SACRAMENTO REMAINS FIRM

May Day Weaker-Daly-West Sells Up to \$19.20, but Closed Lower-Lower Mammoth Stationary.

p. summermen ?

TODAY'S METALS: SILVER 5934 LEAD, \$4.57%

CASTING COPPER 16

Business was much better on the Exchange today with prices well sustained in all of the better stocks. An improvement is noticed in a few stocks, principally among which is Mammoth, which, after dropping its first hundred at \$2.25, repidly advanced to \$2.27%.

Daly West closed a little weaker than it opened. Its first sale was made at \$19.20, from which ngure it fell to

19.11, the price of the last sale.

Daly let go 800 at \$1.60, while Eagle and Blue Bell sold at 90 and a 500 lot of Galena brought 16%. Lower Mammoth was active at from 55 to 55½, while Mercur made a sale at \$4.75, closing with \$4.50 bid. This is the

highest figure obtained since the divi-dend was decreased on the 10th Inst. Sacramento has evidently risen on the strength of the management's report, and the prospects of an improvement in its financial condition when the roasters shall be installed. The stock sold at 22 at the outset, and after advancing to 22 it fell back to 21.

May Day brought \$1.06, Northern Light sold at 5½, and Tetro was

JOHN C. CUTLER, JR. Street Streets,

Late Rally in London Market Causes a Boost in Wall Street.

Movement Up All Around - Some Seething Back-Live Stock and Produce Steadp.

New York, April 20,-Wall street-

.The feature at the opening was the fron and steel stocks. Federal steel, steel and wire common, and Tennessee coal rose from 154 to 2 points. The late rally in the London market belped railroad stocks to a higher plane. Immediately after the opening steel and wire ommon reacted a point and the preferred stocks declined 2%. Losses were slight outside of the metal stocks. Interest shifted to the industrials and tractions, which became decidedly strong. Sugar moved up 2%. Steel hoop forged upward 2%, and the preferred stiffened 4 points, Sympathetic rallies encued in other steel propexcept steel and wire stocks, which were feverish. The fluctuations in rallroad stocks were narrow. A diminu-tion in the demand for stocks led to realizing and short lines were extended. some specialties the losses exceeded point. The pressure against steel and

a point. The pressure against steer and wire was most pronounced.

American steel and wire was driven 114 below last night's level and weak-ened other steel stocks. The general list fell back slightly but hardened again when steel and wire railied 24. The closing was feverish and extremely rregular, showing mixed not change The bond market was firm, but the demand was light.

# HELPED RAILROAD STOCKS. REPORT ON THE DALTON MINE

Said to be in Better Condition Than Ever Before.

GOLD ORE IN HORSE CREEK

A Twelve-Foot Ledge Found-Streak of Copper Ore in Ben Butler Widen. ing Out-Cyanide Receipisc

A special report has just been issued to the stockholders of the Dalton Mining Company which is operating in the Ohio Mining district, Plute county,

The report shows that the company owns a patented mill-site of 2.75 acres with a good water right about six and one-half miles from Marysvale. It also owns four patented claims containing 40.05 acres, elevated about 3,000 feet above the mill-site. In addition to the patented claims the company is acquiring title to two adjoining claims. Full payment has been made upon one of these claims; the other is under bond until October of the present year.

The improvements consist of a boarding house for twelve men, blacksmith hop and an ore and assay building. In ddition the company also has at the mill-site a Huntington mill, assay of-

Development work consists of tunnels

No. 1, 2 and 3 proper, besides numerous prospect tunnels and crosscuts, During the past year a great deal of evelopment work was done, principally 1 No. 6, the Comet and No. 8 tunnels. No. 6 tunnel has been extended 105 feet. The Comet has been extended 200 feet on the surveyed course of the vein in No. 8 tunnel and while the true voll has not as yet been encountered, the mineralization indicates that the tunnel is properly projected and should be continued on its present course and No. 8 tunnel has been extended 135 feet and an inclins sunk in it on the vein to a depth of 72 feet. A small quantity of very satisfactory ore has been encountered; such as will pay cost of shipment has been carefully sam-oled, sacked and stored at the mine and mill: a considerable amount of ore, averaging from \$12.00 to \$15.00 per ton, has been placed on No. 8 dump. A few small bodies of high grade ore were neountered in sinking, but it is proba-de that sufficient depth has not been

ble that sufficient depth has not been attained to insure permanency.

The managing director receives amounts for his services which are deemed equitable while the secretary receives a fixed salary of \$25 per month after providing the company with office accommodation. Of its capital stock the company has \$9,902 shares in the treasury. The receipts during the past receipts during the pas year from assessments and other sources amounted to \$8,659.32. During the same period the disbursements amounted to \$6,124.80, leaving a balance of \$2,534,52 on hand on January 29. This has now been reduced to \$700. The company had \$947,37 on hand on the 31st ult. In supplies, besides being free

During the present year the management proposes to extend the Comet tunnel 200 feet farther and also sink the No. 8 incline 125 feet deeper besides doing other work. The property is said to be looking better now than at any time during the period covered by the present management,

WAS RICH IN GOLD.

A Big Gold Ledge Found in Horse Creek, Carbon County.

Special Correspondence.

Price, Carbon Co., April 18.—During the time the Castlegate mine was ide. Mr. Daniel Lewis of that place, and Mr. Van Fuller of Eureka, went out in the hills prospecting, and found float in Horse Creek literally covered with gold, and upon further examination found the ledge from which it was from, which is twelve feet wide. They made ten locations and loaded with samples returned to Castle Gate. Itr. Lewis at once sent their notices to Provo to be recorded. They will go out again next week and commence work on the voin. Some of the fortunate owners of the Annie Laurie mine who sold out two weeks ago, are said to be interested in this new strike. Special Correspondence

## CYANIDE RECEIPTS.

The Mercur and Chainman Mines Send in 960 Pounds.

The day's receipts at the sampling rooms of the Consolidated Kansas City Smelter and Befining Company amounted to 960 pounds of gold cyan-ides. The Mercur came forward with about 900 pounds of the dust while the Chainman, at Ely, Nev., reported with about 60 pounds of the precious prod-

AT THE BEN BUTLER.

Streak of Copper is Widening Out-May Disclose a Nice Chute.

Manager J. A. Jacobsen, who has just returned from a visit to the Ben just returned from a visit to the Ben Butler property, reports a very encouraging outlook. Nothing sensational is yet in sight, but the streak of copper are in the upper tunnel is increasing in size. There is said to be abount five or six inches of ore that runs about 11 per cent copper, 20 per cent lead, besides smaller quantities of silver and gold. Mr. Jacobson would not be surprised to see the streak make into a much larger body. At present four men are working on the vein, which also shows good militing ore. The lower tunnel still lacks about 200 feet of tapping the vein, but Mr. Jacobson anticipates something worth talking of anticipates something worth talking of when this shall be done.

# LEDGE OF KAOLIN.

Second One on the Coast Found in State of Washington.

A Tacoma, Wash, dispatch this morn A recoma, wash, dispatch this morning says: Three farmers living in the Nisqually valley reported tast night they had found a well defined ledge of Kaolin, or China clay, nine miles from Eatonville. There is only one other deposit on the coast.

ELECTROLYTIC COPPER. Statement that it is Better for Electrical Purposes is Penied.

The statement of the Engineering and shall occupy three rooms of the house as long as they shall live free of charge.

Reberca Campbell has conveyed by deed to the Anderson Real Estate and Investment company, for \$4,500, part of lot 2, block 46, plat B. on Sixth East effect between Second and Third streets. copper at a higher price than electrolytic for purely electrical purposes. The conductivity of the copper produced by leading Lake mines will average as high as the conductivity of electrolytic copper. There is of course a choice in Lake copper. Some of it contains a larger percentage of arsenic, but if necessaary it can all be made as pure es the purest electrolytic. It is a fact not generally recognized that purity is

not the only requisite of superior con-ductivity in copper. Absolutely pure copper may be much inferior in conductivity to copper containing a percent ge of foreign minerals. The porous lal factor. The percentage of arsenic a copper from some of the Lake mines is greater than from others. Less of this metal is sold in the form of wire bars, but even this Lake copper can be made if necessary absolutely pure, but there is a strong demand for a large percentage of Lake copper, owing to its superior toughness for other than electrical purposes where the quality of conductivity is immaterial.

#### Australian Copper.

Australia, like other copepr producng countries, has benefited by the rise in the price of the metal, says the special correspondent of the Engineering and Mining Journal Many new enterprises have been promoted and not tew old abandoned mines have been copened. Progress has been greater a New South Wales than in other colo-ies, though some of the properties now ening up in Queensland would ap-

ear to have merit.

The Great Cober mine at Cober, N. S. V., 459 miles west of Sydney, continues to be the largest copper and incidentally the largest gold producer of the coloy. Work has still been confined to the ement has announced to Intention of sinking a new working shaft, as the present one is inadequate in size for handling the large quantities of ores it will be necessary to raise from the 420-ft, and 540 ft, levels. A new water jacket was erected early in the year, making a total of five, not including the reference of the control of the con refinery-slag furnace at Lithgow, in which custom ores are smelted as well to changes have taken place in th mine, the production for the year will be in the neighborhood of 5,000 tons of copper, 25,000 ounces of gold, with pos-sibly 75,000 ounces of silver.

#### MINING NOTES.

F. E. Wilson went to Stockton to-

The Carlsa of Tintic had two cars of ore on the market today.

Jackson McChrystal was in town to-day from Tintic. The Conklin sampler reported seven cars of ore from Tintle today.

Two cars of ore were on the market today from the Mammoth of Tintic, W. B. Andrew is back from the East where he has been for several weeks The Bullion Beck of Tintic reached

the market today with five cars of ore.

The Horn Silver of Frisco reported on the market today with seven cars of Two cars of ore were on the market today from the Silver Shield of Bing-

The West Mountain Placer has levied another assessment of five cents a share.

H. E. Carey who is interested in the Carisa mine at Tintle with Eben Smith of Colorado, came in from San Francis

The Taylor-Brunton sampler report-

ed seven cars of ore from Frisco, three from Bingham and two from Tintic to-President Sam McIntyre of the Mani-

day from his big cattle ranch at Hallack, Nevada, Manager Otto Stallman of the Glasgow and Western Exploration- com-

the next few days, Bids have been received for the installation of 30 stamps in the Bullion-Beck mill. This, it is thought, will enable the management to handle about 90 tons more per day.

It was expected that the Jordan Narrows power plant would start up to-day. The Mercur compressor, the West Mountain Placer machinery with that of some other mines have been silent since the water was diverted.

Mining News: Australia has con-tributed over a dozen valuable speci-mens of tin to Colorado, Some of the ore runs as high as 70 per cent in tin. Ore running less than I per cent is worked with profit in Australia.

Boston News Bureau; Within a month, President Coram of the Cochiti inine says the property should be treating 200 tons of rock per day at an estimated cost of \$22,500 per month, say \$750 per day. The bullion value of the product is estimated at from \$2,000 to \$2,500 per day. Profits of \$40,000 a month are conservatively figured. The ompany will have notes payable of pproximately \$90,000, which should be providede for from three months' opera-tions. The management has hopes to pay a dividend of 50 cents in October and 50 cents more within the calendar

Baker City Democraft Mr. George Kislingbury, one of the most noted mi-ing experts in the country and who for several years has been traveling the interest of Capt. De La Mar. many-times millionaire mining man, arrived in the city yesterday from California. Mr. Kislingbury refrom California. Mr. Kislingbury re-cently returned from Mondura and on his way here stopped at Redding, Cal. where about a year ago he found a copper mine for Capt. De La Mar and upon which there has been placed large reduction works and the proprty is said to be one of the most islingbury visited Baker City about two years ago and formed a high estimate of this country in a mining way. His visit here at this time is to make a more extensive investiga-tion, and last evening he went to Sumpter, expecting to be absent about a week or ten days.

# THE MEALS ARE ALWAYS GOOD.

"The train is crowded with agreeable surprises, but it is in the dining car that one is most impressed with the Burlington's superiority. Now, with-Builington's superiority. Now, with-out being too utterly dainty, I am ex-ceedingly particular about my meals, and about the way they are served. For breakfast all I want is eggs, rolls, and coffee. In a Burlington dining car I am able to get just what I want, just what I would have at my own table, and for the small sum of lifty cents. The exquisite neatness of the napery makes a good meal taste all the better." makes a good meal taste all the better."

Interview with a Denver merchant.
Two trains a day from Denver to the the Vestibuled Flyer at 10:00 p. m.; the Vestibuled Flyer at 10:00 p. m.; Omaha, Chicago, Kansas City, St. Louis, Through sleepers daily, Ogden to Chicago via Denver and the Burling.
