TWO ROUTES INTO BOISE. Two routes into Boise are contem plated by the engineers of the Pittsburg and Gilmore Railroad company, reported from one source to be a sub-sidiary road of the Harriman system and from another an invasion into southern Idaho by the Hill interests. There has recently been filed with the secretary of state, by W. A. McCutcheon, representative of the Pittsburg and Gilmore company, an amendment to the articles of incorporation of said company providing for the projection of the road to Boise to be constructed through the counties of Lemhi, Custer, Boise and Ada, or Lemhi, Custer, Blaine, Elmore and Ada. Either of these routes, it was stated, would be approximately 250 miles in length and extend from Salmon City to Boise. The spur of the Pittsburg and Gilmore running from Timber Creek to Armstead, where the road will connect with the Oregon Short Line, is designated as the "main line" in the amendment to the articles of incorporation.

A second branch is proposed to divert at Timber Creek, pass through Salmon City and on down the Salmon river out into the state of Washington, connecting up again at Pasco, at a distance of 435 miles. The counties in Idaho through which it will pass

The catastrophe converted on Harrison boulevard inst occurred on Harrison boulevard, just before dark, by the colliding of Gov. Brady's big touring car with a Frank-lin machine driven by Jack Campbell. Both cars were going in the same di-rection and when the collision occurred the Franklin machine was completely overturned, pinning the driver beneath it, with the result that he received a very badly bruised body and face-it was thought for a time he would lose one of his eyes. Those riding in the car with him, Mr. and Mrs. C. S. Verill and Miss Maltby, were thrown clear of the car and were simply bruised by the fall. The machine was damaged to the extent of \$500. Gov. Brady and party were uninjured, as was also his car.
