LOCAL AND OTHER MATTERS.

Thermometer 72 degrees F. in the shade, at 1 p.m. today. Cloudy.

Delegate Cannon.—It will be seen by a press dispatch, to-day, that the Committee on Elections have refused, by a vote of six to five, to report on Hamilton's resolution for the expulsion of Delegate Cannon.

Base Ball.—The first game between the Alet and Deseret clubs will take place to-morrow afternoon, on the Eighth Ward square. Game will be called promptly at 3 o'clock.

Fifth Year.—Our contemporary, the *Herald*, entered upon the fifth year of its existence this morning. Its career has been lively and prosperous.

Beef.—Brother Barber, of Smith, field, who is in town to-day, says there is an abundance of beef in Cache yet, notwithstanding the cattle losses of last winter, and things generally are prosperous throughout the valley.

An Example.—This morning a young man was fined \$2.50 for allowing his team to stand unattended and unattended upon East Temple Street, giving it opportunities to run away, which the animals took advantage of. A few more examples of this kind would perhaps tend to induce teamsters to be more careful than they are in general.

From Tooele.—Mayor Andrew Galloway, of Tooele, is in town. We learn from him that there is a fine prospect for an abundance of fruit in that part of the Territory. He confirms the report, received here the other day, that about one hundred Indians had been baptised lately, by Interpreter Lee, at Deep Creek.

Opened.—The enterprising confectioner, Mr. Henry Wallace, has opened another establishment, on East Temple Street, two doors south of White & McCormick's bank. It is fitted up in accordance with the proprietor's proverbial good taste, with all the conveniences usual to such places.

Runaway.—To-day a couple of mules, attached to a wagon, started up East Temple Street, from the front of Z. C. M. I. retail grocery premises. The runaway collided with another wagon, knocking the box off the latter. These lively mules were stopped when they reached the corner opposite this office. The wagon was loaded with grass and the donkeys probably thought the fodder was at the wrong end and they wished to chase it around as a kitten does its tail.

Respect for the Departed.—To-day the fellow-workmen—masons and stonecutters—of the late Henry Eccles, who died yesterday afternoon, of lung disease, assembled on the Temple Block, to the number of between forty and fifty. Each had on a blue masonic sash, and all formed into a column of two abreast and marched, in this order, to the Fifth Ward school-house, to attend the funeral services of the deceased, who was held in much esteem, as an honest, upright man, by all who had the pleasure of his acquaintance. He labored for many years on the public works, and occupied the position, on the Temple Block, of foreman or judge of the stonecutters' work.

Bountiful Branch.—Yesterday two meetings, which were largely attended, were held in the Bountiful Tabernacle, and a branch of the United Order was organized at that place. President Geo. A. Smith and Elders Orson Pratt, John Taylor and Geo. B. Wallace were present and addressed the people.

The following officers were elected:—
President, Anson Call; 1st Vice-President, Wm. Atkinson; 2nd Vice-President, John Stokely; Treasurer, John Telford; Secretary, William Thurgood; Assistant Secretaries, Chas. R. Jones and Jaren Tolman; Directors, Sidney Kent, Wm. Brown, John K. Crooby, Joseph Holbrook, Chas. W. Mann, Henry Tingey, Orin Hatch, Geo. D. Grant, Henry Hampton, Thomas Briggs, and John Moss.

Theater.—"Morte Christo" was again splendidly played last night. There is a fine bill for to-night. The entertainment consists of "Naval Engagements," the "Lingard Sketches," and the burlesque of "Norma." In the first Mr. Lingard appears as "Admiral Kingston," Mr. Sawtelle as "Denise," Miss Dicky Lingard as "Mortimer," Mrs. Douglas as "Mrs. Pentifex." In the sketches Mr. Lingard will give Col. "N. G. S. N. Y.," "Dutch Onions," "Five Times a Wife," "The Tenor and Baritone," "A Frenchman's Blunder," "I Shouldn't Like to Say," and the following able personations:—"Emperor Alexander of Russia," "Emperor Joseph of Austria," "Emperor William of Germany," "The Shah of Persia," and "President Grant," and will draw a well-known character.

The performance will conclude with the laughable burlesque of "Norma," in which Mr. George D. Chaplin will appear as "Norma," Mr. Crobie as "Adelphi," Mr. Thorne as "Orsini," Miss Cogswell as "Polly," Mrs. Crobie as "Cecilia." The Lingards appear only for one evening.

To-morrow a grand Chaplin Matinee, when the beautiful comedy of "School" will be presented.

On Saturday evening Mr. George D. Chaplin will appear in the thrilling sensational play "Nick at the Woods."

FANATICISM.

One of the most glaring evidences of religious bigotry and fanaticism was given by the clique the other day, on the arrival of the news that the Peland bill had passed the House of Representatives, when they published a circular, headed "Glory to G-d." This smells powerfully of religious persecution, as well as fanaticism. However great the efforts may be to make the aggressive movement against the "Mormons" appear other than a religious crusade, its real character will crop out occasionally. We may say, in this connection, however, that some of the more conservative of the crusaders are heartily ashamed of the fanatic course of the majority of their fellow persecutors, or at least they think their actions unwise, and calculated to injure the bad cause they have espoused.

Severe Accident.—Last Tuesday a very severe accident occurred to a Tooele to a lad about seventeen years old, named Sims, son of the late Elder George Sims, a former resident of this city. Himself and Mr. Moultrie, who was engaged in hauling brush, in Middle Canyon. Mr. Moultrie descended from the load, and without thinking about the lad getting down, picked up an axe and struck into the rack. Young Sims was descending at the time, and the blow came down upon his right hand, severing it in two, excepting a little tag of skin. Dr. Bodds attended to the injury as soon as possible. He joined the detached portion of the hand to the remaining part of the palm, and bound up the injured member. The Doctor is of opinion that the unfortunate youth will never regain the use of the hand.

Geological.—The following is an extract from a letter from Mr. F. B. Meek, of the Smithsonian Institution, at Washington, to Prof. J. L. Barfoot, of this city, in answer to some inquiries made by the latter regarding some geological specimens from the vicinity of the Warm Springs, as it bears upon the question as to whether it is probable that coal deposits exist in the latter vicinity, it will, on that account, be interesting to some of our readers:—

"The fossil you sent is a *Productus*, apparently recently, and to the form we generally call *P. Productus*, in the carboniferous rock of the Mississippi Valley.
