THOMAS BARRATT IS DEAD.

Honored and Well Known Citizen Closes Eventful Career at 76.
Special Correspondence.
American Fork, Utah Co., Jan. 8.—Thomas Barratt, an old and much esteemed citizen of this place, and well known throughout the state, died at his home in the Third ward last night of diabetes, from which he had been suffering for a long time. Not until about three weeks ago was he unable to walk and about.

settlers of American Fork and has always taken an active part in religious and public affairs, having filled many positions of trust. He served the capacity of city councilman for a number of years and various other minor offices in municipal affairs. He acted as counselor to the late Bishop Robinson for a number of years. He was born in Loughborough, Leicestershire, England, March 10, 1830, and was baptized into the Church of Jesus Christ of Latter-day Saints Aug. 12, 1850. At the age of 24 he left England for this country, making a short stay in New Orleans and St. Louis, before coming on to Utah.

CEDAR CITY.

NEW OFFICERS IN CONTROL.

Electric Light & Power Co.—Plenty Of Snow In Mountains.
Special Correspondence.
Cedar City, Jan. 8.—A regular old-fashioned winter prevails here. Snow is about six inches deep, and the prospects for more are quite favorable. Sleigh-riding is quite the rage. It is reported that the snow in the eastern part of the mountains is quite deep, thus affording an ample supply for irrigation purposes for the summer. Sheep and cattle are reported to be doing reasonably well on the winter ranges. Steps are being taken to install an electric light and power plant in the city. A company has been organized with this object in view. Stock has been subscribed almost sufficient to launch the company. The municipality having gone to its full limit in bonding the city to install the water system it is unable to undertake the installation of an electric light plant, so some of the citizens will take it up. In the articles of incorporation of the light and power company a provision is inserted same on reasonable terms, and have exclusive control, thereby making it a people's concern.

The epidemic of scarletina still exists, although in a mild form. The district school will be closed for a few weeks longer.

As Jan. 1 is regarded as a legal holiday the city fathers did not assume control of the municipal affairs until Jan. 2. The outgoing administration held its last meeting Dec. 21, 1905, at administration of the city for the last two years. A brief summary of what had been accomplished and what was

Pain

Wears Out the Nerves.

Do you realize that pain is weakening, and exhausts your vitality? Don't you remember how completely worn out you felt after that last attack of headache, neuralgia, backache, periodical or other spell of suffering? Nearly every case of inflammation, apoplexy, paralysis, epilepsy and insanity is directly due to the weakening influence of pain upon the brain nerves? For this reason every one who suffers from pain of any kind should not fail to get relief as quickly as possible.

You can do this by taking Dr. Miles' Anti-Pain Pills—others do.

"I have used Dr. Miles' Anti-Pain Pills for years, and can say they have never failed. I always keep them in the house. In fact, I had rather be without sugar than the Pills. Previous to using them I had always suffered with sick headache, sometimes being in bed for three and four days, tried nearly everything I ever heard of, but nothing seemed to help at first, but after a short time the effect would wear off. It is five years since I began taking Dr. Miles' Anti-Pain Pills, and the results are as good as 'first night'."

Funeral services were held at the Parsonage on Monday, Jan. 8, for the late Mrs. Elizabeth Humphreys, who died at her home in the Third ward on Sunday, Jan. 7. The services were held at 2 o'clock, and were conducted by Elder W. H. Bishop, with music by the choir. The burial was in the cemetery.

Senator and Mrs. Willis Johnson Lose Little Son by Death.

Special Correspondence.
Circleville, Ohio, Jan. 8.—After a brief but severe illness, Owen, the three-year-old child of Senator Willis Johnson, died last Tuesday night. The cause of the child's death was said by Dr. Lyon, who attended him, to be croup and pneumonia. Anemia, however, Dr. Johnson's had some near dying of the same disease only a short time previous.

Fitting services were held over the remains on Friday.

RIGBY, IDAHO.

OPENING OF NEW SCHOOL.

Intense Cold—Little Coal—Newspaper Changes Hands.
Special Correspondence.
Rigby, Ida., Jan. 8.—When school was resumed on Jan. 2 it was in the new schoolhouse. Mr. Sellers, who is the president of the school board, is the teacher.

Yesterday, however, a more formal opening was held to which all the patrons of the school were invited. Superintendent M. Taylor of Fremont county, the school board of independent district No. 6, and a number of visitors were present. Several appropriate speeches were made and the children rendered some very interesting songs, recitations, etc. The four rooms that are completed are well lighted, and are very comfortable. Still the very is, "Give us room," and no doubt in the winter months there will be a great deal of suffering. The school is a good plan and with a hearty endorsement from the school board, the trustees and the community, it is hoped that the school will be a success.

A good many copies of the Christmas "News" have been taken here and greatly appreciated.

A Rigby Star has changed hands. Mr. E. H. Hines has sold it out to Mr. W. E. Strong of St. Anthony.

LYMAN, WYO.

WANLASS-MARSHALL NUPITALS.

Vacancy in Bishopric Filled—Missionary Farewell—Sad Death.
Special Correspondence.
Lyman, Wyo., Jan. 8.—The weather has been very cold and the snow is deep. A conference was held here recently. A vacancy in the Bishopric was caused by the removal of Jacob Hamblen to Provo, Utah. This was filled by James E. Lyre, Pres. Haxton and McKinnon and several others were present.

A farewell party was tendered Elder Jesse Brough, who leaves for a mission to Great Britain this week. He is the son of Bishop Brough, and one of Lyman's brightest young men.

WANLASS-MARSHALL NUPITALS.

E. F. Marshall of Lyman, son of Mr. and Mrs. E. Marshall, and Miss Mary Wanlass, daughter of Mr. and Mrs. James Wanlass of Diamondville, Wyo., were married in the Salt Lake Temple Wednesday, Jan. 3. The groom is the son of the Woodruff stake, and will leave on June 24 to the close of the season in the Woodruff stake to the Southern States.

The bride is principal of the Lyman school, and an active church worker. Both are highly respected young people of Lyman. The Christmas holidays passed quite pleasantly. Some of the young people left to spend the vacation in other places, and the young people attending school in Lyman and elsewhere came home for the holidays.

A very sad death occurred here recently. Mrs. Lizzy Overly Rider, who died at her home in Lyman, was the wife of the late president of the Y. M. M. I. A., also a local infant.

There is quite an epidemic of colds among the people.

COAST LEAGUE TO LOSE MANY MEN.

Big Organizations Take a Liking To the California Ball Tossers.

SOME HEAVY INROADS MADE. Tacoma Club Suffers More Than Any Other—Los Angeles Bunch Escaped Unscathed.

According to San Francisco advice one of the heaviest inroads ever made on a minor league took place this fall when the American and National leagues took from the Pacific coast league eleven of its best players by purchase and draft. The Tacoma club suffers most by the bird-plucking act of the major leagues, while Los Angeles, which club captured the championship of the coast, escaped unscathed. San Francisco was forced to part with two of its best slappers, Whatley and Hill, and the nation's crack first baseman, Oakland lost "Doc" McKeen and Jimmy Hynes. Seattle had to part with Pug Bennett. Portland will have to hunt for a new second-baseman to replace Schmitt, while King is expected to lose some scurrying to round his incoordinator with sufficient material to make up for the hitching out of Nordyke. While all of these players will not make good, it is safe to say that a large number of them will hold their own in any company. The coast league is certainly the strongest minor league in the country and plays second only to the American and National, so the pick of the organization should be able to play fast enough to outshine in any company.

Several of the players selected are just budding out as professional ball players. The Tacoma club has been edged over of competent judges of diamond artists predict a brilliant future for them.

The Pacific coast has furnished many a crackerjack ball player. It is only necessary to recall the names of the well-known diamond celebrities who originally tossed the sphere in this vicinity. Who are some of the present-day stars in the baseball world to show that California is one of the best places in the country for a baseball player to develop.

SOME NATIVE SONS.

Jimmy Fogarty, Sweeney, Fred Carroll, Jay Hughes, Bill Lange and Joe Corbett are a few of the old-timers who made their mark on California soil, while Hank Chance, Rip Van Halten, Sam Mertes, Donlin, Hal Chase, Elmer Strickland, Danny Shay, Ove Overall and Luke are some of the present-day stars who came from this coast.

The following players have been purchased and drafted:

JIMMY WHALEN
Was San Francisco's standby for several years, and when the locals won the pennant in 1904 it was "The Whale's" strong arm that carried them to the top. He is now in the hands of the American league, having been purchased by the Boston Red Sox.

LOUIS NORDYKE, the crack first baseman of the Tacoma club, was sold by Manager Fisher to the St. Louis American league team. He is a crack player and a good consistent hitter. He originally came from the Pacific coast, but was switched to him over to first base, where he has put up a masterly record. He is a crack player and a good consistent hitter. equal to "Kid" Mohler, the fast little second baseman of the Seals.

"Doc" McKeen, the most graceful player in the league, has been drafted by Chicago. McKeen can play almost any position on the diamond and puts up a good game no matter where he is stationed. He is a fair thrower and played a very good game at first base during the second half when Oakland released Julie "Doc" McKeen, however, lacks glister and religiously refrains from slapping. If he wakes up and gets into the game with half as much gusto as Brock Devereaux he will be a shining mark in any company.

Jimmy Brynes, the promising Oakland backstop, was drafted by Connie Mack of the champion Athletics. Brynes has the whip and is an excellent catcher. He, however, is a little slow in his movements, but under the watchful eye of an old slinger like Connie Mack he should develop into a star backstop. He joins a club that already has two of the best catchers in the business—Olie Schreckengost and Powers—who he will in all probability be used as a utility man the first year.

A MYSTERIOUS STONE.

The curious stone shown in the cut was found recently in an old building in West Philadelphia and has attracted much attention from scientists all over the country. It is known to be an idol

of Aztec origin, but its exact history is a matter of lively speculation. It is carved in limestone, and its worn and seamed appearance denotes great age. For awhile it was believed that it had been stolen from some collection, but no one has claimed it thus far, and its origin and history are still shrouded in mystery.

PATENTS.
We beg to announce for the benefit of our readers and inventors generally that we have established in connection with our paper a patent bureau and have associated with us at Washington, D. C., an attorney who has been in continuous practice for the past 20 years and we will guarantee that any patent matters placed in our hands will receive prompt and careful attention, and that the charges will be moderate in all matters relating to patents.

Inventors are requested to send us a rough sketch and description of their inventions and we will have our attorney give a free opinion as to whether a patent can be secured.

If an inventor desires a search of the patent records made and a report submitted giving opinion as to securing a patent and sending copies of all patents in the line to which his invention relates, he should send \$5.
