MINING, BUSINESS AND STOCKS

DRILLING IN THE JUAB FIELD

Initial Rig in the Southern Oil District Ready for Operation.

SO COLONEL DUNN REPORTS

Juah Company Equipped to Go 2,000 Feet Depth-Junb Town Prospers.

Col. F. W. Dunn, manager of the Juab Oil company, has notified the local office of that corporation that the work of setting up the initial rig in that field is about completed and that he expects to begin drilling operations not later than Monday morning. There has been a good deal of enthusiasm aroused lately over the Juab region and a number of noted oil experts who have been there during the past

who have been there during the past few months have pronounced it an attractive field and that it is reasonably certain it will eventually develop into a field of considerable importance.

Prof. Crandall, who has been signally successful in locating the oil flows in southern California fields, was a recent visitor to Juab and he has expressed the opinion that energy displayed toward development in certain portions of the field will be abundantly rewarded and enters the prediction that the first oil bearing sands will be encountered on the Juab company's possessions at a depth of about 375 feet.

The rig just installed is one of the most complete that money can buy and lis capable of going to a depth of 2,000 feet.

Jush is prospering as a result of the activity in the oil district. A Salt Lake firm has purchased a location and will establish a lumber yard in the town of

ON MINING EXCHANGE.

Trading Has Been Fairly Good This Week-Today's Call.

The volume of business transacted or The volume of business transacted on the mining exchange has been fairly good this week; but the volume of sales shows only about one-third as well as during either of the two weeks of boom trading recently. Some of the stocks have sagged off considerably, but are dragging close to bottom. The week has seen a good death tom. The week has seen a good deal of activity displayed by Sloux Consoli-dated, Iron Blossom, and Mountain Lake, all showing shrinkages but displaying a stronger tendency again to-wards the end of today's call. Black Jack seems to be slated for another rise and the stock was in good demand today.

The unlisted sales reported today were: Silver King Coalition at \$3.80 and \$2.85; East Crown Point, at 4%; Mineral Flat, at 18; Uintah Treasure Hill, at 18½; Pioche Demilohn, 13½ and 14. The closing quotations and sales were:

BOSTON CONSOLIDATED.

Has One Million Pounds of Copper Storage.

While operations of the Boston Con solidated Copper Co. for the past few months have been disappointing, says an eastern financial paper, leading inan eastern financial paper, leading in-terests in the campany now say that the turn for the better has taken place. The operation of the porphyry mine should from now on produce a small profit and the profit should gradually increase as the work progresses. The company now has nearly 1,000,000 pounds of copper in stored concentrates yearly to ship.

eady to ship.

The task now is to complete the mill and to open the underground workings so as to supply the mill with the neces-sary amount of ore, and with each additional section supplied, results shou consequence, be proportionately bet-

Beginning this week the mill force week the increased and it is planned to have four additional sections in commission by Sept. I. It will require that time to get mining operations in shape to respond to the increased mill

The management is planning a new smelting contract whereby the company will not be penalized for the iron contents of the ore as at present. The concentrates are now averaging 14 to 18 per cent copper, 23½ to 26.4 per cent silica and 24.7 to 26.8 per cent iron. This is a good commercial product and is a considerable improvement, which is due in part to the production of ore from the Ben Hur No. 1 tunnel level. During the month of May there were shipped 218 carloads of sulphide ore containing 9.265 tons that produced 388,000 pounds of copper. There were shipped to the Garfield mill 319 carloads of porphyry ore from which were milled The management is planning a ne shipped to the Garfield mill 319 carloads of porphyry ore from which were milled 15,670 tons of porphyry yielding 1,440 tons of concentrates containing 369,000 pounds of copper. The average mill heads were 1.38 per cent copper. The average mill tails .435 per cent copper, the indicated extraction being 68.5 per cent

IRON KING IS **AGAIN ACTIVE**

Development Work Resumed on This Well Known Tintic Property.

SHIPMENTS OF PAST WEEK.

Much Work Going on in Eastern Por tion of District-At Big Hill.

Special Correspondence. Euroka, June 26 .- Work has again been resumed in the shaft with two shifts at the Iron King property located east of the Colorado and Beck Tunnel. The mine is equipped with a good hoisting plant, and the management says it is the purpose to sink the shaft, which is now down 160 feet, to 1.000 feet depth before running out for the ore. Development is being carried on under the direction of P. J. Donnelly, the superintendent of the Grand Central mine, and Nick Roberts is foreman at the preparty

man at the property.
"Uncle Jesse" Knight will land another group of Tintic mining claims, in fact the details for the transfer of the fact the details for the transfer of the Daisy Eastern company's ground to Mr. Knight have already been arranged. This property lies south of the Iron Blossom. Some time ago Mark Hopkins and associates of Salt Lake secured a bond and lease upon the claims of the group and organized the Daisy Eastern company. Part of the treasury stock was sold and some work done upon the ground.

Daisy Eastern company. Part of the treasury stock was sold and some work done upon the ground.

Mr. Hopkins was in Eureka this week gathering in the stock that had been sold here, giving them \$2 for every dollar that had been invested. It is said that as soon as the stock is recalled—and there is only a small amount issued—the bond and lease will be disposed of to Mr. Knight. The Daisy Eastern company will go out of business and a new company organized to take over the claims.

Shipped from the district this week were 64 carloads of ore and two carloads of concentrates. The properties contributing were as follows: Centennial Eureka, 39; Eureka Hill, 6; May Day, 6; Uncle Sam, 6; Carlsa, 1; Mammoth, 3; Grand Central, 3; Yankee Con., 2; May Day mill (concentrates), 2. The 150 ton shipment of the Mammoth mine was sent to the U. S. smelter while the three cars sent out by the Grand Central went to the American smelter. The Grand Central lot consisted of copper ore that had been mined for several months; it being in the way at the mine arrangements were made to dispose of it. No more the way at the mine arrangements were made to dispose of it. No more ore will be sent out from the mine un-til the new Tintic smelter is ready to

receive it.

P. J. Fennell returned Tuesday from the property of the Cherokee Mining company in Nevada with the report that the showing is better at the mine than it has been since the company took over the ground two years ago. The new shaft being sunk upon the west side of the property is down a depth of 60 feet, and some good ore has been cut in sinking this distance, one streak of 18 inches in width being quite rich. The shaft will be sunk 100 feet.

A hoisting engine was taken to the

A hoisting engine was taken to the East Crown Point ground in East Tintic this week. Supt. Joseph Reese, says work on a new shaft will commence soon.

The new hoisting equipment for the Sioux Con. arrived a few days ago and has been delivered to the mine.

and has been delivered to the mine. About 10 days will elapse before the new machinery can be installed and then the property will be heard from regularly in the shipping line. A station is at present being cut out at the 380 foot level and a drift will be run to tan the ore upon its dit to the cest. and the ore upon its dip to the east. Although the car of ore sent out recently did not bring as much as was thought by many, it was entirely sat-

isfactorily to the management.

There is quite a lot of activity in the extreme eastern part of the district at the present time. In the drift from the the present time. In the drift from 125-foot level of the Ralph property 125-foot level of the Ralph property

125-foot level of the Ralph property ore is being broken down and already a few tons have been hoisted and delivered to the new ore house, recently completed. The product is steel galena, some of which runs over 80 per cent lead. The Ralph produced some lead ore years ago; but the property was worked only to a depth of about 80 feet. For the past seven years the ground has been tied up by litigation and only recently have matters been adjusted so that development could proceed.

been adjusted so that development could proceed.

Adjoining the Ralph upon the north is the holdings of the Provo Mining company, which is drifting on the 160-foot level. The work is being done under contract by Walter Lott, William Leavitt and Bert Bowen of Provo. These workings are headed toward the east with the intention of cutting the Ralph veln, it is hoped, within the next 36 feet.

At the Tintic Standard, southeast of At the Tintic Standard, southeast of the Ralph, two shifts are at work. Drifting is under way upon the 225-foot level, but it is understood that the management intends to sink the shaft to greater depth. The company is well equipped with machinery to do the work and from the way the management is going ahead it is readily to be seen that they have explicit faith in that section of the district and mean business.

business.

At the Big Hill drifting is going on from the 200-foot level of the shaft. Supt. Olson of this property states that the indications are most encouraging. At the Horseshoe claim, work is going on by John Bestlemeyer and his son, John M. Bestlemeyer. These gentlemen are preparing to patent several claims in the vicinity where they are working, and although they have sold a great amount of their East Tintic ground, they still have left several very promising groups of claims.

pround, they still have left several very promising groups of claims.

A meeting of the Iron Hat company was held in Eureka last Saturday, at which it was decided to inaugurate development work.

The Centennial Eureka mine will be

A MILLION SAVED.

High Class Men of Guggenheims Cut Off Pay Roll.

One million dollars is a snug sum of money to save annually in salaries to money to save annually in salaries to any corporation. But that is what has been done by the American Smelting & Refining company; according to advices received recently from New York. About 70 persons, it is said, have been dropped from the payrolls of the New York office; besides the field force has been reduced in all portions of the been reduced in all portions of the United States where they have been hitherto maintained. John Hays Hammond's salary of

John Hays Hammond's salary of \$250,000 per annum has been saved, and dozens of other high-priced engineers are no longer in the Guggenheim em-ploy.

A. Chester Beatty, who has been re-A. Chester Beatty, who has been regarded as the successor to Mr. Hammond, is no longer in the company's employ, his contract having expired June 1. It has not as yet been renewed. S. W. Mudd, who had been one of the leading Guggenhelm engineers, is otherwise employed. He is devoting his attention to the Ray property in the Kelvin district of Arlzona, which property is controlled by the Utah Copper interests and English investors.

SAW MOUNTAIN LAKE. American Fork Citizen Speaks Hope. fully of Mine.

A. T. Gardner of American Fork has returned home from making an inspec-tion of the Mountain Lake mine and brings the report that the superintention of the Mountain Lake mine and brings the report that the superintendent is very hopeful over conditions there, notwithstanding that disappointment was expressed over the failure to get at the contact in the main tunnel. It is expected that drifting on the contact will eventually lead to the repositary wherein the ores are contained.

At a point about 1,000 feet from the face of the tunnel Gardner was shown a small vein of rich ore which was being developed by up-raising. The vein at the time he was at the mine was six inches in width, and, according to the superintendent, it assayed on an average of 55 per cent copper, with high valese in gold. This, he was sure, would lead to a large ore body, as it seemed to be a very strong fissure. Working on this were two shifts of two men each, and they were making good headway.

Not far from this rich vein was a larger one about 5 feet wide, which seemed to be trending in about the same direction as the smaller one, and which, according to recent assays, averaged between 15 and 25 per cent

which, according to recent assays, averaged between 15 and 25 per cent copper, with good values in gold. On this two shifts of four men were at work.

ORE AND BULLION.

The ore and bullion settlements reported late yesterday by McCornick & Company were: Crude ore and concentrate, \$15,000; base bullion, \$25,000. Total, \$45,000.

New York, June 27.—The stock mar-ket opened today without any decided tone, some of the most prominent issues starting at prices unchanged from yes-

Advances of small fractions became general but there was not much interest in the market, the holiday session repressing confident operations. The market closed heavy and lifeless The drift of prices, although barely perceptible, was downward in the second hour and established a fractional loss in the more active stocks. The decline was slightly emphasized in the internal dealings.

Tenn. Copper, 36@36%. CHICAGO. Chicago, June 27.—The wheat market opened weak on lower cables and good weather for harvesting and for the crop, but became firm under a good demand from shorts. July started 14.0% to 54.0% lower at \$14. to \$4.5% and sold at \$5. The corn market was quiet. Opening weak on good weather, it soon improved with the change in sentiment in wheat. July opened 14 0% lower at 674 0.67% and sold up to 68 068%.

Oats followed the trend of other grains, opening easy but becoming firm at a slight advance. July started % lower at 44% and steadied around 44%. A 5 to 10c. advance in hogs caused firmness in the market for provisions. September pork was 5c. higher at 14.80; lard 2½5. higher at 2.10 and ribs were up 2½c. at 8.35.

Close—Wheat—July, 85%; Sept., 85%%

5%; Dec., 87%. Corn-July, 68; Sept., 68% 268%; Dec., Oats-July old, 44%; July new, 45%; lept., 68% @687%; Dec., 29%; May, 41% @ Pork-July, 14.671; Sept., 14.90; Oct. Lard-July, 9.15; Sept., 9.30; Oct., 9.35. Ribs-July, 8.25; Sept., 8.45@8.47½; Oct.,

8.55. Rye—Cash, 76. Barley—Cash, 55@50. Wheat—The support from short interests became more pronounced as trading progressed and advanced the price of July wheat to 83%. The close was firm with that devilery up % \$\tilde{\text{0}}\$ \frac{1}{2}\$ \text{1}\$ \text{53}\$%. option advanced to 684, and the close was firm at 68, a net gain of %.
