Communities and a second Mr. George E. Airis, the secretary of the Consolidated Dexter-Tuscarora nado mine, but the run was made to Mining company, returned this morning from a trip to the mine in Nevada. Mr. Airis said he had a very enjoyable trip and is very pleased over the outlook of the property.

TUSCARORA.

He says that the ore bodies in the mine are greater and the amount blocked out much larger than he dreamed that they were.

A full force of men are at work upon the property and the mill is turning out an ever increasing amount of bul-Hon each month. Mr. Airis is of the Non each month. Mr. Airis is of the opinion that the property will prove to be a regular bonanza and will again enter the field of the dividend payers. The company is entirely out of debt, has fully \$200,000 worth of machinery and buildings on the top of the ground and the holdings now amount to 300 acres of mining land in the very heart of the Tuscarora mining district. Mr. Airis was very much pleased at the standing of the stock of the consolidated company on the exchange. The stock company on the exchange. The stock of the consolidated company will be listed on the Boston exchange on January 1, 1901.

CLOSES STEADY.

A Good Volume of Business Done on the Exchange This Morning.

On the exchange today the market could just be characterized as steady. The only thing of a startling nature on the call was the dealing in Star Consolidated, which fell among the bears and was hauled down from the position it gained during the week and closed 6 cents below Friday's quotations, 200 shares being handed out at that price. Ajax was steady and was wanted at

short of 68 cents. Bullion-Beck was steady and was held at figures around steady and was heid at igures around \$4.50. Consolidated Mercur is proving to be very strong, and \$3.92 was bid without bringing out a share, offerings being made at no figure below the clos-ing, which was \$4.20. Daly-West still keeps climbing and registered sales at \$25.65 en above, that floura being the \$25.65 per share, that figure being the concluding one at which the stock was as wanted at \$5.40, but was held at \$5.56 and no sales was effected. Lower Mammoth was again one of the features of the call and sold at constantly increasing figures and at the close was wanted at 76%, a sale of 100 shares being sold at 77%, Rocco-Homestake following the declaration of its second dividend was strong and was freely bid for at 74% The remainder of the stocks remained the same nominally as vesterday's quotations, closing about as follows:
