

BLACKWELL'S

I WANT BLACKWELL'S DURHAM AND NO OTHER. SEE?

Two will find our company inside each two cents bag, and two cents inside each four cents bag of Blackwell's Durham. Buy a bag of this celebrated tobacco and read the coupon within gives a list of valuable prizes and how to get them.

Fair Notice

To all Our

Public.

Our Directors have issued an imperative order to finish closing out the remainder of our stock of Clothing and Gents' Furnishing Goods by January 1st.

We still have.....

\$35,000 WORTH OF FIRST CLASS GOODS

To select from, and to move these goods more rapidly we have set the Price Cutter at work in every department and the way values have been ignored by him makes our would-be competitors envious. They, our competitors, say that they can't buy the goods at wholesale at our retail prices. Neither can we, but we are going out of the clothing business, so must make this TRIMENDOUS SACRIFICE.

We are not trying to sell \$5.00 suits and overcoats for \$10.00, but are selling \$18.00 and \$20.00 suits and overcoats for \$10.00, and \$22.00 and \$25.00 suits and overcoats at \$10.00, and all other goods in like proportion.

Our \$2.00 Hats now \$1.00
\$2.50 and \$3.00 Hats now \$1.50.
\$3.50 and \$4.00 Values now \$2.50.

New Prices, Monday Morning, Dec. 7th.

All we ask of you is to call and examine goods and prices. We know you will then buy.

The Conhaim Clothing Co.,

205 Main and 10 E. 2nd South.

RUPTURE

of men, women and children permanently cured without pain or the slightest inconvenience by the **FIDELITY METHOD**. Every case guaranteed. Patients need not pay a dollar until completely cured. The cure guaranteed. Over 100,000 cases cured in the last five years. Consultation free.

single and were broken off a large cedar about four feet long. The most curious of all, being the most true to nature, and with the most unmistakable signs of having been at one time some famous species of a fruit, is an almost exact imitation of a blackberry seed, mounted a twenty-five inches in length and fifteen inches in diameter. Through the thickest portion, it has a distinct round hole half an inch thick. The upper portion where the stem should be is broken off, but there are still some signs of the same. After trying where this was found, which was made as of a cedar tree. It was for the perfect fruit have been preserved and mounted as such by specialists. If there should prove to be what their appearance suggests they will be a very interesting and valuable addition to the world's knowledge of prehistoric time. Mr. L. H. Meritt, who is associated with Mr. H. H. Haddock, in the same way, there, which he has now discovered the perfect remains of some large number of the same species. It is a specimen of the same tree, and of the same length, it is about 25 inches in length, the balance being (nearly) as in the specimen, which is the same, in which these things were found. Not far from there, on the same tree, a small branch, embedded in the rock and with a hole in the middle of it, a large mammoth or other was found. The latter was found in a sandstone, and on this specimen Mr. Haddock was only able to bring away one of the smallest, which was a specimen of the same tree, and of the same length, it is about 25 inches in length, the balance being (nearly) as in the specimen, which is the same, in which these things were found. Not far from there, on the same tree, a small branch, embedded in the rock and with a hole in the middle of it, a large mammoth or other was found. The latter was found in a sandstone, and on this specimen Mr. Haddock was only able to bring away one of the smallest, which was a specimen of the same tree, and of the same length, it is about 25 inches in length, the balance being (nearly) as in the specimen, which is the same, in which these things were found. Not far from there, on the same tree, a small branch, embedded in the rock and with a hole in the middle of it, a large mammoth or other was found. The latter was found in a sandstone, and on this specimen Mr. Haddock was only able to bring away one of the smallest, which was a specimen of the same tree, and of the same length, it is about 25 inches in length, the balance being (nearly) as in the specimen, which is the same, in which these things were found. Not far from there, on the same tree, a small branch, embedded in the rock and with a hole in the middle of it, a large mammoth or other was found. The latter was found in a sandstone, and on this specimen Mr. Haddock was only able to bring away one of the smallest, which was a specimen of the same tree, and of the same length, it is about 25 inches in length, the balance being (nearly) as in the specimen, which is the same, in which these things were found. The latter was found in a sandstone, and on this specimen Mr. Haddock was only able to bring away one of the smallest, which was a specimen of the same tree, and of the same length, it is about 25 inches in length, the balance being (nearly) as in the specimen, which is the same, in which these things were found. Not far from there, on the same tree, a small branch, embedded in the rock and with a hole in the middle of it, a large mammoth or other was found. The latter was found in a sandstone, and on this specimen Mr. Haddock was only able to bring away one of the smallest, which was a specimen of the same tree, and of the same length, it is about 25 inches in length, the balance being (nearly) as in the specimen, which is the same, in which these things were found. Not far from there, on the same tree, a small branch, embedded in the rock and with a hole in the middle of it, a large mammoth or other was found. The latter was found in a sandstone, and on this specimen Mr. Haddock was only able to bring away one of the smallest, which was a specimen of the same tree, and of the same length, it is about 25 inches in length, the balance being (nearly) as in the specimen, which is the same, in which these things were found.
