The result was the publication of a notice today, on the bulletin board, re-served for faculty announcements, which provides that students over the age of 21 can act as their own guard-lans, if they so desire. It is as follows: "College students above the age of 21, who wish to be considered their own guardians, should notify the registrar to that effect unless they have already done so." The rule is generally construed as

necessary in order to allow a person over 21 years to enjoy the privileges of being legally of age. GOING IT ALONE.

the examination, consisting of ques-tions on Greek and mathematics. The results will not be known for some time, as the answers to the examina-tion must be forwarded to Dr. G. R. Parkin, at Washington, and be passed upon there. It is distinctly understood that the examination is qualifying, and not competitive, and that what is de-stred is that the applicant be able to pass the first examinations in Ox-ford for the degree of B. A. General disappointment is feit at the University that there should not be more applicants for the appointment. Until recently it was hoped that Mr. Carlson, the well known football player, would be a candidate, but as he is alming at nwas a profession, he de-cided not to try, bell-ving that the law course offered at Oxford would necessi-tate a further course in America to fit him for American practise. Employes of Neva Shipbuilding Works Walk Out.

St. Petersburg, Jan. 18.-Early today the employes of the Neva shipbuilding works decided to support the strikers of the Putiloff and Franco-Russian works. Subsequently 12,000 of the men of the Neva works informed their man-agers that they had gone out on a genral strike. The situation is regarded as threat-

ening. The strike at the Neva works involves the suspension of the con-struction of submarine boats of the Protector type, which was being car-ried out under the supervision of an American engineer, and also the work on two oceangoing vessels similar to those of the volunteer fleet, and several gunboats and torpedoboats, besides the preparation of war material urgently required for reval and military pur-poses. The completion of the gun-boats and torpedoboats had been or-dered within two months.

Large forces of military and police nave been sent to the works. It is feared that the men employed t the Obukhoff Steel works will join

h the movement, thus adding 20,000 to ranks of the strikers. Eight, thousand operatives of the Stieglitz cotton mills struck work today, demanding an eight hour day.
