### MINING NOTES.

Good reports are coming from the La Sal mountains.

Five carloads of ore is the latest con-tribution from the Uncle Sam.

D. W. Brunton is out at Mercur and will go to Bingham on his return trip. Samuel Newhouse is expected to reach Salt Lake about the first of De-

Hon. David Evans has been inspect-

ing properties in Thayne's canyon, near Park City.

Ed. W. Duncan has been looking over mining properties in Beaver coun-ty. Matt Cullen is now in that sec-tion looking to the securing of patents on several claims.

Experiments are being made looking to the use of sing from the Pascoe at Stockton for fluxing purposes at the new smelter of the Bingham Copper cents higher and active. Bulk of sales, 4.5574.90; heavy, 4.821574.95; packers, 4.8574.9215; mixed, 4.8574.90; light, 4.85 674.95; yorkers, 4.871274.95; pigs, 4.457 and Gold Mining company.

Colonel George W. E. Dorsey is here from Lincoln, Neb., and will probably remain here until after the holidays. During his stay he will devote much time to his mining business in Utah.

The White Pine, Nev., News says that S. T. Thompson, formerly of Park City, has secured, in the interest of Salt Lake parties, a bond on the Ida property, which is located near White Pine

It is expected that sinking will soon be resumed in the shaft of the Honorine mine. But little water now re-mains to be pumped out and the new machinery is making very short work of that

Mining company, started today for Chicago, where he will attend a meet-ing of the stockholders of that cor-poration, which will be held on Decem-ber 1st.

Superintendents Skyrme and O'Niell, of the Amalgamated Copper company's mines at Butte, are investigating the ave system of mining now being praticed at the Consolidated Mercur and Highland Boy mines. They will also make a thorough examination of the Golden Gate mill. The gentlemen will go out to Bingham before returning to Butte, where they may introduce some of the practices of Utah miners in the

Argent, at Stockton, returned last night from a visit to the property, upon which was recently erected a new mill of 100 tens daily capacity. He reports the mill running in excellent shape and says that the property as a whole is making a good showing now with prospects for improved outputs in the near future. About 30,000 tons of low grade ore is estimated to now show, and that large bodies remain uncovered is confidently felt and may rea sonably be expected

"I have used Chamberlain's Colic 'holera and Diarrhoea Remedy and find It to be a great medicine," says Mr. E. S. Phipps, of Poteau, Ark, "It cured me of bloody flux, I cannot speak too make it a favorite everywhere,

### ----CASE OF DESTITUTION.

There is said to be a case of want and destitution at 768 south State street, where lives Mrs. Ceell Bornstein, a widow. She has three small boys to care for, besides herself. They are the care for, besides herself. They are the a true fissure beyond a doubt in his sons of Louis Friedman, the peddler, mind. It is expected that Mr. Clement's who was robbed by highwaymen in the eastern part of the State about three months ago. Friedman has always manifested great parental affection and when he committed his three boys to the care of the widow Bornstein, or starting on his trip last spring, he promised to pay her \$20 a month for their support. The promise was kept up to about two months ago, when the last word that the woman receive from him was from Rawlins, Wyonday saying that he would send her some goods in a few days which she could

sell, and realize enough on them to compensate her for the keep of his sons. Mrs. Bornstein dld not get the goods and fears that Friedman has met with and fears that Friedman has met with foul play. Depending upon the remit-tances from Friedman, she has con-tracted debts which she cannot pay, and she says she is now in need of the necessaries of life,

owned by various parties, all of which will use the smelters of the company for the reduction of their ores, being 86 unable to ship to other parts on account of the great cost of transportation. 5.2216

### CONSOLIDATED MERCUR. October's Earnings Fell Below Those

of the Previous Month. Net profits of the Consolidated Mer cur company for the month of October were \$47,167.81, the third monthly report giving out these figures having promulgated last night. While the earnings were less than those of Sep tember, the fact is readily accounted for in the extent of development work which has been done and the amount of low grade ore necessarily removed in these operations. As a natural result the tonnage put through was larger than that of September and the values

smaller. The permanent benefits exmakes the showing altogether satisfac-tory to the management and the com-The figures for October are as follows: Tons milled ..... Mining, per ton, including

# Lower Prices in Iron Trade Has a

The British fron trade is showing tow-The British fron frade is showing tow-or prices, and the pressure of competi-ide is beginning to be feit, says the Engineering and Mining Journal. Sector is iron, which was quoted by the with not declaring a dividend of a half iron, which was quoted by the at reports at \$15.80 a ton, and Cleve-

duction of dividends and extensive de elopment. He is having assays made on thousands of samples and will soor make a full report. He is confident

that the mine still has a great future. On September 13, 1809, the Denver Evening Post published what was intended to be an expose of the methods then being pressed by the management of Stratton's Independence mine. On Monday last the Denver paper reproduced its own article for the purpose of vindicating the position taken by it ver a year ago, in view of recent de velopments which have given rise t incomplimentary stories about the nine's manipulation, and which have

ace gold mine, limited, of Crippi The English company which as charge of this mine philanthropic ily states that Stratton, in the sale I the mine to the English company, ude it a condition that his fellow contrymen might have the right to

uy 100,000 shares in the company, "The mine is only capitalized for \$5, 0,600, and the stock is now being of red to a confiding public at a basis of \$12.50 a share, making the price of the mine at this figure \$12,500,600. - It looks It looks as though \$7,000,000 of water had seeped into this mine since its purchase by the English syndicate. This mine has 110 acres of mining

'Let us compare this with the Portland. The Fortland has something over 100 acres lying alongside of the independence. It has paid more in dividends and is paying more now,

and is a better and larger mine in every particular, than the Independence. The Portland's capitalization is \$3,000,000 and the par value of the stock makes the mine worth, at the present time, about \$7,000,000, \$5,000,000 less than this English company is trying to unload the Independence at.

To a close observer it looks as though our English cousins were get-ting ready to sell a lot of their stock at about two and a half times what it

ost them. "See how ingeniously they have worked the deal since they came in possession of the mine For example hey claim in the last three months hat the mine has made so much that it is going to declare a dividen of \$500,000 on September 15, and the are bailing the public along with this dividend, as they declare all stock bought now will share its pro rate of

Now in the name of common sense, if this mine has made a half million dollars in the last three months, wh million and using this half million as a working capital? "They say they need this amount of

money or more for a working capital. Now as they have it, why not keep it

PRICES FURTHER ADVANCE

Business Was Enormous in Volume, but the Tone Was Yielding After High Opening.

### First Dealings Were in Very Large Blocks-Gains Generally Were Only Fractional.

New York, Nov. 21 .- London led the way in a further advance in prices this morning. Opening dealings here were in very large lots, running from 1,000 to 5,-000 shares in many leading stocks. Gains, with few exceptions, were only fractional, Northern Pacific rose 1% and Union Pacific a point. There were running sales of 5,000 shares of Northern Pacific preferred at 85% down to \$5, compared with \$5% last night. Atchl-

son opened up an extreme 1% o nrun-ning sales of 5,000 shares. Business was in enormous volume, but the tone was rielding after the high opening on heavy sales to take profits. The effect was most marked in the Northern Pa afic, which jost 101% for the comm and preferred respectively, Subsequent , there was a rally, and the St. nd San Francisco stocks advance om 1 to 2 points, the Northern Pa cafics got within a shade of the high-est, Sugar rose over 2. Before 11 o'clock the market became highly irregular.

The tractions felt the impulse of a heavy demand which advanced them with Brooklyn Transit leading Other stocks succumbed to profit tak ing, and the weight of these sales caus-ed the tractions to run off before noon Gains in some of the steel stocks, the tobaccos and the Northern Pacifies were wiped out and other stocks re-acted a point. The market became juieter at lower level. The grangers ontinued to show strength. St. Paul rose 314

## FIRST SIXTEEN YEARS

Determine Structure and Physical Health, If parents could realize what a crime commit in permitting children to have heavy drugs during their early life, such drugs, for instance, as coffee, thich stunts their growth, prepared hem for dyspepsia and nervous wrecks they would do anything, go to any amount of trouble and care, to change methods and give their children the advantages that nature demands to

A sixty year old woman writes: "My over-indulgent papa used to say, at the table, 'Why not let the child have what she likes; it won't hurt her any.' He referred particularly to my drinking coffee, which I was very fond of as a child. He honestly thought it didn't hurt me, for with his strong body, apparently without nerves, he was not consciously affected by coffee, but the effect on me-a bundle of nerves-was to develop restlessness and stunt my

growth. "The first effect after drinking coffee was that of delightful exhilaration and felt courage and strength to attack almost any amount of active work, bu in a few hours the reaction came, with misery in my chest, palpitation of th

heart, and most unbearable pains in my stomach 'Finally my attention was called to Postum Cereal Food Coffee and we se-cured some of it. It was prepared ac-cording to directions, but breakfast being delayed, the Postum got an extra olling, which developed all its virtues, and we all fell in love with it from the first moment. The change in our physical health, after drinking Postum, was something remarkable. We have as delicious coffee as any one could ask, but it is a perfectly healthy coffee, and the we drink of it. in reason, the better we are. I am satisfied that the in creasing amount of heart difficulty of late years, among young people, is di-rectly attributable to the use of coffee, and it is a great blessing to have so safe and delicious a food coffee as Postum. Please omlt my name from publication." ——, East Brookfield, Mass. Name given upon application to Postum Cereal Co., Ltd., Battle Creek, of view. Mich.

law, order and morality, after fully investigating the case are of the opi the reverend gentleman is Salt Lake county to M. C. Sorencruelly dealt with, as there is not a shadow of evidence to substantiate the charge that is made against him. OIII city papers went so far as to say he was run out of Kemmerer for a similar offense. Bishop Talbot was here yes-terday. He presides over the Methodist conference. LIVE STOCK NOTES. Breeders' Gazette: A few scientists have ventured to deny the spontaneous combustion of hay. Farmers who have lost barns from conflagrations which could be traced to no other source were firm enough in their belief that an ounce of such fact was worth a pound of scientific theory which held that heat could not be raised to the point of comhustion in the haymow. The question has been investigated recently by an official of the United States weather bureau, who found that fermentation with moist hay may raise the tempera-ture to 374 degrees Fahrenheit, at which high temperature clover hay will ignite. The mooted point may therefore be acsepted as settled from a scientific point
