CHEATING THE DYNAMO.

POSSIBLE MEANS BY WHICH CON- DENSED MURDERERS MAY IN- FILTRATE THEMSELVES. HENRIEF when, by suicide or otherwise, a condemned murderer succeeds in preventing the carrying out of his death sentence, paragra- phers must abandon the well-worn formula of 'cheating the dynamo'.

The general use of hair oil does not receive aesthetic sanction, but as part of an anti-morism, or rather, a counter-morism, it would be well to be in good form. An inventor of this city has devised an apparatus to work under clothing by means of which the most powerful currents are rendered harmless.

In view of all the arguments that can be brought against electrical killing, it is clearly in the interest of humanity and science that such an inhuman law should be blot- ted from the statute books.

Journalism is a fascinating profes- sion, said a veteran newspaper man to a Minnesota reporter, the other day. 'It is per- haps the hardest and most onerous of all the callings, and yet a man who has once gotten into the jour- nalistic harness is seldom satisfied in any other field.'

There are 230 pieces of music, with words accompanying, in the 'Pennyroyal' making it a large and valuable book. Not only should every choir be fully supplied with this remarkably cheap and most excellent work, but it is equally well adapted for home use, and no family in which music is cherished or cultivated should be without it.

Facts Concerning Whales. A sight of these huge, unoffen- sive animals is often to be had dur- ing an Atlantic voyage. They are too timid to approach near the steamer. A peculiarity about these wonderful creatures is the tail, which is not vertical as in most fishes, but level, by which they are able to reach the surface of the water with greater facility for the purpose of respiration, and such is the strength that even the largest whales are able with assistance to force themselves entirely out of the water.

Our list is complete, it contains Business Property, Prospective Business, Residences at all prices, Choice Lots in Park, Opposite Liberty Park, This is the place to put your property. No. 60 and 62 South Main Street.

ALL KINDS OF WRAPPING PAPER FOR SALE AT THIS OFFICE.

CARE OF WATCHES.

THE MANNER IN WHICH A POCKET TIMEPIECE SHOULD BE HANDLED.

A watch, even of very good qual- ity, can only give satisfaction if it is treated according to the solid construction, says the American An- alogist. Its possessor must prevent it from falling or being knocked about. A jump from a street car has more than once caused a good timepiece in the jumper's pocket to change its rate. A watch must be kept in a clean place. Dust and small articles of the pocket lining gather continuously in the pockets, and even the least case can not protect the movement from dirt finding its way to the wheels and pivots of the movement.

Watches should be turned inside out and cleaned at regular intervals. A watch ought to be wound up regularly at about the same hour every day. The best time to do it is the morning, for two reasons. First, because the hours of rising are more regular than the hours of sleeping and retiring. Second, be- cause the full power of the main- spring is more likely to endure to a minimum the irregularities caused by the movements of the owner dur- ing the day.

It is a good idea to have a watch- man's key on hand, and to use it at least once a week. A watch which is not always carried in the same place is more likely to be subjected to shocks and jar. A watch which is not always carried in the same place is more likely to be subjected to shocks and jar.

The Postmaster. The latest, largest and best musical work yet published in the Terri- tory, containing a tune for every place in the Latter-day Saints' hymn book, has been issued from the Deseret News press, and is now for sale in 4 different styles of binding.
