

BY TELEGRAPH.

WESTERN.

SALINAS CITY, 8.—It commenced raining this morning at 7 o'clock. Salinas river is rising fast. The banks on the Monterey side are washed away for the distance of a hundred feet. The telegraph poles and line are gone, and communication has been interrupted for the past five days. Strenuous exertions on the part of the company's officials are being made to repair the break. The span is nearly half a mile in length.

DEEP CREEK, UT., 8.—The Furber District is reported improving, almost every location prospected showing a fine quality of smelting ores. The Eureka mine, at the depth of forty feet, struck a body of ore nine feet thick. The weather has been very pleasant, and there has been no snow this winter to prevent working.

PORTLAND, OREGON, 8.—A mass meeting of the friends of woman suffrage in this State and in Washington Territory will be held on the 14th and 15th of this month. A permanent State society and auxiliary county societies are to be organized.

SAN FRANCISCO, 8.—A messenger arrived at Yreka from the front to-day. Gillen had assumed command of the troops there, and will establish a line of couriers between headquarters and Yreka. On Sunday Colonel Stone sent out for supplies of grain, sugar and coffee. The troops will remain on the defensive till the results of the labors of the Peace Commissioners are made known, and during that time they will consume all the surplus provisions in that section of country.

REDDING, CAL., 9.—The south-bound train, this morning, met with a serious accident, twenty miles south of here. The roads had caved and a washout in the track was not noticeable to the engineer, and when running at a speed not exceeding ten miles an hour, the locomotive jumped the track and was followed by the tender, turning over on its side in a ditch. The remainder of the train remained on the track, with the exception of the forward trucks and the express car. George Manthrop, the engineer, and his fireman were badly, but not seriously, injured, Manthrop receiving bad cuts about the head and both his legs broken. No one else was injured. The stages due yesterday were twenty-four hours behind time, delayed by high water.

ELKO, 9.—A heavy snow storm has been raging here all day. It is about seven inches deep. The weather is intensely cold.

STOCKTON, 9.—The water in the San Joaquin river is still rising. The fall of snow in the mountains is said to be very heavy.

SAN FRANCISCO, 9.—It was reported to-day that Jerry Goodlan, whose brother attacked young McCormick a few weeks since on one of the Bay view cars and was killed by him, met McCormick at the Patro, and that they shot and killed each other. An officer was sent out to the place who returned this evening, with the report that the parties met and exchanged several pistol shots without effect. McCormick, it will be recollected, was examined in the police court for the murder at the time of the other affray, and was discharged, as the proof showed that he acted in self-defense. He was then advised to beware of the surviving brother, but he took his place again on the same line, and was not molested till to-day.

EUROPEAN.

BERLIN.—The *Spencer Gazette* hopes the United States will annex the Sandwich Islands, but deprecates the acquisition of Cuba, because it would be difficult to Americanize an island where the climate, religion and manners are so different from those of the States. The incorporation of the Sandwich Islands with the American Republic, however, would be a benefit to civilization.

ST. PETERSBURG.—Apartments are preparing in the Winter palace for the Shah of Persia.

LONDON, 7.—John Torr, a Conservative candidate, has been elected a member of Parliament from Liverpool, by a majority of 1912 over J. Cairne, Liberal.

In the Commons yesterday, notice was given of the introduction of bills for the abolition of capital punishment, and looking to the establishment of a protectorate over the Feejee Islands, providing that all

treaties between Great Britain and foreign powers must receive the ratification of Parliament, legalizing marriage with a deceased wife's sister, and providing for the purchase of the English railways by the government.

In the House, to-day, the Geneva award was again the subject of discussion. Jacob Bright introduced a bill to remove electoral disabilities from women.

In the Lords, this evening, Earl Carnarvon enquired whether there was any convention with Spain by which the officers and crew of the steamer *Murillo* might be held to answer for the disaster to the emigrant ship *Northfleet*.

Lord Roseberry wished to know what had occurred to prevent the completion of the treaty with the United States, supplementary to the Treaty of Washington.

Earl Lauderdale expressed the opinion that no criminal proceedings would hold against the *Murillo's* officers if it could be shown that manslaughter had been committed. Granville coincided with the last speaker in the opinion as to the legal aspect of the *Murillo* case.

In reply to Roseberry, Granville stated that a treaty was now in process of negotiation with the United States, based upon a proposal, made by the American Government last year. The presidential election and other circumstances had delayed the prosecution of the negotiations until recently. The terms were once agreed to, but the American senate adjourned without ratifying them.

LONDON, 8.—At a meeting of West Country Highlanders at Glasgow, last night, the Marquis of Lorne delivered an address. Speaking of the number of Scotchmen who left their country during the past year, he said he looked upon the emigration movement with regret, especially when directed towards the United States. Scotland was able to support an immense population, laborers were scarce, and if the people emigrated he hoped they would go to the British Colonies.

A cotton mill near Oldham was badly damaged by fire to-day. One hundred persons were thrown out of employment.

BERNE, 8.—The Swiss Council of State has stopped the salaries, for three months, of all priests who read from their pulpits the unauthorized Papal Brief establishing a separate Bishopric for Geneva. The Conference of Basle has determined to create a grand Swiss bishopric of decedents from Rome.

MADRID, 8.—Five hundred Carlists, under Laballo, made an attack yesterday on Viladrate, but were repulsed by the garrison, which numbered only one hundred. The authorities announce that the insurrection at Saragossa is completely suppressed.

PESTH, 8.—Resolutions have been introduced into the Chamber of Deputies urgently demanding the expulsion of the Jesuits from Hungary.

VIENNA.—Count Andrássy has informed minister Jay that the government consents for an international congress to sit at Vienna pending the exposition to consider the best means of encouraging useful inventions and manufactures. After the close of the exhibition the congress will, in accordance with the desire of the president, negotiate on the subject.

PARIS, 9.—Lefevre Durville, a Senator under the empire and now one of the Directors of the Societe Industrielle, has been arrested for connection with an alleged fraud in financial transactions. Another director has fled from the city.

Three days' mails are due from England. The Northern Railroad is still blocked by snow. There have been no trains through since the storm began.

GENEVA, 9.—The grand council of the Canton of Geneva has decided against the complete separation of Church and State.

MADRID, 9.—There has been a heavy fall of snow here.

VIENNA, 9.—The Dowager Empress Caroline Augusta, widow of the Emperor Francis I., and grandmother of the reigning Emperor, died yesterday, aged 81.

LONDON.—A Paris letter says the truth about the objectionable play of Sardou is that it sought to attack the Republic of France by undertaking to show the odious morals of the people of this model American republic.

MADRID, 10.—Bands of Carlists have appeared in the province of Lede.

Special Notices.

PIMPLES and Brown Spots on the face, Eruptions, Blisters, Scrofulous Diseases, and all sores arising from impure blood, are cured by Dr. Pierce's Golden Medical Discovery. s1 2 w2 1

INDIGESTIBLE BREAD.—The reason why those baking powders in the market adulterated with Alum, Chalk, Earth, and other substances make bread and biscuits very indigestible, is because they harden the gluten of the wheat and render it less soluble. Now this is not the case with Dr. Price's Cream Baking Powder; its purity and perfect combination enable it to render all articles easy of digestion, besides preserving their natural taste. Those who have not should test them, as also his elegant Special Flavoring, so strong, so pure, so true. d67 1w s4 2 w2 1

ESTRAYS.
