## BY TELEGRAPH.

THE PRESIDENT'S CONDITION.

Long Branch, 6.-The evening official bulletin is as follows: Since the last bulletin was issued the President has been moved from Washington to Long Branch. He was more restless than usual last night, being evidently somewhat excited by anticipation of the journey. This morning at 6.30 his pulse was 118, temperature 99.8, respiration 19. We left Washington with the President at 6.30 a.m., and owing to the admirable arrangements made by the Pennsylvania Railroad Company and the long train, the journey was reduced to a minimum. Several anti-epileptic attacks, some signs of the disturbance produced by the journey have been exhibited since his arrival by the effect of temperature and humidity of the air. At present his pulse is 124, temperature 101.6, respiration 18.

Signed: Bliss, Barnes, Woodward, Reburn, August Hamilton.

No News.

Chicago, 6.-The cause of the failure to hear anything more from Long Branch is said to be that an engine, which got loose, knocked all the wires down. They are now busy replacing them. All the wires are railroad property.

Crows of People.

Philadelphia, 6.-General Superintendent Kinney, of the Philadelphia, Wilmington & Baltimore division of the Pennsylvania Railroad, on the President's train. He says it is true his pulse felt 10 beats below reaching Baltimore. The President seemed cheerful, and when asked if he would like to travel faster, replied, "Yes, I rather like it." Kinney says he seemed to be in very good spirits, and was not under the effect of any medicine. He was natural as could be, and occasionally chatted with the doctors. Kinney was surprised to see the number of people who turned out, particularly in the country places, to witness the passage of the train, and even at prominent places, where the crowd of people raised their hats with deprecating and respectful salutes to the gravity of the situation.

A Cottage by the Sea.

Long Branch, 6.-Jesse Grant had the use of his cottage, which is just across the way from where the President will be, for the use of the President's family.

Red War.

San Francisco, 6.-The following is received from division headquarters, Presidio White Pine Barracks, Sept. 4.

The following is from Biddle, for the information of the Division Commander:

B and C Companies and Company G of scouts left the other side of the river at 3 p.m. yesterday, to go to Paymaster Lane's, twelve miles. Overton left the other side of the river, between 9 and 10 o'clock this morning, in two troops to make a forced march to overtake Perrin, when he would assume command and press on to Apache. I can not hear of any hostilities between here and Apache, but Pedro's band, and it is only these, or twice Pedro's band, Overton can whip them. There are straggling Indians on the trail that were in the morning, but parties traveling over it. I ordered Overton to send couriers or small parties back, except to save the command. I think a great many of the Indians in the light have got frightened at what they did and have started for the agency to avoid consequences. I have armed all citizens here about the post about 30 available soldiers here. Expect scouts from New Mexico here tonight on the way to be discharged. This evening, and are able to take care of it. Battery's company will be here tomorrow, when I expect Perrin, and McElwain will form the rear, and proceed to take care of Apache with the force. I will then leave Stay Company here, be able to take care of things up.

(Signed) BENJAMIN A. G.

The following of Kinney, one of the President's band came from White Mountain, Indiana tried to get some San Carlos and Chiricahua to join them; they refused, and are coming back to the Chiricahua. The Chiricahua, who fought Col Carr, are very near the junction of White and Black Rivers. They send word not to go out, but to stay where they were and if the soldiers wanted them to try to take them, to let them try. They say some of Pedro's band of White Mountain Indians are down on Ash Creek. If so, they are probably watching the movements of the troops. I have ordered the troops to ambush or attack them in the rear. Lieut. Glass and a company of thirty-three men arrived here last evening, and can take care of the agency with them and Whitmore. We had an alarm this evening, which proved to be false alarm, but while out on foot in a half finished condition. Henry Middleton was shot through the body, he will probably recover.

Twenty-five men will start tonight to bring Turner and Moody, and will probably encounter Nadeau's band of 30 armed men near the Cherry Creek. It is believed the Indians are in possession of Pleasant Valley, and have killed all the white settlers. Cherry Creek and Pleasant Valley

are the extreme west end of the reservation, and by the nearest route 80 miles west of the Cibola battlefield. It is beyond doubt that there is a general uprising of all the Apaches.

Agent Tiffany sends word that two citizens were killed and one wounded near San Carlos.

Public Prayer.

A special service of prayer for the recovery of the President was held this morning in the Young Men's Christian Association Hall. The Ministerial Union was present in a body. Every seat in the hall was occupied, and crowds were forced to stand.

Chicago, 6.-Rev. I. C. Noble having offered to various churches to receive the use of his church, the Union Park congregation, for services of prayer for the President, all the West Side pastors, united in acceptance of the invitation, and services were held from 10 to 12 in this large and beautiful edifice. On the North and South sides, various churches have meetings for prayer and there is a general observance of to-day as one for divine blessing upon the President and his restoration to health. Business was largely suspended. The Post office, Custom House, Board of Trade and many business houses using it a whole or half a holiday.

Report coming in from all over the country show that prayers are being offered in all large cities to-day for the recovery of the President, and villages and hamlets are joining in the invocation. Services are entirely suspended seems to have been dropped for the time.

The Volcanic Stream.

Advices from Honolulu to August 31st, give reason to believe that the lava flow has ceased to be dangerous.

Irish Riot.

New York, 6.-The Herald's Dublin special says: No political importance whatever is attached to the declaration of a strike by the police on the 31st. The attack on the police was made by a gang of roughs, who have been waiting for some time for a favorable opportunity to revolt against the police. The men who were wounded most severely, as for instance, O'Keefe, the railway porter, who is not expected to recover, were not concerned in the riot. The police were condemned for their hasty action in firing on the people. It is alleged that had the police returned to their barracks at once, the riot would not have assumed such serious proportions. Unfortunately, the superior officers were either absent from the city or took no part in the riot. The police were provided with 20 rounds of ammunition per man, from proceeded to the city and took place to day at the land meeting. When the mayor of Limerick heard of the occurrence, he hastened to the police barracks to prevent a party of police, who were provided with 20 rounds of ammunition per man, from proceeding to the city and taking place to day at the land meeting. When the mayor of Limerick heard of the occurrence, he hastened to the police barracks to prevent a party of police, who were provided with 20 rounds of ammunition per man, from proceeding to the city and taking place to day at the land meeting. When the mayor of Limerick heard of the occurrence, he hastened to the police barracks to prevent a party of police, who were provided with 20 rounds of ammunition per man, from proceeding to the city and taking place to day at the land meeting.

Another New American Steamer.

The Times has the following: Another new iron steamship, built for the Oregon Improvement Company, by John D. Brown, of Portland, Oregon, arrived at her pier in Brooklyn, yesterday. She is named the *Walla Walla*, and will start in a few days for the Pacific coast, with a cargo of lumber and other goods. The new steamer has seven water-tight compartments. She is 338 feet long, with a beam of 40 feet, and a displacement capacity 500 tons. Both her hulls are of iron, and the main deck is guarded by high iron bulwarks, which run the entire length of the vessel. Her engines are compound, and of the very best make. Her stowage, which will accommodate thirty-first class passengers, is in the upper and lower decks. The entrances to it are on either side of the after deck house. The state rooms and dining saloons are well fitted out, and the ship is provided with four large lifeboats, each of which has a large iron cover, and is supplied with a patent steam wrench. The model of the new vessel is a graceful one.

Nilist Threats.

The Herald's St. Petersburg special says: Count Barnoff has just taken leave of the Emperor. The interview was very short and the reverse of pleasant. All that the Emperor said was this: "I think it my duty as a patriot and faithful subject of your majesty to warn you that your movements will be made by the Nilists in two or three months." The Emperor curtly replied: "Your successor, M. Kassoof, has energy and will enough to triumph over them," and turned his back on his visitor.

A Madman.

The Herald's Paris correspondent says: A painful incident cast a shadow over the banquet improvised in Gambetta's honor at Epernay, to-day. A madman tried to force his way into the banquet room, and was only with much difficulty expelled. He declared that he wanted to go to Chamberlain.

The Vice-President.

The Tribune says: The friends of General Arthur say that it is not unlikely he will go to Washington within a day or two. The opinion seems to be gaining ground among the friends of the President, that he will soon to assume the duties of President while Garfield is absent from the seat of government.

General Hayes.

Cincinnati, 6.-At the reception given tonight to General Hayes, 184. The best news of the day was that the burning of the neighborhood of New Lowell. Hayes' going south on the Allegheny, Great and Bruce Railway are said to be prevented going further than Palmerston owing to the railway being burned. Hayes' going south on the Allegheny, Great and Bruce Railway are said to be prevented going further than Palmerston owing to the railway being burned.

Despatch to St. Louis.

Toronto, Ont., 6.-To-day was the hottest September day since 1874. The heat was so intense that many people were burned in the neighborhood of New Lowell. Hayes' going south on the Allegheny, Great and Bruce Railway are said to be prevented going further than Palmerston owing to the railway being burned.

Mrs. Noyes, and a very large number of ladies and gentlemen personally welcomed them back to Cincinnati.

Killed on the Cars.

COUNCIL BLUFFS, 6.-A special dispatch to the *Vanguard* from Shenandoah, Iowa, gives the following particulars of a terrible accident which occurred near that place this afternoon. Passenger train No. 9, north bound, crossed the road, this afternoon, was dived about five miles west of this place, about 3 o'clock. Nineteen persons were more or less injured and one named Thomas C. Leeson, was killed outright, two or three others will probably die. The train, except the engine, tumbled down an embankment about ten feet high. The cause of the accident is not known.

Railway Rumors.

St. Louis, 6.-There is a rumor in railroad circles here that Gould's interests in the railroads centering in the St. Louis and North Western under one management and that there will be one general manager for the Missouri Pacific, Iron Mountain, Texas & Pacific and the International & Great Northern Railroads. It is also reported that the passenger, freight and other departments of these roads will be consolidated under one general agent appointed for each.

The "Criterion."

Chicago, 6.-The Criterion Theatre was opened to-night. It is a new and elegantly equipped place of amusement, situated on Sedgwick Street, near Devon. Albert Munger, the builder and proprietor, is a well known business man of Chicago, and he has established the place there to supply what is felt to be a long standing want of the north division, rather than as a money-making scheme. It starts out, however, with excellent promise. Herbert Vandye, New York, was the
