

MEYER MILL CAPACITY

Work on its enlargement to 400 Tons Daily, Commenced This Morning.

JOB TO BE COMPLETED IN SIXTY DAYS.

See Consolidated Gold for Extension—Manufacture and Better the Attendance in the Pit Today.

In sixty days, or about about Dec. 20th, the Meyer mill will be handling an average of 400 tons daily. This was the statement made in a "News" reporter by Mr. John Meyer this morning. It was based on the fact that work on the company's mill enlargement had just commenced and that the contractor, J. A. Decker, had expressly stipulated in his agreement that the new mill should be completed in the time specified.

A large number were present for the morning session of the conference for the new tanks, ten of which will be placed on an elevation of 50 feet in the center, and have a capacity of 140 tons each. Some of the tanks are to be absolutely new, while the others will be practically new, as inasmuch as they are the old ones reconstructed. With the tanks re-erected, they can be emptied from the bottom and thus handled with greater dispatch and with more satisfaction. The ore will be carried automatically, going into the pulp mill through the conveyor system.

As regards the mill, Mr. Decker stated that work on the tanks raised as contemplated, the company would have a new mill in operation before the end of the year, at least a year, at which time it should be ready to handle 400 tons daily.
