

## MINING, BUSINESS AND STOCKS

BECK TUNNEL  
SOME STRONGER.

Tintio Stock Was in Quite Brisk  
Demand on Mining Ex-  
change Today.

LITTLE BELL IN GOOD TONE.

New York Bonanza Slightly Weaker—  
Thompson Meets With Favor—  
Closing Quotations and Sales.

The open board claimed the bulk of the business of the foreign sessions of the Salt Lake Stock & Mining exchange today. There was considerable demand for Beck Tunnel Consolidated and several points. Carls also came to the front in good form, selling up to 30 1/2 cents, which led to considerable speculation as to the fate of the deal that has been hanging fire for some time past. The fact that experts in the employ of the American Smelters Securities company have been on the ground and have completed their examination, coupled with the fact that there has been a very noticeable strengthening in the market for the stock, has led to the belief among some that the option will be exercised, although nothing confirms that to that effect could be obtained. Columbus Consolidated continued in good tone with a few sales being marked up to \$7.50 and \$7.35. Little Bell, which crossed Daily Judge yesterday, while it did not reach the high water point, came out in very good order, the stock selling at \$12 and \$12.50. New Bonanza fell off a few points, while Thompson was eagerly sought up to 35 cents.

Late developments in the Daily Judge and Little Bell mines seem to have had a good effect on stock of the Thompson company, and some think its location gives favorable opportunity for speculation. While the company has been inactive for some time, it is understood development work will be resumed along vigorous lines in the near future. There was a limited amount of trading done in Tonopah stock, a few lots of Montgomery Mountain, or Bullfrog, found takers at 55 cents. The closing quotations and sales were:

## STRIKE IN QUARTETTE.

On 900 Level of Searchlight Mine is Great Tonnage of Mill Stuff.

Word comes from Searchlight, Nev., that ore has been struck on the 900-foot level of the Quartette. It is as yet of low grade, but this is in keeping with the development of the mine as shown by the upper levels. It has been repeatedly demonstrated that the vein, when crosscutted from the shaft which is sunk in the foot wall carries but low values, not more than 35¢ or 40¢ to the ton, and that the main ore shoot is not encountered until 70 feet is driven from the shaft. The reason for this is that the shaft pitches west and the ore shoots east.

The big cement foundation for the 100-horse power gasoline engine, which has been ordered for the electrical power plant, is completed and all is in readiness for the engine.  
At the Bay State shaft, which the company is sinking west of the principal workings, a small hoist has been installed. The contractors are making rapid headway. This shaft is being sunk for double purpose, the first proving up the vein to the west and for the development of a greater supply of water.

The necessary pumping plant, tanks and pipe have been arranged for and there will be no delay when the water is struck in piping to the mill, 5,000 feet. If a sufficient flow is developed two more batteries will be added.

## SCHWAB'S OPTION EXTENDED.

Recent Developments in Gold Bar Mine at Bullfrog Are Important.

Special Correspondence.  
Bullfrog, Nev., May 5.—It is learned through private telegraphic advice from New York just received here, that an extension of 20 days has been granted by the Goldfield owners to Charles M. Schwab on his Gold Bar option. The original option for the control of the property on a million and a half basis expired April 30, but owing to it is thought that the somewhat unsettled financial condition of the country, due largely to the San Francisco disaster, an extension was desired by the steel magnate. In view of Mr. Schwab's already immense holdings in the Bullfrog district and his eagerness to acquire mineral ground of known value in this camp, little doubt is expressed here in regard to his ultimate action in the matter.

Recent revelations at the Gold Bar have shown the property to be one of exceptional richness, and it is stated that the sampling made by Mr. Schwab's experts was more than satisfactory.  
Plans for big improvements by the company consolidated mining company are in process of incubation. Senator T. L. Oddie of Tonopah, president of the company, has just completed a visit to the Bullfrog district relative to these prospective improvements, and also for the purpose of looking after his various other interests here. Senator Oddie brought with him W. D. Blackmer of Colorado Springs, Colo., well known mining engineer, who has assumed general management of the company's property, and who is now at work perfecting plans for a reduction plant to be built on the holdings.

These plans, according to statements made by Senator Oddie, include the erection of one of the largest mills in the state.  
While here Senator Oddie turned his water holdings at Pettes ranch and the Upper Indian ranch into the company. These were acquired last summer, and the supply, it is stated, will prove ample for all milling purposes.

At the Indian Springs and Paradise groups, which are individual Oddie holdings, development work is being crowded as rapidly as possible.

## WILL INSTALL MACHINERY.

Manager Hyde of Biscuit Company Leaves for Cherry Creek.

A. E. Hyde, Jr., manager of the properties of the Biscuit Mining company, located at Cherry Creek, Nev., departed for camp this morning, and expects to be absent a week or more.  
The Biscuit company is preparing to install a compressor plant, and other equipment preparatory to opening up a decidedly vigorous campaign of exploration and production.

The camp of Cherry Creek appears to be getting into the swim again, and as soon as the tracks of the Nevada Northern railroad reach the station to be established a few miles below the town several mines in the district will begin forwarding ore to the Salt Lake smelters.

## BAMBERGER DELAMAR.

New Ore Shown Opened Containing Some Big Gold Values.

The affairs of the Bamberger Delamar company are moving along in the usual way, says the Lode of Pioche. A chimney of ore was encountered in the mine the other day, assays ranging from \$15 to \$200 in gold. The extent of the ore is not known, but indications point to a fair sized chute.  
On Tuesday more power being obtained the tailing mill was started up, and if no unforeseen accidents happen this mill is expected to soon be running to its full capacity.  
The main mill will shortly again be working over to its full capacity and the force of miners have been slightly increased.  
Indications for the welfare of the company look brighter the Lode predicts good success under Mr. Metz, the new superintendent.

## CAMPAIGN AT SIEGEL.

Company is Making \$15,000 Monthly From Its Nevada Mine.

The campaign of production at the Siegel mines, located at Siegel, White Pine county, Nevada, goes on without a hitch. From an official of the company it has been learned that the monthly output amounts to about \$15,000.

## VETERAN POCHE MINER.

J. D. Morgan, Eighty Years Old, Rides On Electric Car for First Time.

J. D. Morgan, a familiar character around Pioche and Bullionville, Nev., where he now lives, is a Salt Lake visitor today. He is one of the veteran miners of the west, and one of the first to join in the rush to the gold fields of California in 1849, landing at San Francisco on Jan. 10 of that year. He worked on the Comstock lode during the early days of Virginia City, but for more than a quarter of a century the veteran miner has resided in the vicinity of Pioche, and in late years has faithfully performed the duties of watchman at the properties now owned and controlled by A. H. Godde and associates.

Since he moved to Salt Lake Mr. Morgan has experienced the sensation of riding on an electric car for the first time, although he is now in his eightieth year of age. In a trip to the top of the Dooly block in an elevator, he was something of a novelty to him, while the automobiles running about the street simply took him off his feet with amazement.

## BARTCH IN NEVADA.

Supreme Court Justice Taking Spin Around Gold Camps.

Chief Justice Bartch of Utah arrived here yesterday, just the Goldfield Sun, and while on his vacation will take in the camps of the southern part of the state, especially Manhattan, where he is interested in the new mine owned by King. He is accompanied by G. K. Smith, private secretary to General Manager Bancroft of the Oregon Short Line, who also has his eye on Nevada mines.

Accompanied by Captain A. H. Mayne they will start for the camp of Ramsey in the morning, and will remain for some time looking over the ground, and incidentally to get hold of some thing good if obtainable at a reasonable price.  
Since Captain Mayne returned from Ramsey he has been notified that several more good strikes have been made out far distant from his own properties in that district. For some reason, however, Captain Mayne has a lingering fondness for the northern camp, and with his extensive knowledge of mining his judgment may well be depended upon.

## PROGRESS AT GOLD BUTTE.

Supt. Gibbs Making Good Headway With Tunnel.

Supt. J. F. Gibbs, who is in charge of the development of the property of the Nevada Gold Butte Mining company at Gold Butte, Lincoln county, Nevada, has sent in an interesting progress report, in which he states very good headway is being made in driving the tunnel to cross-cut the eight parallel ledges which show up so promising on the surface. When Mr. Gibbs wrote the report he had driven into the mountain to a depth of 115 feet and he figured that the Nevada ledge would be tapped within another 20 or 30 feet. On the surface this ledge shows some interesting gold values and, naturally, Mr. Gibbs is watching every shot with not a little impatience. Although it is not the intention of the management to give the attention to its exploration until some of the ledges further on have been penetrated.  
It is about two weeks ago a gasoline engine was ordered from a local machine house and forwarded to camp to be used in the operation of a blower provided for the ventilation of the mine. A mine car and track was also sent out besides other equipment and supplies, which the superintendent had called for.

## CONCENTRATES.

Dr. E. W. Whitney, who has mining interests at Osceola, Nevada, left for that camp last night.

J. G. Phelps Stokes, the New York financier, who is extensively interested in Nevada mines, is in the city today.

The Pioneer sampler reported the receipt of four cars of ore from Pine Bluff and one from Bingham and three from Nevada today.

Four of the new roasters installed at the Yampa smelter at Bingham are scheduled to be in commission tomorrow.

The sales of last week on the Goldfield Mining Stock exchange aggregated a total of 303,600 shares of stocks, valued at \$109,855.50.

H. W. Horne, the well known mining engineer, wife and two children, departed for the east today to be absent several weeks.

It is reported that a deal is pending for the sale of the National Bank mine in the Bullfrog, Nev. district, but a confirmation is lacking.

Charles E. Hudson, the well known San Francisco broker, came in from the west yesterday afternoon to enquire after business matters on this end of the line.

The ore and Bullion settlements reported yesterday by McCombs & Company were: Crude ore and concentrate, \$20,500; base bullion, \$23,000; gold bullion, \$6,700.

The ore receipts at the Taylor & Brunton sampler today amounted to one car from Bingham, one from Modena, two from Idaho, one from California and 12 from Tintic.

George Waddell, formerly connected with the concentrating department of the Anaconda company at Osceola, has been appointed assistant to Supt. F. G. Janney of the Utah Copper company's plants.  
The management of the Star Consolidated has placed an order for a lot of new equipment, which includes a powerful hoisting engine and 100-horse power boiler. Manager McMillen says recent developments have been of an important character and that it now looks as if the mine is being to make a good account of itself.

## Failing Strength

A weak and exhausted condition usually follows overwork, too close confinement, or unusual mental strain. Every day a certain amount of vitality is consumed, and if not replenished by sleep, rest and nourishment, soon wrecks the nervous system. The results are sleeplessness, headache, indigestion, imperfect circulation, etc., which affects the organs of the body.

Restore your nerve strength—your vitality, with Dr. Miles' Nerve and your whole system will recuperate. Your sleep will be sound and refreshing, headaches will disappear, and digestion improve.

"When I began taking Dr. Miles' Restorative Nerve I was physically in a very bad condition. I was weak and exhausted, and hardly able to keep up. I could not eat sufficient to keep my strength. I suffered greatly from sleeplessness, and got very little rest. The Restorative Nerve soon brought me back to sleep, and I gained rapidly in strength since taken it. Whenever I have felt the need of a nerve tonic, and always with satisfactory results, I have used Dr. Miles' Restorative Nerve."  
WM. A. CLARK, Rockford, Ill.

Dr. Miles' Nerve is sold by your druggist, who will guarantee that the medicine is genuine. If it fails, he will refund your money.  
Miles Medical Co., Elkhart, Ind.

C. E. Davey, Mgr. H. J. Smith, Jr., Secy. and Treas.

MOST STOCKS  
SHOWN STRENGTH

Prevailing Tendency of Prices Was Decidedly Upward for Majority of Issues.

## SOME BIG GAINS WERE MADE.

Some Weakening After Noon Hour, But Later the Advance Was Resumed.

New York, May 8.—The prevailing tendency of prices in the opening dealings in the stock market today was upward for the majority of issues, including the speculative favorites. There was a sprinkling of losses amongst the less important stocks. Reading, Union Pacific and Smelting rose rather fractions. United States Reduction preferred rose 1/4, Pacific Coast 2 1/4. St. Louis & San Francisco second preferred 1/4, after yesterday's wide advance. The dealings were on a moderate scale. The undertone of the market grew gradually stronger, led by dealings which were taken with confidence up to 1:30. Other favorites were then bought largely, notably the Harriman Pacific and the principal metal stocks. Amalgamated Copper and Smelting sustained the market. Amongst the important gains were Havana Electric preferred 5, Smelting 2, Great Northern preferred 2 1/2, Reading, Tennessee Coal, Glass, Sheet and Steel and International Pump & Republic Steel preferred 1/4, and Southern Pacific, Central of New Jersey, Amalgamated Copper, U. S. Steel and American Ice a point.

Since about 2:30, however, the advance was resumed and Reading, Union Pacific, Amalgamated Copper and Brooklyn Transit, as well as other representative stocks, sold above the best prices of the morning. Amalgamated extended its advance to 3/4. Loew's, Reading, second preferred, sold at an advance of 3/4. Norfolk & Western preferred 1/4, Anaconda and Republic Steel preferred 1/4. Consolidated Gas lost 1/4.

Stocks weakened considerably after the noon hour. Later, however, the advance was resumed and Reading, Union Pacific, Amalgamated Copper and Brooklyn Transit, as well as other representative stocks, sold above the best prices of the morning. Amalgamated extended its advance to 3/4. Loew's, Reading, second preferred, sold at an advance of 3/4. Norfolk & Western preferred 1/4, Anaconda and Republic Steel preferred 1/4. Consolidated Gas lost 1/4.
