## The Metal Output of Idaho

Latest Figures as Given by H. S. Woolley, As-  
sayer in Charge, U. S. Assay Office.

THE latest official figures re-  
garding the metal output of  
Idaho have been furnished to  
the Christmas News by H.  
Smith Woolley, assayer in charge, U.  
S. assay office, Boise. They are as fol-  
lows:

The total value of the metals pro-  
duced in Idaho during 1903 shows a  
gain of five and a half million dollars  
over that of the previous year. The  
output of each metal shows a sub-  
stantial increase, but it is in the silver  
and lead mining that the greatest ad-  
vancement has been made. The pro-  
duction of silver increased from  
5,942,714 fine ounces in 1902 to 6,915,936  
ounces in 1903, while that of lead  
jumped from 158,606,488 pounds to  
214,552,869 pounds. The production of  
gold showed an increase of about 10-  
000 fine ounces.

The great silver-lead district of the  
state being in the comparatively small  
area embraced in what is known as  
the "Coeur d'Alene," conditions which  
govern the mining in this section con-  
trol to a large extent the output of the  
state in these two metals.

During the past year the embargo  
placed on the output of lead by the  
smelter trust was removed, thus en-  
abling the operators to work their  
properties to the fullest capacity.  
Through the organization of the min-  
ing companies and the establishment  
of an employment bureau, the labor  
situation has been much improved, the  
union no longer being able to dictate  
in any of the essential matters relat-  
ing to working the mines.

The total output of silver in the  
Coeur d'Alene district for 1903 was  
6,471,620 fine ounces, while that of lead  
was 207,382,445 pounds. This result is  
obtained from a compilation of the  
actual returns from the various min-  
ing companies of the output of their  
respective properties.

The unrestricted output of the mines  
has encouraged the owners to make  
important improvements involving a  
large investment of capital, which  
more than anything else demonstrates  
their abiding faith in the permanence  
of the district. During the year an  
electric power transmission line was  
completed from Spokane Falls to  
Burke, a distance of 101 miles, which  
carries about 1,500 horse power. The  
displacing of steam power by electri-  
city for all purposes in the district  
marks a revolution in mining progress.  
New machinery has been installed in  
several of the mines and a large  
amount of development work carried  
on, which points to a still further in-  
creased output for the coming year.

The organization of the Federal  
Mining and Smelting Co., which in-  
volved the consolidation of the Stand-  
ard, Tiger-Poorman, Mammoth and  
Empire-State properties, represents  
one of the great mining deals of the  
year, the capital necessary for the  
proposition approximating \$30,000,000.

The output of gold from the state  
made some increase, due largely to the  
activity in quartz mining. The placer  
output has remained practically the  
same for several years. The installa-  
tion of dredging enterprises along  
Snake river in Boise Basin and around  
Warren may increase this in the next  
few years. In quartz mining the  
greatest activity has been displayed in  
the developments of the two youngest,  
though perhaps best known districts  
of the state, The Hump and Thunder  
Mountain. In the former there was a  
large increase credited to the Jumbo  
and Cracker Jack mines, the only two  
which have entered the field as regu-  
lar producers. Several other prop-  
erties will be equipped with mills this  
coming year.

In the Thunder Mountain district,  
development work has been retarded  
owing to the inaccessibility of the re-  
gion. Several large companies have  
been working their claims, but installa-  
tion of mills and reduction plants  
has been impossible. The state wagon  
road was not completed in 1903 and  
all supplies and tools were packed in.  
The Lacey mill, the only one in the  
locality, has been running with five  
and ten stamps and has been a regular  
bullion shipper. This mill was con-  
structed with the special purpose of  
being packed in on mules and horses.  
As soon as the road is opened a larger  
plant will be constructed.

This coming year other mining com-  
panies will rush machinery and sup-  
plies in larger quantities towards the  
camp, with the expectation of getting  
them in before fall. Active work will  
begin on the wagon road as soon as  
the weather will permit and it will be  
hastened to completion. The fact that  
the large companies which have  
been doing development work have  
satisfied themselves as to the extent  
and value of the ore bodies sufficiently  
to warrant large expenditures for ma-  
chinery indicates that the district will  
soon be in the list of large gold pro-  
ducers.

The year just passed has witnessed  
the beginning of an epoch in the min-  
ing industry of the state in what may  
be deemed the advent of copper min-  
ing. While copper has been produced  
in the past for a number of years in  
small quantities, it was not until 1903  
that the product was of sufficient quan-  
tity to merit a place in this report.  
Judging from the amount of this metal  
harvested within the year and the  
known substantial condition of the  
mines from which it was taken, cop-  
per mining can, on a conservative ba-  
sis, be reckoned among the fixed and  
important industries of the state.

The copper product is reported from  
Matsela Co. in the central portion of  
the state, where the White Knob  
Copper Co. has established a large  
smelter at Mackay, and from Washing-  
ton county on the middle western bor-  
der. In the latter county the Ladd  
Metal Co. has established a smelter at  
Mineral for the treatment of ores  
from that locality and the Seven De-  
vils district. There is no doubt but that  
this district has very large bodies of  
high grade copper ore. The only hin-  
drance to its extensive development is  
the lack of communication.

## OGDEN MILLING & ELEVATOR CO.

The largest wheat milling concern  
in this state, and for the matter of  
that it is the largest between Denver  
and San Francisco—is the Ogden Mil-  
ling and Elevator company. It is a  
corporation. It was created in 1888 and  
has an authorized capital of \$200,000,  
divided into shares of \$100 each. The  
officers of the corporation are as fol-  
lows:

President and manager, James  
Mack; vice president, Joseph Clark;  
secretary and treasurer, Henry M.  
Mack. Those with the following gen-  
tlemen comprise the board of direc-  
tors: David Eccles, Joseph S. Peery,  
Geo. W. Perkins and Fred J. Kiesel.  
James Mack, Esq., the president and  
manager of the corporation, began his  
career in Utah nearly half a century  
ago as a young immigrant from Scot-  
land. He learned the trade of car-  
penter and millwright, and while still  
a young man became the owner of a  
saw mill at Smithfield, Utah, where  
he resided above 35 years. From his  
youth he displayed unusual energy, in-  
dustry and business ability, the re-  
sult being his present position at the  
head of the largest concern of the kind

In the entire intermountain region.  
His personal popularity has fully kept  
pace with his prosperity and promo-  
tion in business, until today he stands  
among the most prominent and re-  
spected business men of the state.

Joseph Clark, Esq., vice president of  
the corporation, is widely known as  
one of the solid, wealthy and influen-  
tial business men of the Junction  
City, where he is interested in many  
enterprises and is very highly respect-  
ed.

The secretary and treasurer of the  
corporation, Henry M. Mack, Esq., is  
the son of the president, and entered  
upon an active business career while  
still a mere youth. He is widely  
known and much respected as a cap-  
able and popular young business man.  
This company controls three large  
flouring mills, two of them in Ogden  
and one in Riverdale. The largest of  
the three is the Phoenix mill, which is  
located at 1450 Washington avenue,  
Ogden, was owned for many years by  
the late Hon. D. H. Peery and James  
Mack, Esq., under the firm name of  
Peery & Mack, and under their own-  
ership it became a noted property. The  
building was well situated for the pur-  
pose for which it was constructed, and  
it is thoroughly equipped with the  
most modern and latest improved ma-  
chinery. It is five stories high and its  
ground dimensions are 55x55 feet. A  
four-story elevator, and three large

bins inside of the mill, having a ca-  
pacity of 40,000 bushels of wheat, a 75-  
horse power turbine water wheel and  
an electric motor furnish the power  
for propelling the machinery in the  
mill and elevator. The latter is con-  
veniently arranged and equipped for  
unloading, transferring and storing  
wheat and other grains.

The next largest mill of the three is  
the Advance mill, which is located at  
1950 Washington avenue, Ogden. It is  
a three-story structure of brick and  
stone, and has a daily capacity of 100  
barrels of flour. It is provided with  
both water and steam power, which, in  
combination, yield 100 horse power.  
In connection with this mill are two  
warehouses, having a combined stor-  
age capacity of 25,000 bushels of wheat.  
This mill has been long established,  
and became very popular under for-  
mer owners. It was the first mill in  
northern Utah to be provided with  
mill stones which were furnished by  
Utah quarries.

The Riverdale mill is a stone and  
frame structure, three stories and  
basement, and is located at Riv-  
erdale, two and a half miles from  
the business center of Ogden. Power  
is furnished by a 50-horse power water  
wheel. Near this mill is also a large  
warehouse and a 10,000 bushel elevator.

The Ogden Milling & Elevator com-  
pany is composed of Ogden business  
men, and it is, in the fullest sense, a  
home industry. Its influence on the  
welfare of the community is wholly  
good and is very marked. It is an  
institution that reflects credit upon  
Ogden, and aids the farmer to turn his  
grain into cash on the most advan-  
tageous terms.

On the other hand, Ogden is a well  
chosen seat for such an enterprise. It  
being the chief railroad center of the  
intermountain country, the most con-  
venient point with reference to the  
wheat purchasing markets of the west,  
and having the most convenient ship-  
ping facilities towards all points of the  
continent.

The company manufactures and  
deals in the highest grades of flour,  
including high patent, straight grade  
and baker's fancy. Its leading brands  
are the following: Ogden's Best, Vic-  
tory, Phoenix, Eagle and Standard.

The company also manufactures and  
deals in bran, corn meal, and all kinds  
of mill stuffs, and is always in the  
market to buy grain.

The vast amount of wheat required  
to keep these three mills busy makes  
this company a very important factor  
in the wheat market of Utah and Ida-  
ho, and especially in the commercial  
life of Ogden. Its business greatly  
increases the amount of wheat shipped  
into Ogden, and it is instrumental in  
elevating among the farmers a cor-  
responding volume of cash.

The company consumes at its three  
mills over 200,000 bushels of wheat per  
annum, which, at the present price of  
that product of the soil represents a  
very large sum of money to be dis-  
tributed by one concern among the  
farmers. The payroll of the mills is  
about \$15,000 per annum, and affords  
support to about twenty families.

All three of the mill buildings were  
specially erected and equipped for flour  
mill purposes and all are fitted with  
modern devices to reduce the cost of  
manufacturing wheat into flour.  
The growth of the shipping business of  
this company has been steady and  
rapid ever since it was incorporated,  
until at length it has attained sur-  
prising proportions, especially in the  
area of country which it covers. It  
extends from Canada on the north to  
Mexico on the south, and from the  
Mississippi river to the Pacific coast.  
It even extends to the Sandwich Is-  
lands, Japan and China. It is a concern  
which has helped to make Ogden fa-  
mous.

The company solicits inquiries for  
quotations, and orders for flour and  
mill stuffs, from all points in the sec-  
tions which are traversed by the rail-  
roads that center in Ogden, and is al-  
ways ready to pay the highest price for  
grain from those points.

The management of this company has  
always been characterized by the  
highest standards of integrity, and by  
business judgment and executive abili-  
ty of a rare order. Its reputation for  
fair and honorable dealing is truly en-  
viable, and the future promises for it  
a continued rapid growth and unbro-  
ken prosperity.

## CANCER CURED

WITH SCOTCHING BALMY OILS.  
Cancer, Tumor, Catarrh, Piles, Fistula, Ulcers,  
Scrofula and all Skin and Female Diseases. Write  
for Illustrated Book. Sent free. Address  
DR. BYE, Broadway, Kansas City, Mo.

## Asthma and Hay Fever Cured.

The truly marvelous cures of Asthma,  
which are being effected by Dr. Schiff-  
mann's Asthma Cure certainly call for  
notice.

Rev. G. L. Taylor, of Washburn, Ill.,  
says: "Some 7 years ago my wife used  
several packages of your Asthma Cure  
which resulted in a permanent cure."

A Hay Fever sufferer writes: "I have  
been a sufferer from Hay Fever for over  
20 years, and it seemed harder every year.  
The first night I used your Asthma Cure  
I was greatly relieved. It cured my cough  
after using a few times. I shall recom-  
mend it to all sufferers of Hay Fever."  
Mrs. Martha Silversen, Leisburg, Mich.  
Sold by all druggists at 50c and \$1.00.  
Send 3c stamp to Dr. E. Schiffmann, Box  
505, St. Paul, Minn., for a free trial  
package.

## LAST CHANCE TO GET TEETH

AT THESE REMARKABLY LOW  
PRICES.

Remember these prices are for the month of December only, and  
if you want to avail yourself of this opportunity of securing the  
best and most reliable dental work to be had in the city at almost  
one-half the regular prices come in this week.

During December We Will Extract  
Your Teeth Free.

Full Set of Teeth (that fit) \$5 | Bridge Work . . . . \$5  
Gold Crowns . . . . \$5 | Fillings . . . . 50c up

We do this to demonstrate our methods and to introduce our new  
and original Zylontite Plate. The lightest and most natural set of  
teeth ever made. Will outwear a dozen ordinary plates. They are  
fitted with our patent corrugated suction, which insures a perfect,  
tight-fitting plate, upper or lower.

Office open 8 a.m. to 7 p.m. Sundays, 10 to 2.  
ALL WORK GUARANTEED FOR TWENTY YEARS.  
Examination and Advice Free.

BOSTON DENTAL PARLORS,  
126 SOUTH MAIN STREET.
