DESERET EVENING NEWS: THURSDAY, JANUARY 16, 1902.

DAWN OF A BIG BOOM FOR IDAHO.

Great Irrigation Scheme to Be Effected in Sixty Days.

BUSINESS FOR SHORT LINE.

Nearly Three Thousand Acres to Be Occupied By Homeseckers-Branch Road May be Built.

Within the next sixty days it is said that ex-Governor Steunenberg's Twin Falls project, whereby 300,000 acres of and will be reclaimed for settlement in

Idaho, will go through. It will be recalled that the gentleman returned from the East at the early part of this week on his way home and spent several hours in this city with A. B. Perine of Blue Lakes and J. C. Lowell of Russell, Idaho. While here the gentlemen called upon the officials of the Oregon Short Line, who, it is said, confirmed the endorsement given to the project by the Union Pacific officials.

Under the date line of Salt Lake, January 14, the Evening Capital News prints the following special: Men with millions of dollars at their

command have become interested in a project of the greatest innortance to the state of Idaho and one which will add approximately 300,000 acres to the tillable soil of the state.

Practically the Short Line, but in reality the power back of the Short Line, namely, the Union Pacific Rallway company, acting through its high-est officials, have become interested in the great Twin Falls irrigation project. This is no irridescent dream but a statement that will be verified within the next sixty days. For the perma-nent advancement of Idaho it will mean more than Thunder Mountain, even if all that is claimed for that vast treasure house of gold is realized. The pro-ject means the irrigation of 270,000 acres of land which with the water of the Snake will rival in richness the very valley of the Nile. Not only this, but the power will be utilized for factory purposes, and a city, as if by magic, will spring up at the falls that will at once become a rival for the po-sition of metropolis of the state. A branch line from Shoshone or some other point will be run to the new town by the Short Line and electric roads run in various directions and electric power furnished for a circuit of 100 miles. This vast scheme with which an Idaho company is connected has received the endorsement, as stated, of the very highest Union Pa-cific officials. Upwards of \$1,500,000 is the amount at once to be placed for the inauguration of this great enterprise and the impetus to the growth and development of southern Idaho

and development of southern Idaho will be marvelous. With this enterprise actively under way within 60 days, with the building of the million and a quarter dollars Short Line shops at Pocatello and the attraction of people to the gold fields of Thunder Mountain it will seem that all eyes are turned towards Idaho, and these matters have led a prominent railway official to predict that the popu-lation of the state of Idaho will double in the next two years. As he expressed in the next two years. As he expressed

He started that way but it occurred to him before he had gone very far that perhaps the dedded to go in anyhow. Going to the Co-op second hand store he appropri-ated a saw unte himself and quietly waiked up the street. On State street he met Officer Jöhn-son and calling the blue coat to him informed him in a confidential tone that he had stoien a saw. He said he did not want the saw, that it was no earthly use to him. Whether it was, or would be any use to him in the other world he did not say. Then he asked Johnson to arrest him and throw him in jall. He said he had been to every place in the city worth looking at ex-cept the city jall and he wanted to go thers. The officer being kind hearted, accommodated the stranger and land-ed him in the t title. He wanted to see criminal life on the inside and the officers all expressed a willingness to do all in their power to sratify his yearning. This afternoon Jake Fjohn, a laborer who often finds his way into the city dail for drunkenness, took it into his head to look for trouble and after a brief search found it. Fiohn is now at the police station nursing a couple of ugly gasnes in his head, while thte po-lice are looking for the man who performed the operation. According to eye witnesses of the fracas, Flohn startes a row with an old man nearly 70 years of age. Fiohn insisted on trouble and finally the old man accommodated him.

The meeting occurred on Commercial street and caused intense excitement. The old man suddenly whipped out a knife and stabbed Flohn a couple of times in the head. The wounded man bled copiously and insisted on smearing the blood all over his face until his countenance resembled a dime order of Hamberger.

He was taken to the station, where his wounds were washed and dressed. The man who wielded the knife made

The evening was spent in discussing the instrument sec-tion by section, and a subcommittee, consisting of Governor Wells, Ex-Gev, ernor Thomas, George T. Odell and C. N. This committee will meet this afternoon to do their work and copies of the constitution and bylaws as it will be presented to the original committee of 100 next Saturday night, for publication, that the members of that committee may have plenty of
