12 FAGES -LAST EDITION

Investigation Into Death of Lillie Jordan commenced This Morning.

THE GIRL'S FATHER TESTIFIES

Says That His Daughter Was Wayward and Did Not Tell Truth.

D. C. F. Wilcox Tells Why Coroner was Not Notified-Two Doses Or Laudanum Taken.

Before Justice of the Peace D. T. Smith and a coroners' jury, composed T. Dver, Q. C. Nichols and R. S. Wright the official investigation of cirstances around the death of Lillie torday started this morning.

David M. Haigh, assistant county, is conducting the questioning and John Rollo, court stenographer, is taking the testimony.

The way for vital facts was paved this morning. The two witnesses calla wore Conrad Jordan, the dead girl's ther and Dr. C. F. Wilcox who ateded the young woman up until a as minutes before death.

This afternoon will probably hear most signifigant testimony as the father has announced the girl was berayed by a Brigham City man and not San Jose man as was at first as-Letters may be laid before the art if the court wants them, says the lather. Conflicting with the allegations of "betrayal" etc. is the girl's history as furnished this morning by

the father. As the father testified this morning here were times when he could hardtalk; tears rolled down his cheeks nd he had to use great will power keep from breaking down complete-As he talked to the jury his two bles crawled around his legs, goooing or crying as they saw fit. When babes got nervous and irritable an theses were asked to adjourn into ante-room so the hearing could

ed. Jordan said among other things,

Mr. Jordan said among other things. "Lillie told me she was sorry for what "he had done, after taking the poison and when I asked her why, she said a man had told her to do it." A rather sharp fire of pointed ques-tions directed at Dr. Wilcox by Judge smith was the result of the physician's failure to furnish the coroner (Judgo smith) with an announcement of the death so an official investigation could be held. Dr. Wilcox explained it was to spare the parents any needless pain. drough publicity. "While there is no statute forcing hysicians to notify a coroner this was the first time I have not received word of suicide so an investigation could be held if it seemed necessary," said Judge Smith. "Took a charitable view of the

took a charitable view of the

e." I. Wilcox said it was his opinion girl took a second dose of poison the first had had no effect upon vat all. When she got this, and ere and how she kept it out of th until she could take it unseen all things of mystery

Initial representation and then turning to the pury told his story, which in sub-tance was as follows:
T was called to the Jordan home to the parents, who were greatly excited to the parents of the father told me below any great the toll and the girl's condition. Inding the house, and upon leaving the house to the parents to keep this up.
At 12 o'clock the next day 1 was again summoned to the Jordan home by voice saying over the telephone. Hurry, yillie is dying!" When I got there this time she was completely unconsidered and there was every reason to suppose she was under the althence of poison. There were all the character, when at 1 o'clock the night before, so the parents told me she had been normal at 1 o'clock the night before, so they before did num disturb her, After a while they notices also were did num disturb her, After a while they notice the was were the day before did num disturb her, After a while they notice dist was here this they before did num disturb here a when I arrived I saw there was here they before and doing all I could many before the they before the they before the saw there they before a when the centh certificat.

DUAL-PERSONALITY DREAM.

"I have been the family physician for years and while I had not seen Lilli-for four years. I do not remember that she had any sickness in her earlier girl-hood. Regarding this story of a dual personality which was printed in one of the morning noners. This was the work

personality which was printed in one of the morning papers—this was the work of some imaginative reporter: he had no authority—it was all 'rot.' Little was unfortunate. I so regarded her, and to avoid facerating the feelings of her gritering parents furnished just such in-formation as I thought the public en-titled to—there was nothing withheld nor suppressed. I asked the papers to sup just as little as they could, saying it would be a great favor. Her hong-life was as happy as the average child's."

child's." Judge Smith asked the physician why he had not notified the proper authori-ties of the death. "As coroner I usually hold an inquest in such cases," he said. "This is the first time that I have not been notified of a suicide." Dr. Wilcox said he did not know this had to be done.

ELEMENT OF MYSTERY.

"But there was a mystery about this death," persisted Judge Smith. "You say the girl was in no way under the influence of any polson hours after taking the first dose, yet next day died from the effects of polson"-----"There was an element of mystery," interrupted the doctor, "I told the par-ents Lillie must have taken a second dose of polson, as the first did not cause death."

"Yet you did not see the necessity of an inquest or official investigation of any kind?"

"No. I acted upon the theory that if "No. I acted upon the theory that if a man I know was afflicied with heart trouble drops dead, I belleve he died of heart fallure when no other causes can be discovered. I was positive the girl had taken poison and as was he was dy-ing when I visited the house the second time."

WAS A SECOND DOSE.

"But no one had seen her take a sec-ond dose; no one knew the **take** any both secreted about her clothing. It was mere supposition and theory all the way through," added the judge The jurymen enquired for details on this particular point and finally Dr Wilcox said her having taken a second dose was prescuently or window Jury dose was practically a certainty. Jury-man Nichols was most active in this questioning and his questions brought out considerable additional valuable testimony. When the jury and court had brought out the declaration that the

girl must have taken a second dose of poison Dr, Wilcox was excused and the father recalled. pulson Dr. Wilcox was excused and the father recalled. Are Jordan said Lillie had returned from another term at the industriar school only a short time back. "Since coming home sho had been very good." he said. "She worked at days for a neighbor and stayed at our house at night. Saturday she asked me if she could go to the theater with a Wray woman and her bushand. She pleaded so hard, saying she would come home pight after the performance that I let her go and she did come home as she had promisel. Monday she left the house, presumably to go to a dentist as a filling in one of her teeth had come out. She did not return to the buse during the day or night but in view of her good behavior, we did not suspect anything, believing she was staying with some chum. Tuesday we became worried." At this juncture a noon adjournment was called until i o'clock when Mr. Jordan will continue his story telling how Lillie telephoned Tuesday that sh- was married and re-turning home Wednesday to attempt self-destruction the following day.

orable sentiment in business and banking circles resultant from yesterday's changes in various bank managements and the promises of support made by the Clearing House association received something of a setack today when it became known that the debit balance of the Mercanthe National bank, at the clearing

house was \$1,900,000, The debit balance of the National Bank of North America was\$850,000. These figures indicated that heavy withdrawals from the two banks were being made and the totals were referred to by one member of the Clear-

ing House association as "unexpect-

lug House association as "unexpect-edly large and disconcerting." It was announced in a short time, however, that the Clearing House as-sociation would extend assistance to the Mercantile and National Bank of North America. Soth M. Milliken, the newly elected president of the Mercantille National bank, said today that counting out the Heinze-Morse loans, the assets of the bank are \$1.40 for every dollar of liability and that the loans in ques-tion are of value.

linibility and that the loans in ques-tion are of value. Stocks today opened strong and higher, all the market leaders particl-pating in the rise. Sunday's meeting of bank pred-dents succeeded in finally eliminating the Heinze. Morse and Thomas inter-ests on certain of the clearing house hanks

banks.

banks. Besides choosing new officers for the banks in question, and announcing that each was in a solvent condition, a fund of \$10,000,000 was pledged by a score of individual banks to extend aid to those banks and render such as-sistance to meet their depositors as the clearing house committee may think necessary.

the clearing house committee may think necessary. The deposits of the banks represented at the Sunday conference amounted to \$1,250,000,000. The men, 15 in number, every one a practical banker, decided upon the measures for eliminating the interests which have been under crit-icism, which measures, later in the day were carried out. The methods that have ben elimi-nated from the local banking situation, it is stated are a development of the lask decade. These consist of buying of a bank, then putting up the stock representing that control as collateral

of a bank, then putting up the stock representing that control as colladeral for funds to buy control of another bank, and continuing the process with banks and trust companies, so that the result is a pyramid controlling "chains" of financial institutions and their deposits. The crisis, it is declar-ed, was a serious one, but the cure extended is expected to be complete. Manager Shearer, of the Clearing House, said today that that institution had the situation under control; that all the undesirable elements had been eliminated, and that from this time would begin a new era in banking in would begin a new era in banking in New York. It was officially denied that it would be necessary to issue clear-

sulumn day, and snappy racing cur Convictions Were on 1.462-Also rents in the blue depths of the sky dive mammoth balloons, representing Claimed That the Elkins Act. our of the great nations of the world,

Is Unconstitutional.

Chicago, Oct. 21 .- The Inter-Ownu today says: Plans for the tremondous effort that will be made by attorneys for the Standard Off company to have the \$29,240,000 fine imposed by Judge Landis wiped out by the United States circuit court of appeals were disclosed today. Twenty-five points, each one of which the attorneys will argue is sufficient to have the record breaking find lectared void, will be advanced when he case comes to trial in January. The principal arguments will be:

First-That the government autorneys failed to inform the defense of the Alton immunity agreement.

Second-That Elkins act, under which the conviction was secured, was un-

Third-That as the Hepburn act was passed before indictments were re-turned, prosecution under the provi-sions of Elkins law was illegal. Fourth-That Judge Landis did not compute the number of violations cor-rectiv.

Five-That certain evidence should

not have been admitted. Sixth—That the Standard Oil com-pany accepted the rates in question with the understanding that they were authorized rates.

authorized rates. A copy of the bill has been given to United States District Attorney Sims, and special district attorneys Wilker-son and Parkin will this week begin their study of the document and make preparations to combat the ar-guments advanced. The bill will not be filed in the court of appeals, how-way before Day 1.

suments advanced. The bill will not be filed in the court of appeals, how-eve, before Dec. 1. Included in the bills, as given to Mr. Sims, is a copy of Atty, Gen. Bonapartes' letter to the district at-torney which was read in Judge Landis' court at the time the immunity matter was finally disposed of. This states the agreement made pre-vious to the beginning of the trial. The attorneys argue that if they had been informed of the arreement under which Alton officials took the witness stand they would have questioned them differently. In attacking the constitutionality of the Elkins act and in contending that the passage of the Hepburn law made it unlawful to prosecute for violations of the repealed Elkins measure the Standard attorneys hope in the event of a favorable decision to furnish a basks for freeing the company from numerous other suits pending. It will be contended that Judge Lan-dis failed to compute the number of vi-olations correctly. Instead of each shipment constituting a violation the defense will claim that other the num-ber of settlements between the com-pany and the relived or else the num-

ber of settlements between the com-pany and the rallroad or else the num-her of times the rate was granted should be the only things contended. In the one case the number of viola-tions would be about 300, while in the other it would be reduced to only three, Convictions were secured in 1,462 vio-

not included. The sport is well named for it takes a king's income to maintain it. A con-servative follower of the game with a penchant for figures said that \$22,000,000 was paid out yearly by race goers to racing associations and bookmakers. This represents bets, admission prices and railroad fares to the tracks. Built attempting to parts its success of the "American" party, is an outrage. I be-lieve that the success of the "Am-ercan" party in the coming municipal deciton would be a great misfortune to the citizens of Sait Lake City. B. P. MORRIS.
