## MINING, BUSINESS AND STOCKS

# COURTS WILL BE ASKED TO SETTLE

Location of Famous Strike on Mabel Property is in Dispute.

BOTH SIDES ARE ON GUARD.

H. S. Woolley of Mines Development Co. Says Strike is 30 Feet Within Cyclone Extension Sidelines.

Actifding to Mr. H. S. Woolley, president and general manager of the Mines Development Co., who has just returned from a trip into the Blackhorse Mining district of Nevada, the recent strikes alleged to have occurred on the Mabel ground, one of which showed assay returns of \$100,278 to the ton in gold, are really not on the Mabel ground at all but over 36 feet within the sidelines of the Cyclone extension claim, owned by the Mines Develop-Mr. Woolley is certain there can be

no mistake and at present has his men watching the property continuously pending an action in court to quiet title, which as matters now stand is claimed by both sides of the controversy. Mr. Woolley returned to Salt Lake last evening after an absence of two weeks during which time he visited Osceola where he witnessed a mill run showing \$180 to the ton in gold from ore from the San Pedro mine near Osceola, also the property of the Mines Development Co. He also spent some days in what is practically an entirely new district, lying between Blackhorse and Ely, bringing back me interesting looking specimens of copper sulphides and iron oxides which copper sulphides and iron oxides which latter may possibly contain small gold values. These specimens are from properties acquired by Mr. Wooley in the new section, and although the assay returns have not yet been received, from appearances it is believed these will be high. A new strike is reported on the Les-

lie P. Craim Friday last, a surface outcropping showing returns of over \$2,000 Mr. Woolley is well satisfied with the

result of his trip and is brimming over with confidence in the future of Nevada and White Pine county in partic-ular from a mining standpoint. He will likely be in the city for some

#### DAY ON EXCHANGE.

Nevada Labor Troubles Not Without Effect-Total Business Above Average.

This morning's business on the floor This morning's business on the local of the local exchange opened with its customary strength, the generally healthy tone being maintained in Utah stocks during the entire season. The recent labor troubles at Goldfield and vicinity were not without their effect on Nevadas, however, and the dealing in these stocks was very small. It is generally felt that a still further depression may be expected in these se-curities, irrespective of whether the trouble referred to is brought to an end within a short time or continued in-

definitely.

There was no particular activity in any one stock, the total morning's bus-

any one stock, the total manning iness being considerable above the general average.  The quotations for the day closed as follows:  TODAY'S QUOTATIONS.

MONTANA-TONOPAH MEETING.

President's Report Shows Excellent

General Condition of Property. The annual meeting of the Montana. Tonopah Mining company took place in the city yesterday and partook largely of the nature of a love feast In comparison to that of a year ago. Yesterday all was peace and harmony,

Of the 835,000 shares issued, 538,102 were represented, and the following officers and directors unanimously elected. C. T. Knox of Berkeley, Cal., president; Charles E. Morris of Pony, Mont., vice president; R. P. Dunlap of Tonopah, second vice president; W. B. Alexander of Tonopah, secretary and treasurer; Henry D. Moore of Philadelphia, J. Herbert Mullen of Westchester, Pa.; F. M. Kirk of Cleveland, O.J. J. M. Mc-Outllen, of Tonopah, and Thomas, I. Quillan of Tonopah, and Thomas J. Lynch of Salt Lake and Tonopah. addition to being selected as secretary and treasurer of the company, W. B. Alexander of Tonopah was also designated as assistant to General Manager Mark B. Kerr.

The report of President Chas, E. Knox was of a highly encouraging na-ture, and while it pointed out that much of the past year had been given up to development work and general preparation, the results had been such establish beyond question the fact that the property is of immense value. In connection with the report waite. In connection with the report Mr. Knox stated that he was desirous that all should know that the company was very grateful to John A. Kirby, late manager of the property. Mr. Knox said that the mine had prospered greatly under the efficient care of the former gentleman and that it was a matter of much regret that he would be unable to serve the company longer. Mr. Mark B. Kerr, his suc-cessor, was a capable and valuable man and one from whom great things

were looked for in the future.

Orders were placed last November and December for new mine equipment consisting in part of a 60-foot steel gallows frame, a double drum, double cyl-inder, 15 by 18 hoisting engine, a 12-drill Ingersell Sargeant air compressor, a 200-horsepower electric motor. With ing to the delay in shipping that was not landed until quite recently. The mine has produced sufficient ore to meet all these expenses, as well as provide for the erection of the milling plant which has been ordered, and work in preparation for the installation of which is now going on.
In the year just ended a total of 5,700

tons of ore was shipped and 10.787 feet of development work done in the mine. Drifting has been done on the McDonald westerly on the third, fourth and fifth levels, adding 900 feet of previously unexplored territory. Drifts were also run easterly in the McDonald and Sout velus opening up 500 feet on new ground between the old workings of the North Star. A large tonnage of ore is in sight in this portion of the mine, the value of which will average \$27 per ton. Development work in other portions of the mine show highly satisfactory results, and prospects for the future are regarded as highly fa-

## STRIKE RICH VALUES.

Oddie-Mohawk Lease Turning Out Remarkably Well.

It is not an unusual thing to hear a report that some rich values had been encountered in the Oddie lease on the Mohawk, says the Goldfield Review; in fact, it is almost a daily report. Recently, however, all previous strikes were put in the shade so far as richness of the ore is concerned, and if the values continue to hold out the Oddie will be entitled to the blue rib-

bon for specimen ore. The discovery was made in the winze in the south crosscul. The winze is about 50 feet deep and is being sunk on a 10-foot ledge. Occasionally small pockets of free gold were encountered and as depth was attained these pockets became more numerous and richer. A specimen taken from the strike yesterday is on exhibition at the offices of the company on the lease, and those who have seen it pronounce it to be one of the best ever taken from the property. It is about the size of a man's hand and on one side it is literally plastered with the yellow metal, and it is estimated that it will assay better than \$5,000 to the ton. Samples have been taken from across the entire 10-foot ledge and an average assay

# TWO MORE ROADS FOR SEARCHLIGHT

Santa Fe and Salt Lake Roads Construct Branches to Tap Mineral Zone.

SEARCHLIGHT'S NEW STRIKES.

Last Year Value of Mineral Transportation Has Been Fifty-one Per Cent of Gross Tonnage.

(Special to the "News.") Searchlight, Nev., Sept. 10 .- Two short railway lines are being constructed which are of more importance than their limited length would, at first glance, seem to indicate. These lines are branches of the Santa Fe and Salt Lake roads, with Searchlight, Nev., as the objective point. In reaching this important and rapidly growing camp, the roads both tap, at different points, a broad valley which is destined to become an important agricultural section. At present this valley is but an incident in the calculations of the railway companies; Searchlight, its mines and its general business being the immediate object of the road building.

Searchlight has been a gold producing camp a long time. It recently has come into greater prominence because of a number of phenomenally rich strikes in that immediate vicinity, and because of the increasing richness of the older

The Searchlight district is proving to be the richest mineral district in the state. Its dimensions have not been defined. It is known to be 18 miles wide and the length has to be de-termined. The camp of Searchlight contains more dividend paying mines than any camp in Nevada.

PROFITABLE TO RAILWAY.

There is no class of business so profitable to the railway as a mineral field. Analyzed statistics show that 51.56 per cent of the freight handled by all the railways of the United States last year was products of the mines. Of the remaining 48.44 per cent, 9.50 per cent was agricultural products, 13.41 per cent manufactured articles, 12.51 per cent lumber and forest products, and 2.74 per cent animal products. It then is plainly to be seen why two railway companies are hustling to get into what is proving to be one of the richest mineral sections of the west. Work on the Barnwell and Search-

light road as the Santa Fe branch is known, is rapidly approaching com-pletion. Graders are within sight of Searchlight and it is expected to have the road running next month. The line branches from Barnwell, Cal., on the Ivanpah line of the Santa Fe and will be 25 miles long.

at Nipton, Cal., 22 miles from Search. light. It will be just 300 miles to Searchlight from Los Angeles by rail when the branch lines are completed. Construction was not begun on the Sait Lake's line so early as on the Santa Fe branch, consequently the lat-ter road will be first into the camp. The Santa Fe has already established a shipping station 12 miles out from Searchlight.

Six of the older producing mines in Searchlight are running a total of 70 stamps and 30 additional stamps are being added to the mills. This half dezen old producers are the Quartet.

dezen old producers are the Quartet, Duplex, Southern Nevada, New Era, Searchlight and Cyrus Noble.

Among the more recent mines being developed are Good hope, down 500 feet; Parallel, 500 feet; Santa Fe, 170 fee deep; Silver Legion, 200 feet deep; Boulder, 170 feet deep; Boston 480 feet deep; American Girl, 220 feet; Fraction 100 feet; National Bank, 200 feet; Pompeti, 300 feet; Blossom, 425 feet; Mondamin 150 feet; Commonwealth, 100 feet; Saturn, 100 feet; Goodenough, 100 feet; Blackhawk, 275 Wearth, 100 feet; Saturn, 100 feet; Goodenough, 100 feet; Blackhawk, 275 feet; Big Six, 200 feet; Peerless, 350 feet; Searchlight, 300 feet; Wyoming-Searchlight, 200 feet; Annette, 150 feet, and St. Louis, 800 feet in on a

## GOOD VALUES SHOWN.

Nearly all these properties began to show values near the surface. The Blossom yielded \$317,000 inside the first fifty feet. The products of these mines and scores of others to be developed, and the carrying supplies to the camp is sufficient stake to warrant the road building now in progress. Later will be developed a rich agricultural region adjacent to the town. Just north of Searchlight there is a level valley four-teen miles wide and eighteen miles long, practically all of which is government lands, open to the homesicader. This means that there is opportunity for more than 4,000 persons to obtain free farms of 160 acres each.

Soil in this valley is deep and rich, and it but requires water to bring it to a high state of productiveness. Fine and abundant artesian water is found at a depth of 150 feet. It will be but a short time after the coming of the railroads until every foot of the terri-tory is homesteaded. Several thousand added to the population of the re-gion promises greatness for Searchlight, which is the natural center for busiess for the entire valley.

Los Angeles capital and labor is building the water and electric lighting plants for the city, Carl Leonardt, who has the contract for the work, is a large shareholder in the plants. H. H. Mc-Cord company of Los Angeles, owns nearly the entire townsite, minus a few hundred lots which they have sold, chiefly to Los Angeles investors, Business of the town will be done with Los Angeles over the railway lines now being constructed. There is talk of a smelter to be built at that end of the route for the smelting of the ores of the Searchlight mines, such of them as are not free milling.

## BUYS MINING CLAIM.

Billing Mine in Tintic District Sold For \$2,000.

(Special to the "News.") Provo, Sept. 12.-A mining deed from Ruth P. Mathews of View, Weber county, to C. E. Loose for the Billing mine in the Tintic district, has been filed with the county recorder. The consideration is \$2,000.

## TO OPERATE IN CHERRY CREEK.

Bisenit Extension Mining Co. Incorpor-

ates With One Million Capital. Articles of incorporation of the Biscuit Extension Mining company will likely be filed with the secretary of will be composed of prominent Salt Lake mining men and others and the properties which the company will take over are located at Cherry Creek, Nev. and will include the group of claims covering the southern extension of the Fiscult mine, which is the old silveera, was one of the prominent mines

of the state. The new company will have a capital of \$1,000,000 in shares of \$1 each, and according to present ar-rangements its officers will be Lowis T. Cannon, president; Joseph S. Hyde

vice president, and Joseph J. Cannon secretary and treasurer. Sufficient work has been done on the new ground to demonstrate that beyond question the same leads which made the old Biscuit fansour, also traverse the new ground. The Biscuit shaft will probably be used for the development of the mine, as it will give a good depth and save the initial expense of a

The headquarters of the company shi be in Salt Lake and from all that can be learned their property is a valu-able one and likely to take a high place in the ranks of the Cherry Creek pro-

## NEW COPPER DISTRICT.

Region South of Bullfrog Scene of Great Exchement.

Green Water, Cal., Sept. 11.-The excitement over the copper deposits disthe increase. Hundreds of men have braved the desert to get into layo couny and locate prospects in the new field, miles south of Bullfrog.

It is stated that during the past two weeks sales aggregating a grand total of \$4,125,000 have been made, and the of everything in the district has shot sky high.

The Kuntz property was purchased by a syndicate headed by Charles M. Schwah for \$300,000; the Heinze prop-erty cost \$200,000; the Roger Knox preperty entailed an expenditure \$150,000; the Green Water Furnace Creek property, purchased by a syndicate of Los Angeles capitalists under the leadership of Maj. John W. Off. was obtained for \$100,000. The Donnell group sold for \$100,000. Patsy Clark's property is proved to \$100,000. roperty is now valued at \$3,000,000, The Kemp group is valued at \$20,000. The Copper Cliff group was bought outright last week for \$75,000.

Prices of property that lie in the district have in 20 days gone from \$100 to \$200 up to \$10,000 and higher. Such men as Schwab, Heinze, Ira W. Clark, H. H. Clark, Malcolm McDonald, Donald Gillia and Schwab vivon are represented. lis and Senator Nixon, are represented in the district, either in person or by the experts. They are spending money right and left for every property that is purchaseable, and are rushing development work as fast as men and supplies can be hurried into the district. Conditions of labor are most difficult. The heat is terrific. Water costs from \$5 to \$10 a barrel and is hauled into the district by mules that it costs \$3 a day to feed. A bath is not allowed in the new camp; water is too scarce and precious to be used for bathing purposes, and rattlesnakes and desert The "Borax" Smith road will pass within 14 miles of the new camp, and the new road at Builfrog, but 60 miles away, affords means of handling the ore.

## CITY ROCKS LOOKS WELL.

Well Known Alta Property Promises Great Things in Near Future.

W. J. Lawrence who has just re turned from a tour of inspection of a number of Alta properties returned to the city yesterday enthusiastic in praise of the district and the City Rocks property in particular. He expresses himself as astonished at the ore bodies in the property and believes that the time will come and that at no very distant date when it shall have become one of the principal producers of the district. A crosscut is being driven from the main tunnel by means of an electric drill and during the past 30 days have penetrated 100 feet. Another tunnel is also under contemplation which will tap the ore bodies at a depth of 790 feet below the present low-

#### CONCENTRATES. Taylor-Brunton sampler released 21

cars from Tintle. H. S. Joseph jeft yesterday for Wyo-ming on a brief business trip.

W. V. Rice is absent from the city looking after some interests in Ne-

D. C. Jackling, general manager of the Utah Copper company, spent yes-terday inspecting the company's hold-ings at Bingham. The Pioneer ore sampler today released the following cars of ore: Three Stockton, two Idaho, two Nevada,

three Alta and two Tintic. The Yankee Consolidated at Bing-

ham has just completed the installa-tion of a compressor plant at its workings in the Tintic district. The new tramway of the Utah Apex

will it is expected, be completed by tectober when the work of getting out the ore will be greatly facilitated.

## TO FILE AMENDED BILL.

U. S. District Attorney Booth Will do This Against Fuel Company,

United States Dist. Atty. Booth was yesterday granted permission by Judge John A. Marshall to file an amended bill against the Utah Fuel company. This is the case instituted by the government relative to certain coal lands in Carbon county and vicinity. Judge Marshall depled the request of the dis-trict attorney for a substitute service, trici attorney for a substitute service, holding that the appearance of H. G. Williams, president of the Utah Fuel company, was sufficient. By reason of the amended bill the Morgan Trust company of New York, which holds morigages on some of the coal lands in dispute, will be brought into the case. Judge Marshall granted the Stockton Gold Mining company 15 days in which Gold Mining company 15 days in which to file a cross bill in a suit brought against that company by the Mine &

smelter Supply company. The case of William Roese, adminis trator of the estate of Joseph Anderson, came to a close yesterday, when by stipulation the plaintiff received \$2.500 and costs from the Union Pacific Cost while in the company's employ in 1905.

## MARKET STILL A LITTLE UNCERTAIN

Prices Took a Decidedly Downward Course at the Opening.

THEN THEY WERE LIFTED UP

Money Condition Wrought the Change-Hill and Harriman Stocks in Demand.

New York, Sept. 12.-The downward course of prices of stocks was pronounced at the opening, a number of the speculative favorites losing large fractions. Great Northern preferred fell 1%. Reading 1% and St. Paul, Northern Pacific, Missouri Pacific and Denver and Rio Grande % to 4. International Paper and National Lead rose %. Opening losses were retrieved when a good demand arose for Lead and Smelting. These stocks improved 1% and 21 respectively. Fluctuations were uncertain for a time but at Il o'clock the market was rising conspicuously, Pressed Steel Car fell 1. Consolidated Gas 15 and Pullman 4 points. Trading became dull at

Prices worked higher during the second hour. Lead's gain reached 24. Texas & Pacific Da and Union Pacific, Pennsylvania, Republic Steel preferred and Distillers Securities a point. American Express 2 points.

Bonds were irregular at noon.

Bonds were irregular at noon.

The encouraging money conditions influenced purchases of stocks and prices of various leaders were lifted substantially. The Harriman and Hill stocks were purchased more freely after 12 o'clock, with Southern Pacific most in demand. Southern Pacific gained 14, Union Pacific 15 and Great Northern preferred, Eric, Wahash preferred, loves, central preferred. bash preferred, lowa Central preferred and Missouri Pacific 1 to 14. Pullman recovered almost all of its car-

#### OFFICERS ELECTED.

Utah Federation of Labor Adopted Resolutions of Sympathy.

The Utah Federation of Labor elected the following officers last evening for the ensuing year, 12 local organizations being represented at the meeting:

President, M. H. Wilson, Salt Lake;

first vice president, Chris Aadneson, Ogden; second vice president, William Rotzler, Sait Lake; third vice president William Kindred, Salt Lake; secretary and treasurer, C. L. Spiegel, Salt Lake. It decided to reduce the per capita-tax from 5 to 4 cents per month. Resolutions were adopted sympathizing with the men accused of murdering ex-Gov, Frank Steunenberg, and de-nouncing the governors of Colorado and Idaho for the extradition proceedings in connection with the transfer of these men from Denver. The state federa-
