

Idaho Springs, Colo., July 29 .- After a business meeting tonight 500 citizens of Idaho Springs went to the city jail and took 14 of the men arrested in con nection with the blowing up of the Sun and Moon mine building last night, marched them to the city limits and told them to leave the place and never return. The men driven out include Howard Tressidel, president of the lo cal union; A. D. Alcott, vice president; George Becker, secretary; Peter Bend. er, treasurer, and two or three members of the executive committee. All the others are prominent members of the Some of the men complained that they had no money and a purse was made up for them. Everything was done in an orderly manner and not a rough word or act was indulged in toward the men. At the meeting at which the action was determined upon, is said fully \$0 per cent of the city's business population was represented. It was presided over by F. D. Collom. city attorney, and addressed by Presi-dent Hauchett of the First National bank and others equally prominent. The other prisoners were taken to Georgetown, the county seat, this even-

#### Filipino Marderer Pardoned.

Washington, July 29.-President Receivelt has pardoned Emilio Villa-mor, a prominent Filipiac, who in De-cember, 1309, was sentenced to be haug-ed for murder. This sentence was after-ward to 10 per the provided to 10 per the proward commuted to 10 years' imprison-ment. Villamer was a member of an insurgent band operating in Luzon. They captured Marcelo Gadung, a native corporal of police, who, in addition to being a corporal, acted as a spy for the American navy, and this fact was generally known. On one occasion while within the enemy's lines, he was cap-tured, tried by court martial for being spy, convicted and shot. Villamor was an officer of the insurgent army, was an officer of the insurgent army, and was on the court martial that tried ano disposed of Gadung. It was for this that Vallamor was tried and sen-tenced. He has served a term of near-ly three years. His pardon was recom-mended by army officers and the secte-tary of war on the ground that Villa-mor's offense was really political, and that he was ertilled to a pardon under the presidential armesty proclamation of July 4, 1902. The president has ap-proved this recommendation.

The expectation of the public at large has been that serious trouble might develop at the trial and the session today almost fulfilled that expectation.

Davis is a man of very forceful, ag-gressive character and he resented the attitude of Andrews, who claimed that the dwindling of the fortune of the aged and unfortunate John Summer from \$110,000 and \$30,000 within a few months could be readily traced to the months could be readily traced to the avarice and unprofessional conduct of number of the attorneys engaged in defending and opposing his interests. Happily, however, no oppor-tunity was allowed for a breach of the peace, but the friends of both gentlemen are greatly concerned over the fu-ture. The case of Atty. erally approving of Lord Milner's suggestion, but stipulating for the assent of the whole white population in South Africa, and explaining that it could only be done with the consent of the Indian government, which insisted on

terms practically amounting to the re-moval of all restrictions upon immigra-tion and the settlement of Indian trad-ers in South Africa.

According to Mr. Chamberlain's state-ment in the house of commons last Monday, when he declared that as long as public sentiment was hostile to the proposition he would not attempt it, but that he believed opinion was changing, the question is still unsettled, probably owing to the reluctance of the South African people to remove the restrictions on Indian immigration.

Boston, June 30, 1903. To Whom It May Concern: At the invitation of The "FORCE" Food Com-pany, of Buffalo, I have visited their Mills and made a careful examination of the materials from which "FORCE" is prepared, and the processes which convert it into its finished condition. I found that "FORCE" consists exclusively of what my previous analysis indicated, viz.: Whole Wheat and Barley, with a flavoring of Table Sait, flaked, cooked and sterilized by 300 degrees of heat. A feature of the manufacture which impressed me considerably was the fact that the process is militrely mechanical, the lood being prepared, cooked and boxed by machinery, without ever coming in contact with the hands or clothing of the mill operatives. I was also gratified to note that an experienced Chemist dally supervised the entire output, and that cach day's manufacture was also tested by an expert cook. MILBUR L SCOVILLY cook.
