an incorporated company without fur-ther transfer. The ground involved is the Murray Hill, Sego Lily and Silver Dick claims, lying at the head of the gulch above Silver City.

PARK CITY. Doings at the Prospects -- Ore Shipments for the Past Week.

(Park Record.) At the Bolder a drift is being driven to intersect the shaft at a depth of 65 leet, where provision for taking care of event it going he surface water to prevent it going down the shaft will be made. The shaft is being driven on down through the copper stained lime, and all conerned are satisfied with the outlook. The Wabash these days is the scene of busy operations. Foreman Wm. Campbell was down to receive a large con signment of machinery, and informed The Record that new bollers, air compressors, engine and other machinery would soon be installed. The holat is nearly completed, and other outside in-

rovements under the direction of M. Pape are assuming a completed te. The shaft is now down a disstate. ance of 145 feet, and is gaining depth at he rate of about five feet a day. Exerything has the most encouraging apenfance and the operators are well atisfied

patent.

Henry Welsh made a visit to the Wolverine and intervening properties the first of the week. At the Wolver-ine he found a strike had been made in the upper tunnel at a distance in bout ninety feet. The ledge and ledge matter has been penetrated a distance of about fifteen feet and still they are not through it. Foreman Cody says the rock gives Batisfactory returns in lead, filver and gold. The winter's supply of provisions, etc. is in at the Bonauza Consolidated, and work is going right along. At the Sunrise the new company are putting up a shaft house and are pre-paring for all winter work. Louis Coleman and associates, owning claims adjoining the Bolder Basin, are having a survey of their ground made

preparatory to making application for

ORE SHIPMENTS.

Following are the shipments of ore from the Mackintosh sampler for the past week: Ontarlo 879,000 Grand total 6,853,020 PROCESS IS A LEGACY. Death of Prof. Wynn Leaves Secret to His Business Associates. The sudden death of Prof. C. W.

Wynn and the testimonials to his worth as a man by those who were intimately associated with him will naturally lead the unscientific public to take a more charitable view not only of the individual, but of his alleged remarkable dis-covery. There must be good in a of whom all his associates speak in kindly terms, although acceptance of his theories may not follow, says the Denver Post. That he brought forth a great new discovery whereby the deterninations of science will in due course of its operation be revolutionized, we the face of the results produced. What the dying man might have disclosed to the surgeons who attended him had be been permitted to live long enough to complete the unfinished revelation be-gun before they put their knives to work, we cannot conjecture, but that an important secret struggled for utterance may be taken for granted amount of drifting and stoping to be done from this depth, 800 feet. The No The process which has excited almost universal attention is now the propert? vember production of the Elkton amounted to the regular figure, having whatever its value, of his associates, Willard Teller and Sydney Williams, who claim to be completely advised, a gross value of about \$100,000. and whose faith in its efficacy remains undiminished. What they will do with it remains to be seen. It would appear, however, from the post mortem state-ments, that Mr. Wynn had been engaged in a series of experiments which looked to the development of further important results connected with the treatment of copper and other minerals. As neither Teller nor Williams assert any claim to the possession of scientific knowledge, it would seem to follow that a chemist of the schools must be employed to assist them in the consummation of whatever plans they may have in view. That these men have under taken to deceive the public, that they have been or will be parties to a sys-tematic fraud, no person acquainted with them will for one moment believe. Mr. Wynn and his experiments have been more widely discussed during the past month than any other one topic. The statements given out by scores of miners whose ores in small quantities had been subjected to treatment in the club house laboratory, and others which have reached us through the press, have produced deep-seated conviction that a marvelous discovery has been made and while the observers have been astonished by the returns, not one is able to find out how they were evolved. They take it on faith. Only now and then a person who has witnessed the operation has been bold enough to pronounce it a By fire assay their samples were certified to contain a certain measure of value, usually from a trace to \$5 per ton; by the Wynn method gold buttons showing hundreds of dollars per ton have been obtained and placed in their hands. Such returns were invariably not only surprising but intensely grati-fying. As the proof of the pudding is in the eating, the proof of the ore was in the button. The explanations af-forded were convincing because every man wished them to be infallibly true for it signified easily acquired fortune practically worthless from his show any producer of mineral that the value of his product can be very large y augmented by a new method of handling by exhibiting the difference between results obtained by the sys tems in vogue and the new and no mat how skeptical at the outset, he will be brought to change his views by the definite promise of great rewards. Professor Wynn is dead. Whether any part of his secret died with him, wheth r Teller and Williams, to whom the gacy falls, will be able to advance the process in which they have unmeasured confidence, to general approval and acceptance, will be demonstrated as time proceeds. The untimely taking off of the chief promotor, the inventor so to speak, is regrettable, for there are thousands who housed he might be ble, notwithstanding the united skepticism of the scientists, to bring it to a stage whereby the mining industry ould be materially benefited. It was a great thing to hope for, and while every ther revelation along similar lines has ended in failure, this might turn out to be unqualifiedly genuine. If so, almost every miner with a claim of his own might aspire to sudden wealth, while vithout it, he would be forced to drudge along upon the old lines with no such prospect in view, unless his shafts, drifts or tunnel should open into a vonderful bonanza. Before what was good in the life and character of the late Charles Washingon Wynn, we how in reverence, man may say that in his death the world or the community in which he lived is made better by the removal of an impostor. His intimates assert that he was an honest man, that his purposes and his work were directed to the betterment of his fellowmen. Ac-cepting this testimony it is manly and charitable to say, God rest him.

Mark P. Braffet, A. H. Earll, Bishop Parmley, Dr. F. X. Mellen and Joseph Gamage. Their holdings are on the Grand county side of the river and are said to be exceptionally good. The El Verde Rio Gil company, composed of eastern capitalists, is put-ting in a plant of mechanism. MARKET QUITE IRREGULAR ting in a plant of machinery at tude on the Rio Grande Western way and will soon have begun bo for oil. W. F. Reeder is in charg perations. Swen J. Ross has returned to H

raim from his trip to Emery cou where he went to locate some oil la for an Illinois company. Mr. says his task was a great deal has than he anticipated, as nearly whole of the desirable country has ready been located. He succee however, in getting hold of a p quarter section of land that had t overlooked in the rush. Mr. I also secured a number of specimen fine copper ore, which he found in same country.

Grand County Incorporation.

The secretary of state today recel a copy of the articles of incorporat of the Westwater Land & Mining c pany of Westwater, Grand county. pany of Westwater, Grand county, J company is capitalized at \$100,000 in shares. Its board of directors consi of J. R. Merifield of Cheyenne, Wy president; C. S. Fitz Simmons of La ing, Mich., vice president; George Darrow of Westwater, secretary a general manager; Frank D. Darrow Denver and Lincoln C. Stockton Westwater. The Darrows have or veved to the corporation several tra Westwater. The Darrows have over the veyed to the corporation several tr in Salt Lake and Grand countles, gether with the Westwater Irrigal canal, extending from near Utal Colo., to the Westwater valley in Gr county, also a number of mining cla in the Moran mining district of Gr county. As full payment of 1,000 sha of the capital stock Lincoln C. Stockton is to give his personal services to the company until 34,000 shares have been in the London copper market. sold at par and the cash paid into the company's treasury.

Developing the Wadwaso.

Denver and Cripple Creek people are largely interested in the Wadwaso mine at Leadville, Colo, and they are prospecting new work in virgin terriprospecting new work in virgin terri-tory there, with very successful re-sults. A number of the owners are hopeful of its making a big mine. Charles Owens of Denver is president, and L. A. Watkins of the same place secretary of the company, which con-trols the Felluse Neerade, and Payanue trols the Eclipse, Nevada and Revenue Cutter properties, lying east of the Ibex group and near the foot of Ball moun tain. The shaft is now nearly 80 ofeet deep, having been continued from a depth of 250 feet. At 720 feet the mineralized matter was encountered and the miners went through 30 feet of it. This stuff gave only a small value, but now a: 750 feet it is improving and gives pay assays. The shaft will be sent suil deeper, as the company is prepared to open up and develop its combination thoroughly, confident that a paying mine will result.

Water Under Control.

The Elkton company at Cripple Creek will this week pull out the bulkhead that has kept back the water flow in the eighth level of the mine for the past year. It has been found that the valve can be opened at any time and the pressure handled by the pumps that are at present being operated. The level will accordingly be drained and the development of the property can proceed at greater depth. The bot-tom level had been run out only a short distance when the management was compelled to suspend operations on account of the flood from the eleventh level south, and there is still a large

was confined to a few only of the securities posted on the board, but in one of these-Carisa- the sales piled up rather high and the price fell down commensurately low. On yesterday morning this stock went swinging to figures that averaged around 80 cents per share, but this morning it was a plaything for the bear at as low as 72½ cents, and no better than 75 being realized at the zenith of its glory. There was a strug-gle to bring the vagabond back to its old standing before all the business was done and success was achieved to with in several milles of that point.

Ajax was made decidedly groggy after the first blow, and from a first sale at 79% cents, which was a reduction from yesterday's worth, the stock was 'a mark" for the kindly-disposed gen tlemen who impersonate bruin on the exchange and down it headlonged to 78 cents, but in order to save it from too great a slaughter its seconds threw up the sponge by refusing to risk any more shares in the pit. So they held on and saved some glory to themselves. California was improved and May Day was badly hammered in price, but

both did comparatively little of the business.

SOLICITING STATEMENTS.

In order to obtain Information upon which to correctly and fairly estimate the values of stocks represented on the exchange the listing committee has authorized Mr. Herman Bamberger to so-licit from owners of mines and officers of companies, whose stocks receive the endorsement of the ethange by reason of their presence there, to furnish state ments of the condition of their proper ties with respect to debts, earnings, or in sight, etc. It is thought that by this means the tangle which resulted in the late slump may be undone and a basis of value established which will not allow of such variations in prices as hav been witnessed and which have been the result of the problematical nature of the property values dealt in. Inasmuch as there has been some ill feeling engendered between mine owners and stock brokers on account of the drop in prices, each blaming the other for the shrinkage, there will undoubtedly no difficulty encountered by Mr. Bam-berger in the mission to which he has een assigned. He began his work this afternoon and expects soon to have quite an array of satisfying facts and figures to present to the exchange and to people who would like to invest but are now without such data upon which to use their own judgment.

NO SALE.

After the announcement the "News" last night that 100 shares of Silver King had been sold on the open board for \$82 per share an investiga tion was made with the result that was discovered that the ticket had been made out and signatures thereic lorged by one of the boys who do indiidual elerical work for brokers. Th deception was easily practiced upon the reporters for the reason that brokers in many instances allow their boys make out and sign tickets recording their sales or purchases and in this case nothing irregular could have been suspected. If the guilty lad shall be found repeating the joke he may regret his foolishness. There was no sale of Silver King.

THE TRADING.

\$28,500,000 COMPANY.

Great Copper Concern Organized in New Jersey.

The Copper Range Consolidated company was incorporated at Trenton, N. J., today, with a capital of \$28,500,600. The company is formed to mine, smelt and deal in copper and other ores. The incorporators are John Gordon, Her-bert I. Foster, D. A. Childs, Paul T. Draper, Michael Sapri, all of Boston; Augustus S. Meeker, Louis B. Dailey, K. K. McLaren, Clifford W. Perkins, all of Jersey City.

IN TINTIC.

Developments and Accidents in the Big Mining Camp.

(Eureka Reporter.)

John Duggan met with an accident at he Gemini mine last Wednesday afternoon. Mr. Duggan was working be-tween the 1,500 and 1,600 foot levels, and had blasted to make room for a set of timbers, but in putting up the cap it dipped off and one end of the post fell down, striking him a glancing blow on the hip. The injured man was able to walk home and was not seriously hurt. Mell Reed, a miner employed at the Star Cons. mine, narrowly escaped being killed last Monday afternoon. He was standing on a "stull" in a winze when an iron rail which was being lowered from above fell and striking him on the shoulder, caused him to fall about twenty feet. He escaped with a few

All of the property embraced in the corporation of the West Cable Mining company was scheduled to be sold under sheriff's sale at Nephi on the 30th inst, to satisfy a claim held by the Utah Saving and Trust Co. There are six claims, beside the shaft house, machinery, tools, etc. Fred Flynt, one of the lessees of the

May Day mill, is quite sick, presumably from the effect of the dust at the plant Mr.Flynt was working in the new plant during the time it was being tried and before the dust accumulators had been attached. Mr. Wood, the inventor of the

plant, has the pipes so arranged that further trouble from the dust is not anticipated.

(Tintie Miner.)

Owners of La Reine stock are jubiant over a strike in the property that bids fair to put them on Easy street. A few days ago Manager Fred Schmidt started a drift on a small streak of quartz, seventy feet above the main tunnel, which has since widened into five feet of ore, fire tests of which show 4 to 6 per cent copper and from 30 to 170 ounces sliver, with an average value across the face of 50 ounces in the white metal.

During the past three months the To sora company has shipped 28 carload of ore and 41 carloads of concentrates At present a pump is being installed which will enable the superintendent reach the 400 foot level, where it is said a body of shipping ore was expose sessment.

In the suit of the Murray Hill M. & M. Co.vs William Havenor and Al.Heu-sted, the Supreme court has affirmed the judgment of Judge Higgins of the Fifth district, which gave the disputed territory to the mining company. Ha-venor and Heusted claimed that the company's title was invalid because the incorporators, who were the original owners, did not deed to the original tion. The point involved was whether Green river and are preparing to or-ganize the Eastern Utah Oil comclaims could be exchanged for stock in pany.

Utab Oil Fields.

Among those interested are

(Eastern Utah Advocate.) Scofield parties have secured some-thing like 1,500 acres of oil lands near

Amal Copper . Am Sugar Co Am C & F, com Gemini shareholders have re-elected Do pref Anaconda Co . their old officers and directors. Golconda of Park Valley has been admitted to the board's list. Rev. R. G. Rescamp and John W. Burton have retired from the California directorate and A. P. Bauer and E. W. Griffiths have been elected in their stead. Copper exports from the United States druing the ten months ending October 31 amounted to 174,005,440 bounds. The exports were 137,088,000 bounds larger in the same time last year; 35,329,280 pounds greater in 1899; 88,415,040 pounds in 1898, and 70,902,720 pounds greater for the first ten months of 1897. Copper exports this year are the smallest in five years. The People's Advocate, published at Malad, Oneida county, Idaho, is en-thusiastic over the mining outlook and delivers itself thus: That Oneida couny is just on the eve of a great min-

MINING NOTES.

ing boom seems evident. With 2,200 acres of oil lands near Preston rich quartz mines in the mountains be-tween Weston and Malad, and also partly developed mines up in Ban-nock; and this being headquarters of Caltiornia Copper Mining and Milling company, why, what is there in the way of Malad's rapid progress forward, Whoopee! Kalispell (Mont.) Bee-James Thomp-

son has returned to Kalispell after a stay of several weeks' duration and the Kintia oil fields. He had been employed most of the time while in that country on the properties owned by the Butte Oil company, and peaks in glowing terms of the future that section. He brought back with im about a gallon of the finest oil yet een in Kalispell which was taken from the big petroleum seepage only a distant from where the oil well is i

sunk by the Butte company. People's Advocate (Malad, Id Another oil company has been fo o be known as the "Great We Oil company," with headquarters Montpelier. The capital stock is 000, divided into 1,006,000 shares o Montuelier. par value of 10 cents each. The tors of the new company are Burke, D. U. Kuney, L. H. Lubbe Sponberg, Thos. L. Glenn, H. Corrick, Lee Snow, M. Malone and David Falof Montpelier. This makes ick, all three oil companies in this state at present, and if there is any oil flowng around under the turf, it will sure-

ly he discovered. Alder Gulch (Mont.) Times-The New York and Montana Mining and Milling Co., under the manage ment of W. B. Holmes, will start the pumps on the Alameda mine as soon as possible and de-water the mine, in or . der that the old workings may be thoroughly prospected. It is said that when the mine closed down some years ago there was three feet of ore at the bottom of the 400-foot shaft. If . this should prove to be true the mine will indoubtedly be worked permanently The Kennett mine temporarily sus

ended operations Monday. Work will e resumed immediately upon the return of W. B. Millard from Denver, loid, whither he has gone to purchase incentrating machinery. The mine is

ooking better than ever.
