

MINING, BUSINESS AND STOCKS

WEEK ON THE MINING EXCHANGE

Nearly all Tintic District Stocks Have Suffered Slight Declines.

DALY AND NEW YORK BONANZA

Represented Camp of Park City—Sales of Utah Copper—Today's Closing Quotations.

While the sales of mining stocks on the local exchange during the past week exceeded those of the previous week, the market has been irregular and some of the traders are quoted considerably lower; which is particularly the case in several of the Tintic stocks called. In fact all of them have been more or less affected. Of course the approach of warm weather and investors, as well as brokers, seeking either the seashore or the mountains for a place to keep cool, has all tended to depress. The Park City stocks, Daly and New York have been the most active, both showing slight declines. There has been no local trading done in Nevada stocks in the local market this week.

In the trading today 200 shares of Utah Copper were bought at \$10. This stock has not advanced as rapidly as some imagined it would. A good many counted on it going to at least \$10 a share by July 1 and backed up their judgment by buying the stock up to \$10 a share. It is claimed that the pending option on a large block by the American Smelting & Refining Co. will be exercised in a whole lot to do towards keeping the stock down as investors have not been anxious for it since it became known that American interests were seeking a position where they would have a whole lot to say.

Today's closing quotations and sales were:
