

MINING, BUSINESS AND STOCKS.

AMONG THE STOCK BROKERS

Daly-Judge is Quoted Considerably Stronger Today.

DALY-WEST ALSO HIGHER.

Lower Mammoth, Too, Continues on The Upgrade-Montana-Topoah Brings \$1.15 Per Share.

This forenoon's transactions on the mining stock exchange amounted to the sale of 12,510 shares, which brought \$22,215. Some of the traders exhibited a little more strength than they did on Saturday. The adherents of Daly-Judge rallied gallantly to the support of that Park City stock, which belonged to the tobacco party last week. During the regular call one buyer was offered under \$2.00; bidders, however, would not meet the price. On the open board 300 shares went at prices ranging from \$9.30 up to \$10.40 per share. Daly-West also picked up, compared to Saturday's quotations. The closing bid on that day was \$12.50. The stock sold up to \$12.75 today. Lower Mammoth was another active stock this forenoon, and it went higher, closing at 20 1/2 cents. May Day remained unchanged; Utah fell out of the board at 7 1/2 cents, while Century was found down to 4 1/2 cents.

There has been considerable hustling about for Montana-Topoah stock during the past few days at advanced figures. Buyers are willing to pay 25 cents per share more for it now than they would were a week ago. This morning 700 shares sold at \$11.50. The closing quotations and sales were as follows:

MAY DAY DIRECTORS.

Visited Mine Yesterday—Matter of Management Not Yet Determined. James A. Cunningham and L. H. Farnsworth returned last night from a pilgrimage to Tintic with the other May Day directors. When seen about noon, Mr. Farnsworth did not feel disposed to give expression to his findings but rather informed that he was disappointed in conditions. He stated that the matter of choosing a secretary and manager had not yet been discussed. Directors Alvin E. Snow and Ed. W. Duncan remained over until today in order that they might make an inspection of the Martha Washington mine.

CONTRIBUTIONS ON GEOLOGY

Important Publication Which Will Soon be Issued.

VALUABLE TO MINING MEN.

Will Contain Sixty Papers Written by Eminent Men Now in Service Of the Government.

The information comes from Washington, D. C., that the United States Geological Survey has in the press a valuable publication which will be of much interest to mining men. It is in the nature of a report of contributions made to economic geology in 1902. The publication is well described in the introduction by Dr. C. W. Hayes, who says: "This bulletin has been prepared primarily with a view to securing prompt publication of the economic results of investigations made by the United States Geological Survey. It is designed to meet the wants of the busy man, and is so condensed that he will be able to obtain results and reach conclusions with a minimum expenditure of time and energy. It also affords a better idea of the work which the survey as an organization is carrying on for the direct advancement of mining interests throughout the country than can readily be obtained from the more voluminous reports. Should this bulletin be favorably received by those interested in the development of the mineral industries of the United States, it is proposed to publish, early in each calendar year, a similar bulletin containing the results of the last year's work in economic geology. The papers included are only such as have a direct economic bearing, all questions of purely scientific interest being excluded. The papers may be divided into three classes: (1) Preliminary discussions of the results of extended economic investigations, which will later be published by the survey in more detailed form; (2) comparatively detailed descriptions of occurrences of economic minerals, noted by geologists of the survey in the course of their field work but not of sufficient importance to necessitate a later and more extended description; (3) abstracts of certain economic papers which have appeared in survey publications during the last year, chiefly such as give a general account of the distribution and mode of occurrence of particular mineral deposits throughout the United States. The character of the contents of this publication may be illustrated by the titles of a few of the 60 papers contained in it: 'Investigation of Metalliferous Ores' by S. F. Emmons; 'Placer Gold Mining in Alaska in 1902' by A. H. Brooks; 'Gold and Pyrite Deposits in the Dahlonega District, Georgia,' by E. C. Eckel; 'Mineral Deposits of the Bitterroot Range and the Clearwater Mountains, Montana,' by W. Lindgren; 'Gold Mining in Central Washington,' by George O. Smith; 'One Deposit of Tonopah and Neighborhood, Nevada,' by J. E. Spurr; 'One Deposit of Butte, Montana,' by W. H. Wood; 'Lead, Zinc, and Fluorapatite Deposits of Western Kentucky,' by E. O. Ulrich and W. T. Smith; 'Coal Fields of the United States,' by C. W. Hayes.

JUNO GROUP OF CLAIMS SOLD

Wisconsin Party Takes In This Thunder Mountain Ground.

CONSIDERATION IS \$50,000.

Property is Well Known in Idaho's Gold Camp—Hosonians Purchase A Montana Mine.

Special Correspondence. Butte, Mont., April 12.—Advices from Lewistown, Idaho, say that Banker Walter C. Brooks, of Wisconsin, has closed a deal in the Thunder Mountain district for the Juno group of claims, formerly owned by Geo. Stonebreaker and a number of Idaho people. A bond in the neighborhood of \$50,000 is understood to have been taken on the properties and the first payment made. Brooks is understood to be acting in the interests of Duluth, Saginaw and Detroit capitalists. Boston people have secured control of the celebrated Black Lead group of claims in the Bitter range of mountains. No particulars of the deal are obtainable, other than a change of control has been effected and as soon as the snow has left the properties would be fully exploited. The Black Lead group has excited much interest in mining circles of this section owing to the immensity of the copper output.

from Mexico, where he has been for sometime giving attention to mining interests. The three-cent assessment levied on the stock of the Carissa Mining company is delinquent. Next Saturday is sale day. Senator Kearns will spend this week in Park City to make careful investigation of the Silver King and other properties in which he is interested. The trial of the Chicago-Bingham Mining company, vs. the Ben Butler Mining company comes up next Saturday. The controversy is over apportionment of the Silver King claim, rights to the Liberal lead mining claim. Charlie Parker came up Monday night from the Mineral Point mine near Jubah. He has contracted for a three-stamp crusher, and will concentrate the product already broken, consisting of 300 tons of 20 per cent lead ore. Of this grade there is an abundance in the mine, which is opened by a tunnel. The formation is sandstone and yields readily to sluice concentration. Mr. Parker will devote his entire time to the management of the property—Tintic Miner.

The 1,700-foot drift in the Mammoth connected the first of the week with the last of the week. The company is pulling up velvet at the rate of about \$30,000 a month, and will be about out of debt by the middle of May. If the mine is not sold the mill will probably resume operations by the first of the month, and a mid-season dividend can be expected if it falls run all right—Tintic Miner.
