armory fund." To this proposition I armory fund. To this proposition a must reply in the negative. The Legis-lature of 1205 created an armory board whose duties shall be a general supervision and control of the armories and arsenals of this state, with the power nd authority to provide suitable arrganizations of the National Guard of Jah. "This board has the further ower to lease suitable buildings for rmory and arsenal purposes in various aces throughout the state wherever places throughout the state wherever necessary for the use of the national guard, etc. . . For the purpose men-tioned the sum of \$10,000 per annum was appropriated. The design of the Legislature in creating this armory board and placing at its disposal the sum of \$10,000 of the public money was to establish and build up in this state a national guard which would be a credit to the state and to build or oth-crwise provide suitable and convenient armories and arsenals and to equip them with the paraphernalia adequate them with the paraphernalia adequate to the proper and efficient discipling and instruction in military factles of the National Guard of Utah. The necessary equipments for this purpose are well understood. The instalment of a gymnasium and bowling alley in an mory forms no part of the necessary equipment and paraphernalia of an ar-mory. The military fund created by the Legislature is for the purpose of leasing, buying or building suitabl sultable organizations of the National Guard of Utah, and for no other purpose. Even if authority could be found to authorize the armory board to expend any of the military funds for the purpose men-tioned it would be objectional in this case for the reason of its unjust dis-cumption argingt all places outside

case for the reason of its unjust dis-crimination against all pinces outside of Sait Lake City. Without further discussion you are advised that in my opinion it would be an illegal diver-sion of the military fund to use any portion of it to install in the Sait Lake sion of the ministry find to use any portion of it to install in the Salt Lake City armory a gymnasium and bowling alley, and it would be putting an un-warranted interpretation upon the in-tent and purpose of the Legislature as indicated in the law found in chapter 43, page 55, session laws of 1905.

# AMUSEMENTS.

The fame of "The Girl from Kays." due to its long New York and London run, drew a good sized audience at the Theater last night. The entertainment is very bright in spots, but the general verdict will be that it is too long drawn out, and that its charming musical bits and the excellence of several of its principal people; hardly atone for the duliness of the story. It seems to be a straight farce comedy with musical instraight farce comedy with musical in-terpolations, but the comedy is one of the sort that is filled with a promise that never materializes. In spite of the lively action, nothing worth while really seems to happen. Added to that, the motive skates on very this les throughout, so that the story is not one that can be recommended to the aver-ace scoups percos

that can be recommended to the aver-age young person. The comedy work of Mr. North as Hogenheimer was admirable, the whirl-wind dancing of little Miss Clifford is better than anything ever seen here be-fore, and the singing and acting of Miss Morton specially charming. Her dust with Mr. Tuohy "semi-detached" was one of the hits of the evening. The chorus are all bright and capable and the costumes are beautiful throughout. Miss Blow in the part of "The Girl from Kays" conveyed the Impression that she was hardly equal to parts of so much importance. much importance. The lesser parts were generally in good hands. The same bill goes tonight

and tomorrow.

At the Lyrie the same burlesque bill continues before pleased audiences and will run till Friday night. The next attraction at the Theater is

"Buster Brown," direct from a run of 100 mights in New York and nearly 209 in Chleago.

Chicago, Oct. 25 .- Stringent rules regarding the shipment of explosives will sarding the shipment of explosives will be enforced by all the railroads next year, as the result of recommendations made yesterday by a special committee of the American Railway association, now in session here. Evidence secured by the committee showed that 344,000,000 pounds of ex-plosives are manufactured annually in the United States, nearly all of which is transported by the railroads. The numerous accidents which have happened in the handling of explosives by railways is said to be due to the fact that the material was not properly

fact that the material was not properly packed and marked.

A large amount of explaive stuff has been billed as ordinary murchandise, it is alleged, to cut down freight expenses, the rate on explosives being double the rate on first class freight.

The standing committee of the asso-clation on "train rules" made a recom-mendation that all the railroads should adopt what is known as the "hoop" sys-tems for handling orders to the engi-neers regarding the passing of other wrains. Trains

This system is in use on the Eric and several other roads and obviates the necessity of stopping trains in order to deliver orders.
