Portland Fiscoded.

CRICAGO, Feb. 5.—For several days the city of Portland and other points in Gregori have been practically cut off from telegraph communication. From a telegraph resident field of the firm to be graph Company at Montreal by C. B. Hosmier of the Causdian Packet, and forwarded by him to the Associated Press, it would seem that Portland is in danger from flocial. The message is as fallows:

"The water is now flooding First street, kines deep. All traffic in the street in scapenifed, the only means of communication being by small boats. The Pacific Pacial felegraph office floor is covered with water. The rives is still rising. No news from the south."

The situation at Portland is undoubtedly due to the might rise of the Willamette river. It flows into the Columbia Just above Portland. For nearly a month past the hills and mountains of Oregon through which the river flows have been pided with continually falling show. The office in some places were fifteen to twenty feet high. During the past few days, however, warm winds have meliced this, and the Willamette river Jeanse a fortront. On the Northern Pacific, between several serious alides aince Salairias.
