**A REAL LAND OF GOLD.**

BEYOND FOR THE ELEVEN YEARS OF THE RICH OUTCROP.

Johnston begins the eleventh year of his gold-producing history with a record output. Eleven years ago there was no Johnston. It was on December 8, 1886, that the first building was built on the land, the golden "claim" in the dear west, winning machinery began to be erected, and in May the first output began. It amounted to 327 ounces. The total gold mine known for May, 1897, is 248,000 ounces. It has been the usual condition to accumulate a record 14 million, and the result would have been more than satisfied had it not been for the unfortunate strike at the Hawthorn mine. There have been no more momentous developments in South Africa. It was the turn of the mine, which for many years has been the main source of the world's gold. There was a great deal of gold in the mine, and it was a great deal of gold. There was a great deal of gold in the mine, and it was a great deal of gold.
