ANNUAL REPORT.

Recommends Enactment of Law For Arrest of Defendants Within Limits of United States.

IT IS ABSOLUTELY ESSENTIAL.

Possibility of Delays Under Present System Renders Power of the Government Ridiculous.

Washington, Dec. 5 .- Atty.-Gen. W.H. Moody, in his annual report to Congress recommends the enactment of a law which will provide in substance that where an indictment is duly returned where an indictment is duly returned to a court of the United States, the judge of that court may, in his discretion, issue a bench warrant for the arrest of the defendants wherever they may be found within the territorial limits of the United States, and that it shall be the duty of all persons authorized to serve such process to arrest the person or persons indicted, and if they fail after reasonable opportunity to furnish ball for their appearance, to bring them to the court in which the bring them to the court in which the indictment has been found. The attorney-general explains that much embarrassament in the administration of law has arisen from the inability of the United States to bring an offender to the place and the court where by the Constitution and law's accusation against him must be tried. By the Constitution the trial of all claims must be be held to be held in "the state and district wherein they shall have been commit-It frequently happens that persons accused are not found with-in the limits of the district where the offenses alleged against them are triable. The frequency of such absence increases with the gravi-ty of the accusation, and where it con-

sists in a conspiracy almost invariably one or more of the alleged offenders are without the jurisdiction of the dis-trict. That at some time injustice trict. That at some time injustice might result to individuals, says the attorney, cannot be denied. The occasional abuse of power is inseparable from its existence. That innocent men now and then are indicted for crime must be confessed but the indictment of a grand jury guided as such a body usually is by the instructions of the judge and the counsel of the district attorney, affords assurances that such instances of oppression will that such instances of oppression will be rare indeed. On the other hand the possibility of delays and defeats of justice which the present system af-fords renders the power of the United States ridiculous and brings contempt upon the administration of the law. In support of his views, Mr. Moody cites a number of cases under the present laws in which justice has been defeated or greatly delayed and large expense unnecessarily incurred by the govern-ment. Among these cases is that of the co-defendants with Capt. Oberlin M. Carter in the Savannah harbor improvement frauds. Mr. Moody outlines the proceedings and says that only after a delay of 26 months did the United States reach the point where, under the law, it was permitted to take men charged with a grave crime to the their trial. Then the two defendants whose presence was most desired, fled the country, and although persistent and continued effort for their recovery has been made, they are still at large. Until they shall be apprehended, it has

been deemed undesirable to proceed with the trial of the other defendants upon the indictment. Another case he says, is that of George W. Beavers, under indictment

in connection with the postoffice frauds. In relation to this case the attorney general says:
"When Beavers can be obtained for trial, no one can predict with certainty, How much further immunity from trial the intricacies of practise, the delays of the courts and the ingenuity of counsel may serve to procure for him, no one can foretell. It can only be hoped that at some time before the wit-nesses are dead and forgotten the circums ances the power of the United States may be proved to be sufficient to bring the accused the 228 miles ap-

pointed by the Constitution, for his Another case is Hyde, Benson, Dimon and Schneider, indicted in February ast in the District of Columbia for defrauding the government of large tracts of public lands. DAILY GRAIN LETTER.

Messrs. Logan-Bryan of Chicago tele-graph their local correspondents, James A. Pollock & Co., over their private wire, on the grain and provision situation, as follows:

Chicago, Dec. 5 .- Wheat-Broomhall cabled weather again unsettled and threatened damage to Argentine har-vest. A private cable from Melbourne reports Australia crop seriously damaged by heat. World's shipments 1,300,-000 less than last week, visible supply increased 900,000 less than last week. On passage wheat increased 192,000 against \$6,000 last week and 1,696,000 last year, Minneapolis advices report very emand for cash wheat in that market. Market opened fractionally higher than faturday's close and at no time during he session did it show any hesitancy or inclination to react. The trade was broad and by far the most active we have had for at least a month. The ews of serious damage to the Argenthie crop has been the ruling factor and causing an advance and has been pretty generally distributed throughout the trade. All foreign markets while steady to higher are not expected by the reexaggeration of facts. houses have been active buyers all through the session. This is the third lay of the advance and ending as it does, sharply, higher than the previous session, would indicate there has been possibly some profit taking by the strong interests who have been accumuating wheat and supporting prices during former declines. The short interest has been eliminated, weakening the speculative market just so much. til news of serious damage to Argentine crop is confirmed we would hesitate

about dealing too enthusiastic on the long side of wheat at their prices. Corn-Larger receipts than expected and acceptances by the country combined with sales by cash houses caused an easier feeling to exist in this market. The trade has been broad and at the expense of values. Liquidation in Deember was the feature. The continued to market, which for a time may bring temporarily lower prices. On de-cline today resting orders absorbed some corn and little buying by shorts and provision people steadled the market somewhat. At the moment we feel orn may see somewhat lower prices, but on any pronounced setback we faver purchases for moderate profit. Oats-This market declined in

it no time large and very professional We see nothing in the tarket to change conditions and action would indicate market likely to rule a very narrow calping affair. Scaiping affair.

Provisions—A prominent packing concern recently talking bearish on provisions supported large. Until the hog market shows some improvement we doubt very much if any extreme advance can come in this market. We
