# MINING, BUSINESS AND STOCKS.

## BROKERS AFTER MORNING CLORY

of Transactions.

DALY IS MOVING UPWARD.

Ben Butler and Northern Light Come to the Front With Some Cred-Itable Business.

West Morning Glory, Ben Butler and Northern Light did the bulk of the busines on 'change this morning, selling respectively 12,000, 7,000 and 5,000 shares. Tetro was slow with 2,700 shares sold and Tesora and Star Con. went out in sales of 1,700 and 1,400 shares. All the other stocks were durapish and failed to arouse any interest among the brokers, although prices were kept well up. Hotders of Daly are gratified to see the advance in the stock, this morning's figures being \$3.00 bid and \$3.071/2 asked.

After the call there was about as much business done as was accomplished on the exchange, the stocks principally inquired for being California, May Day, Tetro and Ajax.

Price List. After the bantering was over, these figures were found posted up; LISTED STOCKS.

### GREAT COPPER AMALGAMATION.

Outshone Them All in the Number | F. A. Heinze May Get \$5,000,000 For the Minnie Healey.

ARIZONA TO BE BOUGHT UP.

Also the Copper Mines of Michigan-Probably \$100,000,000 Will Cover Cost.

If the Amalgamated Copper company carries out its present intention of capturing and controlling all of the copper mines of the United States, it will involve the outlay of probably a hundred million dollars. Besides the mines of Montana, in whose properties the big corporation found its origin, there are the mines of Michigan and Arizona. Anent the recent scandal over Judge Harney's handling of the suit of the Amalgamated company against F. A. Heinze for the possession of the Minnie Healey properly it is quite interesting to know that the big company is now willing to pay \$5,000,000 for this valuable piece of copper ground and that Mr. Heinze will probably take that

Arizona is coming to the front as a copper state and it is going to cost the Amalgamated a tidy sum of money to either control its output or purchase its mines. Michigan is an old stamping ground of the copper miner and the lake region abounds with some valuable properties. There is one thing in favor of easy control of Arizona copper properties and that is the fact that Sen-ator W. A. Clark owns one of the three largest copper properties in the state and his attitude towards the Amalgamated people is, of course, well known to be a favorable one.

The project of consolidation is receiving the earnest consideration of some wise heads and strong minds and doubtless the scheme will find accomplish-ment before many weeks shall have es-caped into the receding summer.

Golden Reef Incorporated.

Special Correspondence, Richfield, Aug. 16.-Yesterday articles of incorporation of the Golden Reel Mining company were filed with the county clerk here. The incorporators are Thos. Fautin and W. D. Woodward of Elsinere, C. M. Madsen of Gunnison and J. H. Erickson and H. N. Hayes of Richfield. The capital stock is \$100,000. divided into 506,000 shares of the face value of 20 cents each. The principal place of business is at Elsinore, while the mining property is in Beaver counabout seven miles north of Frisco. The incorporators of the new company claim to have discovered a body of high grade ore and will begin work on the property immediately and expect to ship ore from the beginning.

#### MINING NOTES.

Gid. Snyder has gone back to Richfield. Harry Joseph left here last night for

Fish Springs. William bright has opened an assay office at Rienfield.

An effort is being made to revive Martha Washington.

A big incorporation at Pioche is being exploited by A. B. Lewis.

Two cars of ore are coming from the Utah Queen in Dry Canyon Jim Long has bonded the June Boy group, located on the Fish Creek side of Gold Mountain, for purchase at \$25.

The Forman Bros. are taking out ore of this bird by when the property of the silver of the sil this kind by the wheelbarrow loads ev-Boise Statesman-Lucius C. Rice,

Pan-American commissioner, has engaged M. B. McGlenn, the well known quartz and placer miner, to take charge of the Idaho mineral display at the Buffalo exposition. Mr. McGlenn will leave for the East in a short time, and

remain till the close of the exposition. Butte Miner-Hon, John Perkin, the well known mining man and member in the last legislative assembly from Jefferson county, has just consummated the largest mining deal that has been made in Montana in many a day. He has made a sale of what is known as the Clipper group of mines at Pony

in Madison county. Reno Journal: J. H. King of the Vulspending a few days in Reno, His errand is to erect a smelter in this city.

It will be shipped within the next few days and will receive ores of all kinds and reduce them by the new process patented by the Vulcan company. The Vulcan prople have sold a thirty-ton smalter to Judge Hayden, It is being rected at his Bullion mine in Mohawi

The Howard mine, 2 mlies south of Heleng, which is under bond by C. A. Sh of cre for shipment to the smelter at Butte, Monday, says the Helena Record, It is expected that a car of high grade ore will be shipped every week from now co. The new mill at the Elkhorn mine is finished and will be put in operation next week. It has a capacity of 100

town of Eikhern has grown a popula-tion of about 300 and will grow still more when the mill is started.

> Boise Capital-George W. Thomas the mining engineer, left for Pittsburg this morning. Mr. Thomas has been in the Basin for the past month engaged in pumping out the Lucky Boy mine above Idaho City so that the mine could be thoroughly inspected. He represents the one-half interest of A. B. Loughlin, the Pittsburg millionaire, in the Lucky Boy and the showing was so good that his report will unhesitatingly recommend the immediate resumption of operations at the Lucky Boy. This has been in the past one of the leading mines of the Basin and its reopening will be of a source of much satisfaction to the residents of that sec-

Careless creek, in the Snowy nountains, will probably not mountains, turn out as rich as has been re-ported, says the Great Falls Tribune. That is to say, what there is of the rich sand is very rich, but there is not mountains of it that was first reported, Ameng the visitors in the city yesterday was O. M. Wallace, a mining man of Helena. His brother was one of the first to go to the creek when the find was reported a week ago. He re-turned to Helena Sunday and says there are more persons in the vicinity of the find than there is ground for many times over. He states that there is a section of the mountains that is very rich with copper and that evidently there is a mother body close by, but where it is there is no one who has ever been able to find out. His opinion of the camp is that it would not be well to go to any great ex-pense, unless it is for the purpose of hunting for the mother lode.

Challis (Ida.) Messenger: Hon. O. J. Salisbury and wife and children of Salt Lake City arrived in Bayhorse one day last week, They came up in the moun-tains for a few weeks' recreation— hunting and fishing, W. J. Trelear met them at Ketchum with private conveyarces, Mr. Sallsbury is the principal own r of the famous Ramshorn mine at Bayborse, one of the largest and richest mines in Idaho. Mr. Salisbury is not saying much as to the future of his Bayborse mining property, but in all probability very little work will be done at his mines until such time as the branch railroad from Blackfoot or some other road is built to Salmon river, R. N. Hull and John Fleming returned the fore part of last week from their trip to Seafoam and Sheep mountain, where Mr. Hull went to look at some mines in which he is interested. They informed us that but few men are at work in this district, Hon, Charles Crane of Salt Lake is taking out considerable high grade ore for shipment at his Bulldog mine, however, There a vast amount of good ore in these camps, but the mode of transportation is too limited. After paying \$35 per ten to ship the ore and other charges, there would be little profit left for the

#### BUSINESS NOTES.

The week has been a fairly active one in local stocks, the main securities dealt in having been Descret Savings, Z. C. M. I., Ogden Sugar, Deseret National. Clark, Eldredge and Utah Sugar, at the figures quoted below. Deseret National pays its regular quarterly dividend of \$2 per share (12 per cent per aanum) this month.

Manager Cutler's estimate of the sugar output this year in Utah is 30,-600,000 pounds, about double last year's product. Of this amount it is estimated that the Utah Sugar company plants will turn out from 60 per cent to twothirds, the remainder being divided between the Ogden and Logan factories. Utah's consumption being about 20,009,-000 pounds, this will leave 10,000,000 pounds to be sent outside the state.

The price of granulated beet sugar remains stationary at \$5.70 wholesale, and \$5.85 retail; cane is 10c higher. The

ocal factories do not anticipate much my further reduction. Following are the latest quotations: Deseret National bank .... \$255.00

THE PESERET NEWS.

### WHEAT SHIPPED TO SANPETE.

Staff of Life Being Sent Into the "Granary of Utah."

AN UNUSUAL CONDITION.

Caused by Three Years of Drouth and the Ravages of the Grasshopper Pest-Oats and Flour.

"For the first time in my recollection," said a leading grain dealer today, "it has been found necessary to ship wheat into Sangete, the former boasted 'granary of Utah.' Just now the staff of life, so-called, is very scarce there occasioned by the severe drouth which has obtained for the past three years and by the further ailliction of the grasshopper pest which has been something terrific this season, particularly in and about Manti, Ephraim and contiguous sections.

"I don't desire to give out the impression that there is want in Sanpete but the supply has been cut down enormously by the causes I have mentioned; and besides, threshing has not yet commenced there and I presume it has been found necessary to call for wheat from the outside to supply the present needs. But the wheat shortage is going to be very great in Sanpete county this year anyway. Whether it will have anything to ship out, I suppose is not known now. But the fact that shipping in at this time is going on is in and of itself an anomaly."

New wheat is now moving quite free-ly on the local market and the supply seems quite equal to the demand at figures ranging from 50 to 53 cents. Flour prices are about as last week, \$1.50, \$1.50 and \$1.40. The recent de-mand for oats has caused many farmers to thresh that in advance of their wheat. They are finding ready sale for it at \$1.55 to \$1.60 retail, and \$1.40 to \$1.45 wholesale.

#### UNION PACIFIC WAS WEAK.

At Opening of Exchange No Stocks Were Strong, Trading Being Quiet.

Poor Bank Statement Caused Depression, Bears Foreing Things Lower

New York, Aug. 17.-Stocks were weak at the outset on a renewal of yesterday's selling, but trading was quiet. St. Paul and Union Pacific were the weakest issues, losing a point. The United States Steel stocks opened quict but under pressure, the common yielding 1/2 and the preferred 1/4. Trading was very inactive, pending the publication of the bank statement. The report shows a loss in surplus reserves and cash and bears forced the market lower, with Sugar, Amalgamated Copper, Union Pacific, St. Paul and Atchison most affected. The steel stocks continued downward, the preferred touching 911/2. The closing was weak.

CLOSING STOCKS. ## OUTLOOK FOR BUSINESS GOOD.

Relief From Drouth Reflected in Man Who Stole a Grip Full of Larger Retail Trade.

CROP CONDITIONS IMPROVED

Steel Strike Has Affected Prices Extensively-Boot and Shoe Trade Active-Wool Market Hardened.

New York, Aug. 16.-R. G. Dun & Co.'s weekly review of trade tomorrow will say: The distribution of merchandise has proceeded this week on a steady and satisfactory scale throughout the East and in the West the relief from the long drouth and heat is beginning to be reflected in the larger retail trade. so that for the quarter promise is held out for larger business than last year. Crop conditions in the territory most aected by the recent drouth are improving, and the weather has been highly favorable in nearly all districts east of the Missouri river, though rains have interrupted the spring wheat harvest.

The United States steel strike has affected prices extensively, particularly on sales for immediate delivery. In tin plates the advance has been greatest, while hoops, sheets, skelp and billets are sold at premiums. Quotations are too erratic for accurate record, and in many cases sales are at private terms. Confidence is steadily shown by placing of distant deliveries at regular prices. New England boot and shoe factories

are still actively engaged, and the stability of prices remains a feature. New York and western shops are equally busy, jobbers complaining of slow qellveries. This is the season of greatest demand for boots, and there is a fair volume of business, but each year a de-crease in output appears. Leather sells freely, but without change in price, while slightly lower bids for hides will

probably secure large lots.

Woolen mills have full employment. as a rule, and the increased consump-tion of raw material tends to harden the tone of the wool market, although no change is possible. Official figures of corn conditions were

far more hopeless than the most pes-simistic anticipations, indicating only about 2,000,000,000 bushels of wheat and corn together. Inflated prices brought out receipts for the week of 2,359,705 bushels, against 2,032,193 bushels last year, and reduced Atlantic exports to 631,596 bushels, compared with 2,362,335 bushels a year ago, and 4,034,302 bushels Wheat also advanced sharply, but

there is sound argument for strength in Atlantic exports during the last two week of 3,579,034 bushels, against 4,378,-901 bushels in 1900, and 4,066,646 bushels two years ago.

Failures for the week numbered 168 in the United States, against 161 last year

and 19 in Canada, against 24 last year.

JOHN WANTED TO KNOW. A good story is told of one of the dignitaries of the Scottish church. Before he became known to fame he was minister of a remote parish in Perthshire, and was not considered a particularly attractive preacher. At his sug-gestion extensive alterations were made the trasent of his church, and those had the effect of sweeping away considerable seating accommodation. day after the alterations had been ef-fected, he visited the church to see how

it looked.
"What do you think of the improve-ments, John?" he asked of the beadle.
"Improvements!" exclaimed John, in indisdain. "They're no improvements at a'. Whaur are ye goin' to put the folk?"
"Oh," said the minister, "we have abundance of room, John, considering the size of the congregation."

"That's a' very weel the noo," re-torted the beadle, "but what will ye do when we get a popular meenister?"-Tit-Bits.

RED SPIDER ON ROSES. Expose the plants to the fumes of burning sulphur, or forcibly syringe them with a sulphur-wash made as follows: Mix one pound of soap with one half pound of flowers of sulphur in boiling water, and then add ten gallons of

cold water. OGDEN EXCURSION SUNDAY,

#### WITH THE JUSTICES. grammannamannamannaman

In Justice Nielson's court this afternoon Marie Douglas is being tried on the charge of disturbing the peace. She is the girl who is alleged to have interfered with Deputy Sheriff Naylor who was arresting a young man on a who was arresting a young man on a streetcar coming in from Calder's a few nights ago. She was taken before Justice Nielson but released on her own recognizance. She failed to show up at the time set for her trial, but yesterday afternoon she returned from a caryon trip, and explained she was a canyon trip and explained she was ignorant of the fact that her case had been set for trial. She pleaded not guilty to the charge.

A GRUESOME FIND.

Remains of a Murdered Infant Found in the Jordan River. A gruesome find, the evidence of an uncanny crime, was made by a couple of boys who were fishing down at the Jordan river yesterday afternoon near White bridge. The object that attracted the boy's attention was lying in the water, and upon going closer to it they were astonished to find that it was a

prematurely born but well developed

baby boy. The boys, whose names are

Harold Thompson and Fenton Hardy, at once notified the police and the tiny

body was at once taken to the police station where an examination of it was made by the police.

There is evidence that the child had been born alive but was murdered by a blow on the head and then cast into the river to cover up any trace of the crime. It was taken to O'Donnell's un-dertaking establishment and Mr. O'-Donnell found that the skull was frac-tured as if by a blow. He said it was not at all probable that the baby was killed by an instrument in a criminal operation, but of course he had no means of knowing for sure. From the condition of the body it is presumed it had been washed some distance down the stream. Acting Coroner Nielson was notified, but at a late hour this afternoon, it had not been decided
