LABOR TROUBLES IN ENGLAND.

John A. Bobson, a Well Known Lon don Sociologist, Predicts Them.

New York, Oct. 13 .- John A. Hobson. a well known London sociologist who is now the guest of Harvard university and the Twentleth Century club, phophesies serious conflicts in England between organized labor and organized capital, according to the Times special from Boston. He says: "In England the organization of la-

bor from the nature of things is far less firm than vital. Still the or ganization of labor is going on rapidly, especially where machinery greatly used and skill is required. The trades unions object to the employ-ment of non-union men in order to protect their organization. The em-ployers of England are about to try to break down the labor unions and to break down the principle of collective bargaining. The house of lords has decided that unions can be sued. This will pave the way for endless litigation in which, because of weaker resources, the unions may be ruined.

"English workmen will turn to poll-tics if they have the brains. In the meantime as trade declines, we will see a series of big strikes and lockouts.
