

The Osborn Self-binding Harvester
PAYSON, UTAH,
July 10, 1878.

Wimer and Temon:

Gents.—Being deeply interested in the merits of self-binders, we to-day witnessed the working of the Osborn Self-binder in barley, and we unhesitatingly recommend it to the farmers of Utah, as the greatest labor-saving implement yet introduced in our Territory. It is light draft, noiseless in operation—a positive binder, every bundle being tightly bound and not a wire broken during the trial. The bundles are dropped squarely on the butt end, so easy, that some remain standing. The elevator is all that could be desired. It seems durable, and so simple in construction, that any man, without much instruction, can operate it.

HOLDEN, MILLARD CO.,
July 11, 1878.

A. J. Johnson:

Dear Sir.—We, the undersigned, have this day witnessed the Osborn Self-binder, started by your agent, S. Scott, at work in very heavy rye. The ground was very rough and the grain badly lodged and tangled in several places, but the machine went right through, cutting, elevating and binding splendidly, and delivered the bundles in the best possible shape. We would advise the farmers of Utah to examine the Osborn Self-binder before purchasing.

Yours respectfully,

A. W. Brown, J. D. Hunter, G. W. Nixon, J. J. Ashley, G. W. Badger.

Such testimony and over such names as the above needs no comment. Every farmer has a curiosity to see a self-binder in operation, and once around the field after an Osborne convinces him that the time has come when man shall no longer earn his bread by the sweat of his brow, but has only to drive his team and his grain is cut and bound in much better shape than can be done by six men in the old way.

Every farmer who can possibly do so, should go and see an Osborne Self-binder at work.

A. J. JOHNSON,
General Agent for Utah.

MITCHELL WAGONS.—Flattering reports are pouring in from all parts of the Territory and Nevada, of the New Patent Steel Skeins, with other improvements adopted this season, making it the Best Wagon in Utah. Three car loads of the Patent Steel Skeins now on the way. Call early and get one.

In the fall of 1839 he located in Nauvoo, remained there until the Saints were expelled. Journeyed with the camps to Winter Quarters, and in 1849 arrived in Salt Lake City. He was always steadfast in the cause of truth, and possessed his faculties to the last. He raised a family of 10 children to man's estate, and had 65 grandchildren and 17 great grandchildren.—Papers of Southern States please copy.

THE DAUSMAN & DRUMMOND TOBACCO COMPANY'S

This 16 ounce army pound is marked into 16 equal spaces (1 1/2 x 1 1/2), each space representing an ounce. It being justly divided, the consumer is satisfied with his allotment, and the retailer knows that he has given neither too much nor too little; as he is liable to do where the lump is not so marked. This lump also renders it unnecessary for the retailer to have more than one package of Tobacco open at a time, as he can accurately cut any size lump needed from a 12 ounce lump down to a single thick pocket piece. It is the only plug of Tobacco marked for the benefit of the dealer and consumer. All others marked with tin wood, leather, or other tags, or in any other manner are so only for the benefit of the manufacturer.

It saves interest, as a single package gives the dealer the sizes he requires, it is not necessary to keep six or eight open at a time as is usually the case.

The manufacturer is able to make a better chew in a pound lump than in a smaller one for the same money. No loss can accrue from change of styles or variation in prices. Most dealers know by bitter experience how great an advantage this is. It is manufactured with the utmost care and each plug is perfect in chew and style.

For sale by all Wholesale Dealers.
