

MINING, BUSINESS AND STOCKS

BECK TUNNEL WAS WANTED

This Tintic Stock in Demand Today and at Somewhat Better Prices.

MAY DAY HELD ITS OWN.

Uncle Sam and Lower Mammoth Higher—Offering of Mason Valley—Closing Quotations.

Beck Tunnel seemed to be the center of attraction on the floor of the mining exchange today and advanced 10 cents a share during the forenoon calls. The uncertainty about the dividend appears to have passed and the general opinion prevails that when the directors meet in Provo tomorrow they will order the usual distribution. However, nothing official has been given out. May Day remained steady today and was bought at 42 cents. Uncle Sam Consolidated went up to \$1.02 1/2 a share, while Mountain Lake weakened to 74 cents. The effort to get Columbus Consolidated off at \$5 failed, but the stock was purchased at \$4.85. There was practically no trading among the unlisted stock. Ohio Copper was in demand and higher. Western Nevada was offered at 80 cents with no takers, while Mason Valley could have been obtained at \$1.97 1/2. On the whole, today's local market was good considering the situation in the eastern market centers.

The closing quotations and sales were:

GOLDFIELD CONSOLIDATED.

Speculation as to What the September Dividend Will Be.

Speculation is rife among the brokers in Goldfield as to the amount of the first dividend to be paid by the Goldfield Consolidated, says the Tonopah Bonanza, and the general talk is that it will be 35 or 40 cents a share. This would be a great thing for the stock, and a great thing for Goldfield. If 40 cents a share were to be paid it would be greater than any of the dividends yet paid on the Tonopah mine of this camp.

And it would not be at all unlikely to see such a dividend declared. Forty cents a share on 3,000,000 shares would amount to \$1,200,000, and according to a statement of Mr. Wingfield, there is nearly \$2,000,000 in the treasury at the present time. By the time the dividend is declared so great a near twice that amount if the present rate of production continues, and there is no reason why it should not increase rather than diminish. The mines of the Goldfield Consolidated are being worked to anything like their capacity and when they do get going, things will be humming in Goldfield. It is safe to say that the Goldfield Consolidated is today the richest gold mine in the world.

WHEELER GOLD ORE.

Car Load Coming to Local Smelters From Yerington.

C. D. Rookledge, who has here last week looking over the properties in which he is interested, the Yerington Copper and Wheeler mines, says the Lyon County Times, returned to Star Lake the first of this week after making arrangements to ship a carload of gold ore from the latter property. This ore is from the recent strike in the mine and will undoubtedly run close to \$200 to the ton. Development work at the mine is progressing nicely and the ground is looking better with each day's work. Teams are now being used to haul the ore to the mill. Wabaska and about 20 tons have so far been delivered.

The haul is a long one and the carloads will probably not be made up before the middle or last of next week. This shipment is being made simply to show what can be done with this property. The distance from the mine to the railroad is not very great, but the cost of shipping anything but very high grade ore would be out of the question. The company is erecting a small mill on the property and expects to have it in operation in a very short time. There is good reason to believe that when this mill is in operation that the natives will be surprised at what this district can do in the way of producing gold.

WESTERN NEVADA COPPER.

This Property is Taking On the Appearance of a Real Mine.

The property of the Western Nevada Copper company is taking on the appearance of a mine. M. M. Johnson, who returned from a trip to Yerington yesterday, talks enthusiastically and declares that recent developments there have been of a most important character. Two tunnels are being driven, one 100 feet above the other.

Mr. Johnson states that the upper tunnel has followed ore for a total distance to date of 250 feet, the average width of which is about 40 feet. As yet the management has drifted upon 2.2 per cent and 2.7 per cent copper. There is no evidence that the ore is diminishing, but the latter workings are the ones that show the best value. There is such an excess of iron in the ore, stated Mr. Johnson, that it is an ideal smelting rock, and it can be shipped to any local market right now at a very good profit. This ore is a surprise.

The lower tunnel is just breaking in to the sulphides, and up to the present time the management has drifted upon a mineralized zone which was 75 feet in width. A compressor plant is being installed, also an electric hoist.

BLUE BELLS OPENING UP BIG

Permanency of New Ore Shoot On One Thousand Level Has Been Established.

TEN CAR LOADS EN ROUTE.

Ore is High Grade—MacVichie and Swindler On An Inspection Trip.

The Eagle & Blue Bell mine in the Tintic mining district is turning out to be one of the big mines of the Juab county camp. Development of the ore body found recently on the 1,000-foot level has demonstrated beyond any question of doubt that it is a permanent one and that it can be depended on for a generous supply of riches for a long time to come.

Since the strike was made and until today no one connected with the local offices of the Bingham Consolidated Mining & Smelting company has felt disposed to talk, they making the plea that strikes had been reported in the Eagle & Blue Bell before and had not altogether made good. Before saying anything for publication this time they wanted to be sure about it. But it seems the news has been given in by Boston and people there have been buying the stock at a price which double what it was quoted at a month ago.

It was learned from Capt. MacVichie today that the ore had been followed on the strike about 100 feet and had been cross-cut for about the same distance, with the actual dimensions of the shoot yet to be determined. The ore is high grade, some of it sensationally so, but the general average will probably be anywhere from \$25 to \$40 a ton. The company has 10 cars of the product from the new shoot en route to the smelter.

DAMAGE REPAIRED.

Hannaph Mine is Now in Shape for Business Again.

Frank B. Worth, general manager of the Newhouse property at Hannaph, says the Tonopah Miner, states that the damage caused by the fire at the mine last month has been entirely repaired and the development work is proceeding as usual. The north crosscut, which the 300 level is out 225 feet and has penetrated the ledge a distance of six feet. The ledge is between five and six feet wide and carries good values in silver and gold, the ore being of the same character as that in the Mizpah at Tonopah. The compressor started up yesterday, and the same forward progress in the crosscut will be greatly accelerated. An iron building is being erected to replace the wooden structure, which was partially destroyed by the fire last month. Thirteen miners are regularly employed, and the force will be increased as rapidly as room can be made for additional miners.

Helm and associates, who own a group of four claims adjoining the Newhouse property on the north, have let a contract to sink a shaft to a depth of 300 feet at Hannaph. It is the intention of the management to crosscut the ledge system which extends into the ground from the Newhouse group, under this contract is being actively pushed.

NEW FIRM LAUNCHED.

Well Known Salt Lickers Will Engage In the Brokerage Business.

A new brokerage house has been launched in this city and in a few days will be represented on the floor of the Salt Lake Stock & Mining exchange. The firm will do business under the name of the Dorn & Thomas, the senior member of the firm, is a son of John Dorn, and prominently identified with Salt Lake's business interests, while the junior member is A. Thomas, assistant manager of the Nevada Southern Mining company and who has for a long time been associated with the office staff of the Consolidated Mercantile Gold Mining company. Mr. Thomas, it is understood, will look after the interests of the new firm on the floor of the exchange.

Both Mr. Dorn and Mr. Thomas are well known in the mining public; they are thoroughly familiar with the mining situation themselves and will make a strong team. They are enterprising and progressive and there is no reason to believe that they will not do the business transacted in Salt Lake in mining stocks.

CONCENTRATES.

M. M. Johnson of the Newhouse mines expects to leave for British Columbia this evening.

L. N. Morrison of the Indian Queen and Leland Mining companies operating in Beaver county, has returned from a trip to camp.

W. G. Page leaves today for California to make a tour of inspection of the copper property recently acquired on an option by J. H. Turner and associates.

The ore and bullion settlements reported last yesterday by McCormick & Co., were: Crude ore and concentrates, \$37,000; base bullion, \$63,00
