ANOTHER PIOCHE MINE TRANSFERRED

A Control of the Bristol Con. Company Goes to New York Capitalists.

WHAT LEASERS HAVE DONE.

Took Out Over \$90,000 as Their Share In Six Months-Extensive Work Planned.

Following the consummation of the fical whereby Samuel Newhouse secured control of the Ohio-Kentucky Mining company's property at Ploche, Nevada, comes the information that F. L. Underwood and associates of New York have taken over a control of the Bristol Consolidated company's properties at Bristol, one of the camps adjacent to Pioche.

It is understood that Mr. Underwood has provided the sinews, and that plans have been laid to carry on an extensive campaign. W. B. Brace has been named as manager and has received instructions to cut loose.

The Bristol property has been worked by leasers recently and at the expiration of the six months, the time the lease ran, they drew down as their share of the proceeds a little over \$90,000.

The Bristol mines are situated north of Pioche, but within the same mineralized area. Heretofore ore shipments have been sent out by teams to the nearest railroad pointteams to the nearest railroad point-a distance of 45 miles. The shipping ores carry high values in silver and lead. The mine also contains large bodies of low grade ores which will be made marketable by the installa-tion of mill facilities and the probable extension of the Pioche branch of the San Pedro, Los Angeles & Salt Lake railroad to the mine.

COAL NEAR ELY.

Effort Being Made to Develop a Deposit Near Hamilton.

Capitalists back of big Ely enter-prises are deeply interested in the el-forts now being made to develop a source of fuel supply within the district surrounding the camp, says the White Pine New. An enormous amount of coal will be used in the \$10,000,000 smelter of the Nevada Consolidated and the Cumberland-Ely, and other projected plants, and the owner of a good coal mine near here woul reap a great for-Coal was found near Hamilton more

than 40 years ago. At one of the old coal mines about 20 miles west of that camp there is a 40-foot shaft, but the mine has not been worked for years. Near the Conners ranch, along th Osccola road, there is another point at hich there is a large tract of carboniferious lime, which prospectors say is looked upon as a good indication of coal deposits in known coal regions. Will Stewart says that if this showing were :n Utah or Pennsylvania, enerdevelopment work would be undertaken in the expectation of finding

found in the vicinity of Osceola. The coal properties, some of which are owned by C. E. and R. A. Millick of Osceoia, are about 85 miles from Ely. Albert J. Millick says that most of the way to the coal ground would be as favorable to railroad building as the territory traversed by the Nevada Northern Into Ely, but that the Osceola range and the Shell Creek range would have to be passed. The Osceola range can be passed at Snake raise and the Shell Creek range at either Cooper Pass or at Connor's ranch. He added that the snow is now too deep in the vicinito be satisfactorily examined by

LLOYD MAKES PAYMENT.

Buys Two Claims in Seven Troughs Mining District.

Ben T. Lloyd, who, with other Salf Lakers, has made a hit in the Seven Troughs, Nev., district, yesterday after-noon made the initial payments on two more claims which are to be added to the original Knickerbocker-Lloyd group. The claims are known as the Daisy and Red Top. On the former a payment of \$2,000 was made and on the latter \$1,500

A GOOD ELY EDITION.

One of the prettiest Christmas edi-tions out this year is the one issued by the White Pine News of Ely, Nev., in which the resources of that wonderful copper camp are portraved in an interesting manner. The edition is embelished with many spiendid halftones. It will give Ely the best advertising it ever had and speaks volumns for the enterprise of the publishers as well as for the business interests of for the business interests of the camp. The publication of a daily edition of the White Pine News was begun yes-

AS VIEWED IN BOSTON.

Financial Paper Comments on Local Smoke Situation.

The Utah situation seems to have been complicated by the smoke decis-ions, says the Financial Ne of Boston. The talk that has been going the rounds that the companies located near Murray would move in the very near future has forced a good deal of stock into the market. The smelters will eventually work out the problem all

When it comes to a showdown and they once start to move their plants to some location where a city other that Sait Lake will get the benefit of the smelter trade a howl will be raised that will force some definite actiway or the other that will clear the

eral promising real estate ventures it

eral promising real estate ventures if the smelters should move from Murray to another location somewhere in the vicinity of Provo or Ogden. The ranch-ers, too, would lose one of the best customers they ever had. The Utah Consolidated company is the worst offender in the smoke nuisance business, but the prop-erty is so rich and the cost of op-eration so low that it can well afford to pay a few cents a ton more for freight than to stand the continual bombard-ment of litigation to which it has been ment of litigation to which it has been

ON MINING EXCHANGE. Lower Mammoth Goes up to \$1.20 a

Share-Other Sales. The sales of the forenoon on the

mining exchange amounted to the transfer of 16,350 shares for which was paid \$14,453.25. Daly Judge opened strong and 400 shares sold at \$12.75. With few exceptions the trading of the open board was confined entirely to the Tintic list, all of them displaying more or less buoyancy. Lower Mammoth went up to \$1.20 a share, while Yankee Consolidated appeared active at 42 cents. Columbus Consolidated of Alta closed considerably stronger, as did Victor Consolidated.

BREAKS ANOTHER RECORD. Crowning Event of Manager Chan-

ning's Administration of Utah Con.

The present month will be another The present month will be another record breaker for the big Utah Consolidated company in the shape of bullion production. The company also made the best day's record last week when the furnaces turned out \$0,000

pounds of copper.

Manager Channing, in bringing
Utah Consolidated from a small enterprise to one of the great copper mining concerns of the world has performed an achievement which has placed him at the head of the class in his profession and by breaking another record during the last month of his administration, must certainly be most gratifying to him.

During the year 1905, Utah Con-solidated handled on an average 782.8 tons of ore a day, as against 900 tons a day during 1906. Its profits for the fiscal year 1905 were \$1,887,385, or \$6.29 per share paying \$4.50 a share

During that period the company did During that period the company did not receive in excess of 15 cents a pound for its ore, while during the current year it will average not less than 19 cents. This, with the in-creased production and the increased percentage of mineral in the ores will make the company's earnings for the year nearer to \$11 per share than \$9. | tuating the demand for men to a great

CRESCENT ON THE IMPROVE

Citizens of Camp Take a Very Optimistic View of the Future of District.

IMPROVEMENTS BEING MADE.

Many Shafts Going Down-New Mill To be Built-Other Mining

Special Correspondence. Crescent, Nevada, Dec. 23.-Crescent

a coming camp of the great mining state of Nevada. This optimistic forecast is not the idle dream of a correspondent that has spent an hour in this thriving and growing camp, but It is amply proven by the permanent improvements on the many developing mines in the Crescent district. From an obscure beginning, Crescent is fast coming into her own. The excellent facilities to ship ores and also the low rate of mining and milling makes Crescent the ideal camp for the investor and mining man. Since the recent big strikes on the Nippeno, Tiger, Merrimac, Golden Crescent, Wathena mine of the Ajax Bulifrog Co., and Sherrer properties considerable interest is manifest in the mines here. The camp has never had a boom but on the conhas never had a boom, but on the con-trary, has been growing steadily all the time until recently, when it started to go ahead with leaps and bounds. Now, Crescent is attracting the at-tention of every mining interest in the country

Supt. Chas. Straub reports active development on the property of the Ajax Bullfrog Mining Co., south of Crescent, where the foundations are being laid for the five stamp mill now on the ground. On the Wathena mine, owned by this company, rich ore was struck on the surface, and several shipments were made to the Salt Lake smelters, returns netting the management \$42 per ton. A shaft is being sunk on the vein and a station cut in at the 100 ft. level, where drifts are run in both directions. The vein is four feet in

Supt. A. J. Waddleton of the Golden Crescent Mining company is developing the properties owned by this company in a very systematic manner, A 4x7 feet adit tunnel is being run on the Syndicate claim east of Crescent, on the syndicate claim east of Crescent, on the vein.

A good strike was recently made on the Merrimac group owned by Frank Tursich. On this group, thre are two immense veins traversing east and west. Good hornings can be had from the surface on both veins, which are from 10 to 20 feet in width. Several open cuts have been made on the lead and the ore

have been made on the lead and the ore averages \$17 in gold with a small per cent of copper and galena.

General Manager R. W. Moore has a force of men sinking a vertical shaft on the Garbutt claim near the Lucky Dutchman mine. The shaft will be sunk 158 feet, whence a crosscut will be run to intersect the vein that traverses east and west the entire length of the property. Good hornings can be had from the surface of the vein. The lode is over 30 feet in width and the assays show values in gold, silver, lead and

Among the recent big strikes in the Crescent camp, the double standard has the Premier. In a crosscut from the bottom of the present working shaft, a six-foot vein of sulphide ore was encountered, which gave every indication

of permanency.

The vein is a true fissure with both The Vein is a true fissure with both walls exposed, and next to the hanging wall there is a foot of rich ore. Three assays from this streak ran 500 ounces, in silver and three ounces in gold on an average. The balance of the vein will go \$15. Several shipments were made recently to Kingman at Several shipments. recently to Kingman, Arizona, netting the management over \$300 per ton. This ore was the high grade taken from the hanging wall of the vein during the sinking of the shaft.

on the property of the Wyoming Searchilght, Supt. Jos. Reece is crosscutting the vein at the 100 foot level. The management expect to intersect the vein within 140 feet of work. The vein crops very prominently on the sur-face and in sinking the shaft, several large bunches of ore were encountered arge bunches of ore were encountered, carrying values in gold and silver.

The management of the Tiger mine have let a contract to Kellogg & Co.
to sink the main shaft from the 112

to sink the main shart from foot level an additional 100 feet. AFTER MORE PROPERTY.

Samuel Newhouse Said to be at Head Of Bullionville Company.

It is very evident, according to an eastern financial publication, that Samuel Newhouse intends to increase his holdings in the camp of Pioche, where he recently became a controlling factor in the Ohio-Kentucky Mining company. The announcement has been made tha Mr. Newhouse is now also at the head of the Bullionville company and that under his direction a smelting plant will be erect in the district in the near future. It is estimated that the Bullionville company has a tallings dump which contains ore of the gross value of \$3,500,000; to say nothing about the large amount of crude ore that could be treated profitably on the

Pioche is rapidly coming to the front Proche is rapidly coming to the front and is taking its place again among the great ore producing camps of Nevada. The operations of the Utah Nevada Mines & Smelters corporation has set the pace and with the Ohlo-Kentucky and Bristol companies preparing to preparing the pace of the pace of the pace and with the Ohlo-Kentucky and Bristol companies preparing to preparing the pace of the pa operate upon an extensive scale the old district will fairly hum with activity during the coming year.

HEINZE ON COPPER.

Expects to See it Sell at 25 Cents Per Pound Soon.

F. Augustus Heinze, at a Boston banquet, is quoted as saying the fol-

lowing:

"The copper situation is exceptionally strong and the present parity of prices is likely to be maintained for an indefinite period. The normal output of all the large producing properties is being restricted, both by the want of labor and the lack of suitable transportation facilities. There is also a serious scarcity of fuel throughout all the Western and Northwestern country, which is operating to hold in check the full development of all mining prop-erties. If the present methods emerties. If the present methods em ployed by the railroad companies to re-lieve the existing conditions shall fall, it will be pretty hard to say what the effect will be on the whole copper in-dustry. There is practically a labor famine now on in Montana and Utah. The demand is far in excess of the sup-The extensive railroad building now going on is seriously retarded by the inability of the roads to get men to do the grading work. All the min-ing sections would employ many more men than they are doing at present if they could be gotten. The recent ex-tensive development in the southern Nevada and California fields is accen-

tained, as it seems likely to be. I shall not be at all surprised if the price of copper reaches 25 cents per pound in the very near future."

Mr. Heinző incidentally spoke of the Davis-Daly proposition, saying: "I am well satisfied with the progress that is being made on the company's mines and feel confident that several big producers will be opened up there in due season. I am glad to see the way that the stock is acting and I am pleased, too, to know that the shareholders are satisfied with the prospects for the property. I see nothing but good ahead for the Davis-Daly proposition, and I do not believe that the people who have made favestments in the stock will have any reason to regret the same."
