NEW YORK METAL PRICES

Lead quiet, 4.12½. Copper weak, 11.60@11.80.

New York, Nov. 7.-R. G. Dun & Co.'s Weekly Review of Trade tomorrow will say

"Trade and industry are making steady progress, reports from all sec-tions of the country, containing evi-dences of wholesome developmets. An unusually large fall distribution oc-curred and current transactions in heavier goods are liberal, considering the season. Complaints of slow freight movement are still heard, testifying to the enormous volume of business har died by the railways, which report earnings for October 4.8 per cent higher than last year and 14.2 per cent above 1900. It is the exception when manufacturing plants have not con-tracts assuring activities for many months and annual inventories will be taken with difficulty, owing to importunate customers. Prices of comm ties proportioned to consumption. to consumption, a shown by Dun's index number, declined about 1 per cent during October, \$99.579. compared with \$100,648. The decrease occurred in meats and fuel, mainly the

steel market has been the 10 per reduction in price of tin plate to take

Workmen are laying granite blocks and brick for the interior walls and ders of the Federal building, and work is being so expeditiously done that the ground floor will be reached in a short time, if the weather is only propitious.

Local architects say it is really un-ecessary to send east for enameled or rified brick, as the clays required at st in the vicinity of Salt Lake. For 1,000 an excellent plant suitable for e manufacture of the above can be t up near this city. Enameled brick at costs \$110 per thousand laid down this city could then be turned out re for \$60 per thousand. A lot of clay suited for paving brick was sent to Dayton, O., from this city not long ago; and the returned, manufactured artiwas as hard as iron. It is claimed local contractors that there is clay this vicinity suitable for terra cotta fork, and that the reason it has not

f the experimenters knew how to handie it. COOS BAY TALK

AGAIN REVIVED. The following extract from a letter re-

ceived in this city by a real estate man would indicate that there is still some life left in the Coos Bay project:

C. C. Robins, designing and supervisng architect of the Great Central, is at work today on a blue print for the oposed addition to the city of Roseurg. The plats will be made so as to accommodate both the Great Central and Southern Pacific railroads. The wildings and dwellings of the Great Central are to be built on these plots. Maj. L. D. Elinney, who is at the head

ONE

PRICE.

are, however, not many of these, and there will be a tree at every stake in the 9,000 acres by the first of January of 1963. The company has a regular working force of 200 men on the plantation, in addition to others who are, by con-tract, clearing the ground, for the fourth and fifth series planting which will done in June and July of next year. I learned with no little surprise and interest that insects never attack or molest rubber trees in any way what-This in the face of the fact that surrounding vegetation of all kinds was honeycombed with ants and other insects of the country. It is scarcely necessary to state that a report such as this must be brief.

The company now has nine thousand acres of land planted with rubber trees; all of these trees are in a growing and thriving condition. In the plant-

ing of June and July of this year there were 'some trees that did not grow. These will all be replaced at the next planting and all gaps thus filled in. There

ico, and the result of my trip is the report I now make

That fact will be recognized. Therefore I will express myself to the point and will say of the rubber industry of Mexico, that it is like any other legitimate enterprise-it all depends on the management. As a result of my ob-servations in Mexico I am convinced that there are many people who have invested in rubber lands there who will never receive any part of the princi-pal, much less a dividend. This is not because rubber may not be profitable, but because of miscalculation and mismanagement. In concluding my repor I will sum it up with the statement that I satisfied myself fully in the first place as to the standing of the officers of the company; I personally exam-ined their books and found that they agreed in every detail with their financial statement and all other representations; and now that I have returned from an inspection of the plantation and examination of affairs there, I am qualified to give it as my honest opinion that the company is able to make good all of the claims to stockholders set forth in its prospectus. There was only one matter upon which I had to take the word of others, and that was that rubber trees will mature in five years and can be tapped in the sixth for a certain per cent of rubbet. As I have stated, that is one thing I could not demonstrate. But I talked with a number of people engaged in the rubber business and they all affirmed the correctness of that statement and pointed out a number of trees that had been so tapped in the sixth year and which yielded a larger amount of rubber in that year than estimated by our company. Should any of the stockholders desire further information, I our company. Should any of the stockhouters used of the stockhouters used will gladly furnish the same. In the meantime, I am, very truly yours B. F. GRANT. yours to
