IN SPLENDID SHAPE.

The Rio Grande Western is looked upon as being a progressive road in ev-ery sense of the word, and it is said that the members of the Bogue party of "experts," who went over every foot of 'experts,' who went over every foot of the property some two weeks ago in the interest of George J. Gouid, were loud in their praise of the physical con-dition of the line. Ever since the pres-ent list of officials has been at the head of affairs directing the heim the road has been a moneymaker_from the word "go." has been absorbed in the community of interests" everyone here is wonder-ing what will be the next step which will be taken. While none of the officers or employes over at the general offices are suffering from pen paralysis today, at the same time they are rather an-xious as to the outcome of the consolidation, and feel that while they were laughing at the Short Line employes some weeks ago that they are in the same boat today. Misery loves com-pany, and there have been several ex-changes of conductors being and the several exchanges of condolences on Railroad Row today among those who are en-acting the role of Damocies in the hairacting the role of Damocles in the hair-suspended sword act. That the "com-munity of interest" is to be operated in the interest of economy before senti-ment goes without saying. Nothing will be done possibly in the direction of cut-ting down the forces before next fall, but those affected are beginning to fore-cast all kinds of dire calamities in the near future, and are prophesying that there will not be two sets of offices there will not be two sets of offices anywhere to look after the interests of the combined roads. Not only does this affect Salt Lake, but there will be no necessity of running general agencies of the Rio Grande Western and the Den-ver & Rio Grande in other citles of the country. One or the other of the of-

fices will have to go in every town where they have representation.

COMMUNITY OF INTERESTS.

The same policy that has been put ato operation on the Union Pacific in into operation on the Union Pacific in regard to the Oregon Short Line and the Oregon Railroad & Navigation company will also be in vogue with the Gould lines and other roads which are to be consolidated in the future in the community of interests and the upholding of the rates. Not only are the rali-road men in Utah wondering where this thing is going to end, but there are thousands of railroad men scattered throughout the length and breadth of the United States who are shaking in & Salt Lake road has commenced operto the extent of placing a corps of sur-veyors in the field. The railroad magnates have ordained that rate cutting must stop, and that freights shall be equitably divided among the roads, consequently in due season there will be no use for the energetic freight and passenger rustler who gets out on the highways and byways and captures the cars of freight.
