EDITORIAL NOTES.

Losses by the late London fire are said to amount to the enormous aggregate of \$15,000,000.

During the last ten years, cattle in New South Wales have increased very little, but sheep have multiplied from sixteen millions to thirty-three millions.

A howl goes up from the British aristocracy because Lady Gertrude Douglas has married a baker. Whether the baker's kin are equally dissatisfied does not yet appear. Advice per cable are anxiously awaited.

In the case of McCarthy vs. Loupe the Supreme Court of California has decided that a real estate owner cannot recover for services rendered in the sale of property unless his employment is evidenced by a written contract.

A Reno preacher has lost faith in the efficacy of prayer. He had one of his horses stolen, and he went to his study and prayed that a quickened conscience might induce the thief to return it. That night the fellow returned and stole the other.

In the list of references to various Committees of the different sections of President Arthur's message, the paragraph about Utah is not noticed at all. There is no need of any committee on a question that is not at present a subject for congressional action.

The Chicago Railway Age reports that 1,065 miles of road were completed in October, making 5,443 miles in ten months in 1892, against less than 5,000 miles for the same period in 1891. Of the total noted above for October, nearly 700 miles were finished west of the Mississippi river.

South Dakota, which wants to be erected into a State, cast 31,000 votes at the last election, or one-thirtieth of the vote of the State of New York. Yet South Dakota wants two United States Senators and a Representative in Congress, while Utah, with 150,000 people has no representation at all.

The Ellsworth (Me.) American says a new insect has appeared in the town of Cherryfield. It resembles a large snail, has the power of elongation, and when extended to its full length is three or four inches long. It is supposed to have been brought from Europe in a bundle of huckleberries. Its only motive power is crawling, which is no faster than a snail, yet in a few years it has invaded a number of farms on both sides the Narragansett River. Farmers have begun to dread it more than the potato bug.

A Canadian medical journal contains an account of a number of cases of acute articular rheumatism being cured by fasting from four to eight days. In that time says Dr. Wood, Professor of chemistry in Bishop's College, Montreal, the patients were allowed to drink freely of cold water or lemonade in moderate quantities. No medicine was given, and the physicians who observed the cases were strongly inclined to believe that rheumatism is, after all, only a phase of indigestion, to be cured by giving complete and continued rest to all the viscera.

Dr. Siemens, one of the most noted experts on the subject of electric light and power says: "Electricity must win the day at the light of luxury, but we will find an ever-increasing application for the more humble purposes of diffusing light." The estimated cost of lighting the whole of London by electricity he places at \$70,000,000, including the plant and internal fittings. In extending the same to the towns of Great Britain and Ireland the cost is placed at \$230,000,000. The relative cost of electricity as to gas he gives as 25 to 22.

The Philadelphia American, referring to the advice of the Utah Commission in regard to a marriage law for this Territory says: "The only objection to this is that it would accomplish very little. It would lay upon those who intend to marry and upon the offspring of such marriages, no heavier penalties than at present. And it would be very likely to prove a dead letter in the face of united resistance." It is strange that there is so much fuss and pother over the marital relations of a few members of the "Mormon" Church, while thousands upon thousands of people all over the Union sustain social relations that are indefensible, and not a word is said about it by our national lawmakers.

A recent telegram stated that "A few days ago the President nominated Wm. C. Connelley, of Ohio, to be Indian agent at Umatilla agency. While the offices in the Territories are open to persons from any State it is unusual to fill positions in the States with individuals residing in other States Representative George called at the Interior Department to learn why an Ohio man had been given an office in Oregon, and the excuse of the appointing power was that it was thought the Umatilla agency was situated in one of the Territories. Connelley's nomination was withdrawn, and George is waiting to hear from home before recommending an Oregon man for the place." The question arises, why offices in the Territories are more than in the States should be filled by strangers and persons who have no stake or interest in the locality? The principle that demands restriction for offices in States calls for residents for offices in the Territories.

POOR PROSPECTS FOR THEM.

In regard to the latest attempt of the Utah clique to prevent any representation in Congress of the people of this Territory, the *Alta California* recently had the following sensible editorial:

"Petitions from the 'Gentiles' of Utah are being sent to Washington asking that Calne, the newly-elected Delegate to Congress, be expelled. The only reason assigned for the request is that the vexed problem cannot be settled until political power of all kinds is taken from the 'Mormons.' If no better ground than this can be discovered for refusing Calne his seat, we do not see how the House can accede to these requests, much as it may dislike to gratify the 'Mormons.' They have complied with the conditions of the Edmunds bill and elected a man who, though a member of the Church and presumably in sympathy with polygamy, is not an actual polygamist. This being the case, Calne ought to be admitted, and when the dispatches state that it is safe to assert that no person elected by the 'Mormons' will be admitted to Congress, it is certainly an error. The law of the country cannot be violated for the purpose of punishing the 'Mormons' or of pleasing the 'Gentiles.' It may be well enough to abolish the Legislature of the Territory and also its representation in Congress, but it must be done in due course of law, and so long as the law gives a seat to a person elected to that office in conformity with the established regulations must be allowed to take his seat. Congress is simply justified in taking severe measures for the repression of polygamy, but not in violating the laws that have been made or in employing any means open to the charge of unfairness or illegality."

The *Alta* has never been known to favor the "Mormons," but perceives that the plea of the schemers who are trying to keep up the anti-"Mormon" agitation in the country, that all political power should be taken away from the people of Utah, is both unjust and absurd. We are inclined to think that this will be the view of a very large majority of the members of Congress, as well as of all fair-minded people in the land, no matter how much they may have been unduly excited on the polygamy question.

The "Gentiles" of Utah do not urge this insensate plea. It is put forth by not more than a baker's dozen of unprincipled rascals who assume to speak for others without authority. The respectable "Gentiles" of Utah take no stock in the devilry of these few plotters, but would prefer peace to this perpetual anarchy and turmoil, which bring them no benefits and accomplish nothing to ward the end designed by the "Mormon" eaters.

What the petitioners are after is plainly manifest in their piteous plea to Congress. They want political control of this Territory against the will of nearly all its citizens. If they can't have that they wish to deprive it of all political rights and privileges. There never was a clearer case of the "rule or ruin" disposition than that we are of the opinion that they will not get their greedy fingers into the treasury of Utah this year. Neither will they succeed in prevailing upon the lawmakers of the land to trample upon the Constitution and the fundamental principles of democratic republicanism, for the purpose of afflicting a people whose religion is unpopular, and whom it has been the fashion to abuse. The baker's dozen will have to wait, with small prospects of any immediate chances either to rule or ruin the "Mormons."

DISTRIBUTION OF CARP.

We learn from Dr. J. D. M. Crookwell that the United States Fish Commissioner contemplates sending a carload of carp to the Pacific States and Territories in January, 1893, and has forwarded blanks to be filled up by owners of ponds wishing to obtain the fish. Nothing was said, however, about expenses, but Dr. Crookwell agrees to forward applications for the carp for those who will communicate with him at once at Clear Lake Fish Farm, Millard County, Utah. The applications must be sent by him not later than the 1st of January. Each application must contain the name and address of the sender, location of pond, nearest railroad station, nearest express office, nearest telegraph office, name of railroad, area in acres of pond, character of bottom—whether sandy, rocky, boggy or gravelly, kinds of fish the pond already contains.

The Fish Commissioner states that it is of no use to introduce carp in waters already occupied with such fish as bass, sunfish, perch, trout, or any other desirable minnows whatever; even chub and minnows are objectionable. Although the fish supplied might not be liable to injury, their eggs and young would certainly be devoured, and no result would come from the experiment.

It is, therefore, recommended to persons interested in the subject who are not sure that their present ponds are free from fish, to begin by preparing a pond of say fifty feet square for the reception of the carp. After they have attained the age of from three to six months, they may be transferred to other suitable waters.

Fish culturists desirous of stocking a pond with this excellent fish should take advantage of the present opportunity, as it will not be afforded again for at least another year. Dr. Crookwell takes a great interest in fish culture and has twenty-five blanks to fill up for applicants.

BY TELEGRAPH.

FOR WASHINGTON, THURSDAY, DEC. 17.

LATEST BY LIGHTNING.
A Crooked Distiller.
CHICAGO, 18.—Peculiar special: The *Frederick* newspaper says a rumor is afloat that the whole distilling industry of the United States is being discovered that one of the members had been using crooked barrels of whiskey, which hold two gallons making a net gain for the crooked distiller of \$100 a day. The matter has been brought to the attention of the collector of internal revenue,

and back money for the crooked contained in the barrels used is demanded or a criminal prosecution will follow.

MINNEAPOLIS, 18.—There was a fire at Barton Block this morning. The total loss is about \$90,000; insurance \$70,000. Several firms were concerned.

SOUTHERN INTERESTS.

WASHINGTON, 18.—A committee appointed in behalf of the commercial organizations of New Orleans has prepared an address in behalf of the commercial interests of that city to present to the special committee appointed to investigate the improvement of the Mississippi River and to Congress. In this address the southwestern members are urged to vote in favor of some bill to open transit across the Isthmus between the Atlantic and Pacific.

The address says: Independent of making the Mississippi river the last supply for freighting lumber, work animals, labor and manufactures, it is also necessary to aid the construction of inter-oceanic transit. The workers of Peru will make a more extended market for the product of her hundred millions of people. The hour must come when a transfer of labor from Europe to America will enable us to produce any article in the United States which we now import, when and even before this stagnation of demand shall occur, where will the United States find a market for her surplus food and manufactures? The various similar causes, being compelled to seek reciprocal markets in tropical Asia, Africa and America. England has her India, which she must traverse great distances and encounter great obstacles to reach. You have an India at your door. England has recently shown that she will permit no cabinet of international interests to stand between her and her distant possessions. It will become the duty of the United States to see that no political or physical obstacle shall interrupt her coast-wise trade with her Pacific possessions, or with her foreign markets. We need a continental policy and it should be a permanent and determined one.

Stalwart and Half-Breed Check by Jew.

"My son can be re-elected senator if he desires," said old Simon Cameron here last week. This and other remarks make the groundwork for reports of a reconciliation in Pennsylvania between the stalwarts and half-breeds. Last week in the Senate the chamberlain of the senator, Don and Simon Cameron and Senator Mitchell. This argues harm only not heretofore heard of.

FITCHING INTO PAGE.

NEW YORK, 18.—The *Times* editorial on the resolutions offered by Page asking the Secretary of War whether any of the river and harbor appropriations have been withheld, says: "It was most appropriate that the one member of the House who has been repudiated by his constituents should have the first opportunity to make this appeal. Page represents a constituency which is or should be impregnablely republican. His democratic fellow citizens apparently do not comprehend the depth of disgust with which Page's course in the House has inspired his former supporters. The indignation through the form of nominating young stripping, whose candidacy was at first looked upon as a joke, nevertheless several thousand republicans in his district refused to vote, and the amazed young colleague, whom the democrats had plied against him, found himself humiliated and stung as his Page returns to the House and declares with Robeson that he is just what he always was, and that the popular verdict of rejection of his popular opinion cannot change him or induce him to change his course."

MAIL MATTER.

Representative Anderson, in a speech on fast mails, after showing that New England only mailed 127,000,000 letters during 1890, while Pennsylvania, Ohio, Indiana and Illinois mailed 291,000,000, said he should provide facilities for people using them, but take the States of the West, and in fact many of the Territories, running far out into the mountain ranges and out along the star route into very sparse settlements; running from the western line of the Pacific Ocean and the number of letters mailed during the year in those States and Territories two hundred and ninety millions, while in New England only 127,000,000. He submitted a table showing there were mailed in California 25,263,293, Colorado 1,074,924, Dakota 4,038,708, Nebraska 2,011,203, Nevada 1,933,834, Oregon 2,333,688, Utah 2,793,000, Wyoming 880,938, Alaska 6,512, Arizona 1,278,420, Idaho 825,612, Montana 1,576,324. He drew from these figures the deduction that the Western States and Territories deserve the utmost consideration as their averages and aggregate office patronage is large.

FOREIGN.

LONDON, 18.—Obstacles have been raised to Lord Derby's appointment to the Indian office by reason of views expressed in a speech at Manchester relative to Egypt.

Paris, 18.—An attack by the mountaineers upon the Chinese troops marching against the French is connected with a general rising in Yunnan.

A Glasgow vessel was wrecked on Kinardine coast and the crew lost.

MIXED SPICE.

A Boston editor bounced the cook, called two children into his office, and made a tea time for the office, and wrote: "If you want to make the world brighter and better, begin by being kind and loving to those in the small circle of your own family, and from that as a centre work out as you are permitted to go."

"Is it a fact," asked one Austin young lady, that "you have consented to marry young Spooner, and are going to be married right off?" "Yes, we are," answered "Why, he has not got any money, he is ugly, and he is dying with consumption." "He won't live two months." "That's the very reason I marry him. Black is to become a widow years and years ago."—Texas *Siftings*.

A minister was traveling along a country road in Scotland one day in winter, riding with a long, lean horse, and he himself dressed in rather an odd looking cap and large camel cloak, when a gentleman came along riding a fine horse, which seemed to be the preacher and his horse. "Well, sir," said the gentleman, "you would save the day, sir." "That's my business, sir," said the preacher.—*Rockester Post-Express*.

"So you can't decide not to marry my daughter?" said one gentleman to another.

"Yes, sir."

"Why?"

"Because it has been proved that

your daughter is the divorced wife of a bank cashier."

A medical man in New Orleans, who is fond of his little joke, called on his colored minister and began to catechize him. "Why is it, sir, that he that you are not able to do the minister that the Apostles did? They were protected against all persons and all kinds of perils. How is it you are not protected now in the same way?" The colored preacher responded promptly: "Don't know about that, Doctor. I 'spects I 've taken a mighty sight of strong medicine from you, Doctor, and I 'spects I 've got more questions to ask."—*N. O. Picayune*.

James W. Eardley informs his friends and the public generally that he has purchased the business formerly carried on by C. E. Angell on the State Road and is prepared to furnish all kinds of building material at the lowest possible rates. Promptly delivered.

A CARD.

The undersigned adopts this method of informing the public that he has resumed the practice of his profession in Salt Lake City; that for several years past he has been an Obstetrician and Diseases peculiar to Women, together with the resulting nervous affections, the subject of special study and investigation; that he has of common with the various means which modern science furnishes for the management of such cases; and that while continuing the general practice of medicine and surgery, he will hereafter devote special attention to Obstetrics, Gynecology and Diseases of the Nervous System. Office in London Bank Building, Residence: 1st South St., between 3rd & 4th East Sts.

Geo. C. DOUGLAS, M. D.

OVERCOATS.

For a nice Overcoat or Ulster go to L. GOLDBERG'S.

For Furniture of all kinds go to P. W. MANSON'S.

SCHOOL SUITS.

A nice line of boy's School Suits offered very cheap. L. GOLDBERG'S.

Ladies', Misses' and Children's Fine Shoes at DUNFORD'S.

If you want a good meal go to GRAYFISH'S RESTAURANT.

DIED.

RIED.—At Ten Mile, near Kelton, Box Elder County, Utah, of Diphtheria and intermittent fever, on December 12th, Angenette Ried, daughter of R. C. and S. M. Ried, born August 24th, 1872.

CHURCH.—At St. George, Utah, October 11, 1892, Sarah Ann, daughter of Haden W. and Susan F. B. Church, aged 4 years and 6 months. Whooping cough was the first disease, and when that was nearly cured typhoid fever set in and took her away.

CHURCH.—At Clear Lake, Utah, at the residence of Dr. Crookwell, October 14, 1892, of cancerous growth in the throat, Clara Jane Randall, wife of Haden W. Church, aged 23 years, 7 months and 23 days. She was a kind and affectionate wife and mother, was dearly loved by all who knew her and her loss was keenly felt. We deeply sympathize with the bereaved.—*St. George Tribune*.

FOAN.—At the residence of his brother, at Kanab, Kane County, December 8th, 1892, of pneumonia, Alfred Foan, aged 40 years and 2 months. He leaves a large family to mourn his loss.
