#### Gen. Woodgate Dangerously Wounded-Gen. Warren Thinks the Boer Position Untenable.

London, Jan. 25, 9:45 a. m.-The war office has received a telegram stating that Gen. Warren has occupied Spion Kop.

The war office has just issued the following dispatch from Spearman's camp. dated January 25, 12:10 morning:

"Gen. Warren's troops last night occupied Spion Kop, surprising the small garrison, who fied. It has been held by us all day, though we were heavily attacked, especially by a very annoying shell fire.

"I fear our casualties are considerable, and I have to inform you, with regret, that Gen. Woodgate was dangerously wounded.

"Gen, Warren is of the opinion that he has rendered the enemy's position untenable. The men are splendid."

New York, Jan. 25 .- Dispatches from London describe the terrible anxiety all Wednesday while the people waited for news of the promised night assault on the Boer stronghold of Spion Kop. The news printed in this morning's London papers is of indecisive fighting on Tuesday. The correspondents' latest dispatches describe the Boer position as almost impregnable. When no news came from Buller last night the most hopeful people in the London streets and clubs decided that the general must have reconsidered his purpose to at-tack Spion Kop Tuesday night. If he had made the assault and won, the news of his success would have been given out promptly.

Brussels had a report that Buller had been defeated and this report found credence in Berlin, where the military ex-perts say the British army is in a bad way. Putting the best face on the matter for the British, the Boers seem to have brought Builer to a standstill again, and there is small chance that the Salisbury ministry can face parlia-ment next Tuesday with a victory to England's credit. The London Morning Post expert dis-

cusses plans that could be adopted in the event of Buller's defeat. The des-perate situation of Ladysmith, whose garrison is perishing of disease, makes it imperative to continue relief efforts. The London morning papers do not attempt to minimize the gravity of the situation. The Daily Telegraph says:

of his indictment of the "policy which led to hostilities.'

He ridiculed "the notion that a few Boer successes entitle the Transvaal to be described as a first-class military power," and declared that "the fact of the Boers sending the ultimatum no more disposed of all other questions than the defiance of the Ameri-can colonists in throwing the tea into Boston harbor disposed of all the ques-tions of the war of American independence

"It is quite certain," continued Mr. Morley, "that had the government appreciated the temper of the Transvaal people and foreseen what was coming -what we all know in these black gloomy days-there would have been no war. It is doubtful, but true, that a want of foresight and decent information led the government to stumble into war in the dark. Lord Salisbury's menacing speech of July 28th, if applied to a great power, could only have meant war.

"It was absurd, if the government really believed in a Dutch conspiracy, to spend time in negotiations regard-ing the franchise. The conspiracy was an afterthough of the government, conjured up to cover a hideous and ghastly blunder.'

In conclusion, Mr. Morley declined commit himself as to what would

It was said last night that an attempt which now promises success, is being made to place the trust on a better financial basis, and that a large working capital is to be provided, in which case the secession movement will be checked. Officials of of the company, when seen yesterday, denied in positive terms that there is any probability of disintegration. They admitted that there had been propositions to purchase certain of the mills controlled by the company, and fully confirmed the story that a plan is well under way which will provide ample working capacity and which will place the company upon a sound financial basis.

Conferences have been held in this city, there being present Geo. Urban, Jr., of Buffalo, President of the U.S. Flour Milling company; Jacob Amos, of Syracuse, vice president; Thomas A. McIntyre, secretary, and A. C. Loring, manager of the Northwestern Milling company of Minneapolis.

by 12,500 barrels. The storage elevator capacity of the combination is now about 3,000,000 bushels.

Under the appraisement which was made when the combination was formed the real estate, machinery, water and steam power, docks, warehouses, elevators, etc., were valued at \$10,500,000, Personal property brands with the trade marks and good will were valued at \$4,250,000. The cash working capital was \$1,125,000, giving total assets of \$16,-000,000. To this should be added the \$1,500,000 paid for the Northwestern Miling company's plants.

Chartered accounts last May certified that the average net earnings of the combined mills amounted to \$922,873. At that time it was estimated that as a result of the combination there would be a net saving in the operating ex-penses of \$500,000. This amount, however, was cut in half by the account-ants to insure safety. The prospectus, which was issued last May, showed the expected total of the available net in-come to be \$1,172.873, which is equal to six per cent on \$7,500,000 bonds; six per cent on \$5,000,000 preferred stock;

seven per cent on \$3,500,000 of common stock; net surplus \$177,873. Again to these figures must be added the net earnings of the Northwestern Milling company, which are said to amount to \$300,000 a year, and which should make the securities of the U. S. Flour Milling

company more valuable in the market than they were when first issued. So far from this being the case, how-

ever, the stock both common and pre ferred as well as the bonds, are, and have been for some time inactive in market. The last reported sale of the bonds gave them a quotation of fifty per cent of their face value. There have been no offers for the common stock, which is nominally held at 25,

The Rev. W. G. Read Mul-lan, president of the Boston College, said last night: "All the statements made by President Ellot relative to the curriculum of Jesuit colleges in this country have already been refuted by the Rev. Timothy Broshan of Wood-stock College, in Maryland, and the paper which he had published on the subject shows President Ellot to badly at fault not only in his so-called facts but in his conclusions."

It is semi-officially announced that the government has intimated to the heads of the royal Irish constabulary that it will accept a picked corps from that body for service in South Africa, and that volunteers will be called for. The British losses up to date in killed, wounded and captured, according to Gen. Buller's last list, totals 8,216 men.
