, but that bey made many yards of real lace at dd moments, for which they received

odd moments, for which they received handsome prices. If we do not make lace to sell, we can make it for our own use, It would be so much more artistic and better than that which we now import. If our institute, which has been established for the benefit of the masses of the people to aid them in opening up lines of artistic work, could start a move-ment among the women in favor of hand lace-making, we could organize hand lace-making, we could organize classes for teaching this art. Why could we not ultimately supply the de-mands of large citles of the United States for real lace, instead of allow-

ing them to import these luxuries from Europe?

Every person who raises slik might Every person who raises glik might very profitably make slik lace, and there is always a demand for these hand-made faces. At present his insti-tute is making arrangements for a course in drawing under its supervis-ion, employing some of the best art teachers in the state. It will open June 1, and close July 1. Tuition is placed at the nominal cost of \$5 per pupil. It is designed especially for teachers. Work guitable for use in the public schools will be given.

chools will be given. If we can get the teachers of the State under our direction for even a few weeks for studio work, the good will immediately reach the masses through the public schools, and thus satisfy our great alm

Next fall we hope to open a class in lace-making. All who desire to take up this artistic work will please communi-cate with me or Mrs. Horne. Letters will reach me if addressed, Mrs. A. W McCune, Salt Lake City. In conclusion, let me say that the Art

Institute needs your co-operation in its work, fostering industries along the art line. Utah is young. It lacks the en-vironment of the world's art centers which gives the youth an inborn taste for artistic pursuits. The future great-ness of our State depends upon the bonor, the intellect and the taste, cul-ture and wealth of its citizens. Those who are truly patriotic will strain every nerve to raise the poonle

strain every nerve to raise the people by helping to provide for them elevat-ing employment, and thus will be given a new impetus to the human desire for higher, nobler living,

TELEGRAPHS AND CABLES.

Government Connecting All the Philippine Islands by Wire,

There are Now 160 Telegraph and 150 Telephone Stations and 2,500 Miles of Wire.

Washington, May 19 - A new progress map of signal corps telegraph lines and cables in the Philippines, just prepared under the direction of Gen. Greeley, is of especial interest at this time. It showns not only the system as it existed on March 21st, but also projected military telegraph lines and cables now

The from dust or disease germs. Induce the small children of the fam-ily to lend a helping hand in gathering leaves. They will be sure to become in-terested in the life and use of the worms. If this State is to become a great slik producing colony, the chil-dren must grow up in a knowledge of the details of the industry. Further-more I hope the day is not far distant in process of construction. Telegraphic communication between Manila and the south has been entirely dependent upon the English cable to the Visayan Island of Panay, Negros and Cebu. This cable, which was broken by an earthquake on April 14th, has not yet been repaired, and the long more, I hope the day is not far distant when the science of scriculture will be taught in every school in Utah. Much more beneficial in its practical Interruption emphasizes the great mili-tary importance of the alternate teleresults would be a course in scientific work in sericulture than are many of graph line to the southern islands from Manila, which is now being constructed the courses now devoted to promiscu-ous subjects that have no bearing on by the signal corps. The system rec-ommended by Gen. MacArthur has been fully approved by Secretary Root and will be pushed to rapid completion. A single cable has already been laid for the Cebu to Leyte and is being extended eastward to Samar and northward to Luzon via the island of Masbate. The military scheme is to have long stretches of cable, supplemented by as short land line as possible so as to en-sure the greatest possible freedom from hostile interference with commu-nications. The military telegraphic system to Cebu, via Samar, as soon as the English cable is repaired will afford Gen. MacArthur two routes by which to reach garrisoned posts in the department of the Visayas. The ex-tension southward looks to the connection by cables of the very important islands of Cebu, Leyte and Mindanao. The latter island will be reached by a combined system of land lines and cables, via cable from Negros, and thus all garrisons on this great Island will be in speedy communication. Ulti-mately, it is expected that Mindanao will be connected by cable via Zamboanga with Jolo and the latter with the Taul Taul group. It is expected that the entire Visayan group will be connected by military lines before July, and that the south-ern system of cables and land lines will be in operation by the end of the rainy The extent and magnitude of Season. the telegraph and cable operations of the signal corps in the Philippines is hardly realized or known. There are 160 first class telegraph offices, manned by nearly 200 skilled operators, who handle by telegraph on the island of Luzon alone about 300,000 words each day. In addition, there are about 150 long distance telephone stations in operations in various parts of the archipelago. The work of the signal corps, when completed, will stretch through nearly 14 degrees of latitude. Six signal corps cables are now in operation, and in all probability the cables and land lines which were nearly two thousand miles in length on March 31st, will aggregate at present 2,500 miles. While some branches are for strictly military purposes the most of these lines are permanent structures which will have a very important bearing in the development of the trade relations of the various islands.

New York," "Branch Hydrographic of-tice, Chicago," and so on, and Com-mander Todd'a friends insist that he was entirely correct in stating that no otters had been sent to "individuals, corporations, boards of trade or cham-

bers of commerce." Secretary Long decided to relieve Commander Todd as hydrographer pending a thorough consideration of the matter. The commander has the sip-port of the entire service in the course he has the supervision of the course he has pursued. Secretary Long has under consideration what further ac-tion, if any, shall be taken.

U. S. WILL NOT INTERFERE.

If the Boers Want Peace They Must i Apply to Great Britain.

New York, May 19.—The general con-clusion was reached at a cabinet meet-ing yesterday, according to the Washington correspondent of the Herald, to ad here to the former decision against in tervention unless mediation should be requested by both sides.

The London Standard, says a special o the Herald from London, commenting upon the result of the cabinet meet-ing at Washington says: "As a final hlow to the hopes of the enemy comes this news from Washington. If the Boers want peace they must sue for it from the imperial government."

Military Prisoner Shot.

San Francisco, May 18 .- A C. Bergum a military prisoner at the Presidio, was shot and instantly killed today while shot and metafly kined today while trying to make his escape with several other prisoners. The guards ordered the men to halt, but Bergum continued his run for a clump of woods and was just on the edge of the thicket when he was shot, one bullet passing through his hard end spotther through his lungs. hand and another through his lungs The dead man was a private of the Twentieth United States infantry and was serving a three years' sentence for sleeping at his post during service in Manila. The other prisoners were cap-

Beginning of the Reaction,

New York, May 18.-R. G. Dun & Co.'s Weekly Review of Trade tomor-row will say: "Business is not what it was a year ago, but men do not agree in defining the difference. The work-ing force, then increasing tast, is now decreasing. Works are stopping to re-lieve excessive optput in manufactures of paper, cotton, wool, leather and Heve excessive opput in manufactures of paper, cotton, wool, leather and some forms of steel, while prices are suddenly reduced for the same purpose in lead, wire and nails. What seems to some 'merely spring dullness' other think the 'beginning of reaction.' "The remedy for one difficulty does not fit the other and there is more need than usual for close attention to the meaning of events." meaning of events.'

IMMENSE WHEAT CROP.

That is the Present Outlook for Tooele Valley,

Hon, C. R. McBride of Tooele is spending a few days in the capital, on business. When seen this morning he spoke 'enthusiastically on the dry wheat outlook. At present it is most excellent. Said he:

"Conditions were never so promising for a big crop as this year. Thousands of acres of dry farm wheat stretch over the table lands under the Oquirrh range of mountains far down into the valley. Last year we raised about one hundred and fifty thousand bushels of this kind of wheat. This year the acre age is considerably greater and the out-look brighter, so it may be conserva-tively set down that we will have a crop of not less than two hundred thou-sand bushels this fall. The only bad feature about it is the exceedingly low noise of wheat At the present rate price of wheat. At the present rate there is, no money in it and I shall feed all of mine to stock. as better monetary results can be obtained that WBY!

MENT and MEDICINES FREE TO ALL BEGINNING A COURSE OF TREATMENT DURING MAY. Do not delay if you want a permanent cure. This offer will close June 1st and will not again be renewed or extended. NOW UNDERSTAND THE OFFER.

Every Patient Beginning a Course of Treatment during May with DRS. SHORES & SHORES, Salt Lake's Leading Specialists, will be given One Month's Medicines and Treatment Absolutely Free. Not One Cent to Pay for Examination, Consultation, Advice, Treatment or Medicines.

No one will be under any obligation to pay for the same. This offer is given by DRS. SHORES to overcome skepticism and to prove to the public of Salt Lake and Vicinity that there is a Permanent Cure for Deafness, Catarrh and all forms of Nervous and Chronic Diseases (that are curable).

This Offer is Not Given as a Test or Trial Treatment.

Drs. Shores & Shores' wonderful treatment that cures Deafness, Catarrh and Chronic Discusses when others fall is too well known all over the West to need any introduction. When Dis. Shores, first opened their offices in Satt Lake they gave every patient a course of treatment absolutely free AS A TEST OF THEIR SKILL AND METH-ODS, and thousands tested the new treatment FREE-NOW DRS. SHORES GIVE ONE MONTH'S MEDICINES AND TREATMENT FREE TO ALL BEGINNING A COURSE OF TREATMENT TO PROVE THEIR SKILL IN CURING PERMANENTLY.

DURING THE LAST SEVEN YEARS Drs. Shores have been curing the sick for a nominal cost, and always DURING THE LAST SEVEN YEARS DR. Shores have been county to see an a holding cost, and aways maintained low and uniform charges, not to exceed \$5-for a month's treatment and medicines, for all Catarrhal Chronic Diseases-these low rates are still maintained ONLY DRS. SHORES NOW GIVE ONE MONTH'S MEDI-CINE AND TREATMENT FREE TO ALL BEGINNING A COURSE OF TREATMENT AT ONCE. Don't be late. Start treatment at once. CONSULTATION FREE TO ALL.

J. M. HOWELL, 138 N. SEVENTH WEST STREET, CITY.

Mr. J. M. Howell, the well known mining man of this city, says: I have lived here thirty-two years and am generally known in the city. For fifteen years I have suffered terribly with my throat and stomach. I coughed con-For fifteen years I have suffered terribly with my throat and stomach. I coughed con-stantly, and for years could not get a night's rest. My stomach always troubled me, and all the medicines I took seemed like so much water, until I went to Drs. Shores. These Doctors took my case TWO WEEKS AGO, and in that time I have done wonderfully well; in fact, I almost consider my-self cured today, as all my trouble has left me and I can now sleep sound and rest well at night for the first time in years. They have helped me from the start, and I am positive of a full cure soon, if it has not already here accounting the start.

DANGER SIGNALS.

Aches and Pains are the Danger Signals That You Are Sick and Need Treatment.

Read the following symptoms over carefully, mark those you feel in your case, and send or bring them to Drs. Shores, and they will tell you whether you can be cured free of charge.

The Head and Throat.

This form of Catarrh is most common resulting from neglected colds-quickly cured with little cost by Drs. Shores' famous treatment.

"Is your nose stopped up?" "Does your nose discharge?" "Is the nose sore and tender?" "Is there pain in front of head?"

"Do you hawk to clear the throat?" "Is your throat dry in the morning?" "Do you sleep with your mouth

You can be easily cured now-don't let it run into complications.

The Bronchial Tubes.

When Catarrh of the head or throat is neglected or wrongfully treated, it extends down the windpipe into the bronchial tubes, and after awhile at-tacks the lungs. Quickly cured with little cost by Drs. Shores' famous treatment.

"Have you a cough?"

"Do you take cold easily?" "Have you pain in the side?" "Do you raise frothy materials?" "Do you spit up little cheesy lumps?" "Do you feel you are growing weak-

Don't risk neglecting these warnings -stop the disease before it reaches the

lungs

Of the Ears.

Catarrh extends from the throat along the eustachian tubes into the ers, causing partial or complete deaf-ness. Quickly cured with little cost by Drs. Shores' famous treatment. "Is your hearing falling?" "Do your ears discharge?" "Is the wax dry in your ears?" "Do you hear batter some days then

'Do you hear better some days than

others "Is your hearing worse when you have Don't neglect this until your hearing is irreparably destroyed. Drs. Shores can cure you.

the development of art or science in ou own community. How much better i would be for the girls throughout the State to find employment within the safe shelter of the home than to be obliged to seek it elsewhere. Let us take hold of this proposition and settle the industrial question for this army of noble sons and daughters of the fair State of Utah.

Let us supply other States, other na-lons with silk and its art products. When we have learned the art of silk-raising, we will all be able to make with but little work on our part, two ilk dress patterns yearly, one for our

own use, and one to sell. Would that I had power to arouse interest in this industry in every mind present. To once feel the pressing need f new avenues of labor is to be conof new avenues of labor is to be con-vinced of the benefits which would re-sult from a widespread movement to-ward this culture of silk. You will pardon me if I speak with feeling on this subject, but to me it seems so necessary for the women of Utah to promote that which will furnish home employment for the young girls.

LACE MAKING.

Closely allied to this is another subject to which I should like to call your attention. It is the art of lace-making. Most of the real laces worn in America come from abroad, when they should This branch of work be made at home. is greatly neglected by us, to our dis-advantage. We can raise both linen and silk for laces. Why should we not make laces? I was surprised, when in France, to see the industry of the women in this direction. There were ladles, nurses, peasantry, employing every moment of time from other duties making lace. And whenever I saw one of these

women, whether busily plying her needle on the car, or in the parks, while minding the children, or as peasant women on the market street, I envied them the ability to occupy every spare moment in working in the beautiful meshes of real laces. Much happier we could be if we had some of this lovely work in our own possession, to catch up while we sit and chat or rest. Most of us spend hours in chatting while

we might, at the same time, be making something beautiful and profitable as The nurses told me that their well.

AFTER THE BANQUET, Man Feels Well But It's Dif-

ferent in the Morning.

And Yet It's so Easy to Avoid the Dark Brown Taste, for Science Comes to the Rescue. A Magic Microbe-Killing Tablet.

Good feliowship does it. Tou eat too much and wash the good things down with too much drink. The good time ends in a muddled con-dition, and the stomach is worse muddled than the bead. Think of mixing up the various lots of food you eat at a dimner, from soup to nuts, in one receptacie, and adding half a dozen different kinds of drinks, alcoholio and otherwise. Stir the mixture up well and imagins what a sickening mess it would make. The that is what you do in your stomach, and your digestive apparatus chi't handle to the hoest. This formentation of undigested food with its evil consequences can be easily

Sours there. All this fermentation of undigested food with its evil consequences can be easily avoided. All that is pecessary is to take a tablet of Cascarets Candy Cathartic be-fore going to bed, and you'll feel all right in the morning. You don't need to forego the pleasures of jolly companionship if you will take this advice.

advice, It's what Cascarets do, not what we say they'll do, that proves their merit. All druggists, 10c, 25c or 50c, or mailed for price. Send for booklet and free sample. Address, Sterling Remedy Co., Chicago; Montreal, Can.; or New York.

This is the contraction of the only reaction Cascarets bears the magic letters "CCC." Look at the tablet before you buy, and heware of frauda, imitations and substitutes.

COMMANDER TODD RELIEVED. Preliminary Steps to Take Ocean

and Lake Survey from the Navy. New York, May 19.-A special to the Herald from Washington says: Secre-tary Long has relieved Commander C. C. Todd from duty as hydrographer of

the navy and placed him under suspen-This action is the direct result of efforts of the coast and geodetic survey, supported by Mr. Cannon and other representatives, to take the work of

cean and lake surveys from the navy. It is confidently expected by Com-mander Todd and his friends that when the facts received further consideration he will be restored to duty and proper steps taken to relieve his record of the

stigma now resting upon it. Commander Todd has been zealously laboring to keep the survey work under the navy, because he believes with his brother officers that the navy and the merchant marine can obtain better charts and be more efficiently served than if the coast and geodetic survey

had the work in charge. Arguments advanced by the navy un-Acutedly had much to do with the ac-tion of the Senate in restoring the pro-vision appropriating \$100,000 for carry-ing on the surveys under the navy. This ction was extremely distanteful to the oast and geodetic survey.

Representative Cannon wrote to Sec-retary Long asking him if the hydro-grapher had sent any letters to "indi-vidual corporations, pourds of trade or chanivers of commerce," In relation to the action of the House in connection with the ocean and lake surveys, Com-mander Todd responded that he had not,

This is the CASCARET tablet. Then Mr. Cannon asked for a copy of a letter sent the hydrygraphic offices. Commander Todd sent the communica-tion, but it was shown to be addressed

gnnnnnnnnnnnnnnnn POLITICAL POINTERS.

monument There is increasing activity among the politicians, and the indications are that the conventions this fall will be the liveliest ever held in Utan.

The Democrats may have four candidates in the field for the nomination of Governor. The supporters of G. W. Thatcher, J. H. Moyle and Aquila Nebeker are hard at work, and it is ru-mored today that C. C. Richards of Ogden may enter the race.

It is now believed that Judge Hiles will accept the nomination for Supreme judge on the Democratic ticket. The Republicans are considering Judge Mc-Carty, Judge Zane and Judge Bartch.

Under certain conditions of a geo graphical nature, L. R. Martineau, of Logan, will be a candidate for secretary of State against Hon. Fisher Harris and I. C. Thoreson,

For State treasurer the Democrats are discussing, among others, R. A. Deal, of Utah county, and Alma Greenwood, of Millard.

It seems to be conceded that Gover-nor Wells will be renominated for Governor, although it seems equally certain that he will have a contest.

Among Democrats, M. S. Murray, of Sanpete, is talked of for auditor.

Judge Bishop seems certain of a renomination for attorney general by the Republicans. J. W. N. Whitecotton, of Provo, and A. J. Webber, of Ogden, will be candidates before the Democratle convention.

The Democratic county convention

will develope some interesting contests.

QUIT WHITE BREAD,

Could not Get Strength from It.

An Episcopalian minister of Ellenville, N. Y., who is interested not only in the spiritual welfare of his congregation, but in their physical well-being al-"I can now do an immense EG. SEYS. amount of work and feel no fatigue, for the reason that I am using Grape-Nuts breakfast food and have quit coffee et tirely and am using Postum Food Cof-TRE

'Myself and family are all greatly improved in health. We have largely abandoned the use of white bread. Upwards of twenty-five persons have changed their diet, on my recom-mendation. It is gladly given, because I know, from personal experience, whereof I speak,"

It is a well-known fact that white bread is almost entirely composed of starch and and this is difficult of digestion by many people, particularly those who have weak intestional digestion. The result of the use of much white bread is a lack of brain and nervous power to do mental work and in also creates intestinal troubles because the excess of starch ferments in the intestines and makes the ditions right for the growth of mi-crobes; whereas Grape-Nuts breakfast food contains the needed starch, but in a predigested form. That is, it is trans-formed into grape sugar in the process of manufacture, and delivered in the packages, ready cooked, and in such shape that it is immediately assimi-latedw ithout hard work of the diges sistants have admirers who are latedw ithout hard work of the diges-

tive organs, The food also contains the delicate particles of phosphate of potash which, combined with albumen, is used by nacrats may choose from M. S. Woolley, George Whittaker, Nichol Hood, E. M. Weller, Max Beaver, O. P. Miller and ture to make the gray matter that must be in the cells of the brain and the William Horne. nerve centers throughout the body, in order to give strength and ability to stand long and continuous work.
