THE BISHOP'S BLUNDER.

An English bishop was one day wait. ing at a station for a train, and, being in good time, was indulging in a ing in good time, was indulging in a walk up and down the platform. While thus engaged he met a young officer whose face seemed familiar to him.

As the two met a second time the bishop said: "Good morning." At the third encounter he stopped and asked: "How is your father"

The gallant soldier replied: "He has been dead many years." The hishop tried again with the

query. "How is your mother?"

"Well," said the officer, smiling, "I think she must be all right, for you would certainly have heard if she had

The bishop walked away, but his cur-losity was thoroughly aroused. Seeing the station master, he went toward him and asked whether he could enlightened him as to who the young officer was with whom he had just been speaking. "Why, your locaship," replied the station master, that is the Duke of

THE END OF THE SIVOUTCH.

A dispatch from San Francisco says: Battling Nelson and his manager. Teddy Murphy, got in from Chicago Traursiay night. They will not start anything in the training line until Britt and Gans have settled their controversy next Monday night. Then they will train for his fight.

Young Corbett had an interview with Murphy last night in regard to the split-ting of the purse, Corbett stood for a 75 and 25 division, while Murphy held out for a larger loser's end, wanting 60 and 30. "The reason I want 75 and 25." said Corbett, "Is because f am very sure that I will beat your man. Noison."

"Well we are just as confident that we will put it on you," returned Murphy.

"If you feel like that you ought to stand for 75 and 25," said torbett. "What's the matter with taking a chappe, so wheever wins will win something."

Murphy did not appear to relish the proposition, but eventually consented to low the money to be split as the ex-

Crystalized Poison.

You know that hard water leaves a de-est of lime in the bottom of the tea-ettle in which it boils, and soft water these not. That is bells, and soft water is filtered and contains no line, while hard water is not filtered and is full of it. You can imagine that if that deposit were to settle in the joint of your knee it would be extremely painful. And if the deposit grew you could finally no longer endure the torture of walking. Yet that is the very way that Rheuma-tim hogins and ends. Except that the deposit which forms is not lime, but crys-taized poison.

als. But sometimes the kidneys fall. And semetime, from some other cause the blood gets so full of polson that they can-net absorb it all. This is the start of Rheumatism. The polson accumulates and and crystallizes. The blood carries the crystals and they increase in size. Then, when it can carry them no longer, it de-posits them in a joint-on a bone-any-where.

where, The twinge in your leg-the dull ache in rour arm on a rainy day-these are the cutward signs of the unseen crystals. And the twisted limbs and unspeakable an-symptoms to go unheeded and unattended for years-these are the evidences of what Rheumalism, neglected, can do. Rheumalism includes lumbago, sciati-reanistic, goot-for all these are the realist of rheumatic poison in the blood. Plainly, the first thing to do is to re-

Plainly, the first thing to do is to re-move the poison. But this is not enough. The FORMATION of the poison must be stopped, so that nature may have a take which have and eliminate the crys-tals which have already formed. Unless this is done there can be no cure—no per-manent relief.

I searched the whole earth for a specific for Rheumatism-something that I or any byweian could feel safe in prescribing-semething that we could count on not my occasionally, but ALWAYS. For the ravages of Rheumatism are everywhere and genuine relief is rure. Miter twenty years of search and exper-pley. And I knew then that my search and my efforts were well rewarded. A Certain Cure

You risk nothing—you deposit nething

I spent twenty years in experimenting before I felt satisfied that I had a certain remedy for this dread disease—a remedy which would not only clean out the pols-on, but one which would stop its forma-tion.

The secret hay in a wonderful chemical I found in Germany. When I found this chemical, I knew that I could make a Rheumatic cure that would be practically certain. But even then, before I made an announcement-hefere I was willing to put my name on it-f made more than 2.-600 tests. And my failures were but 2 per cent.

Earsed poison. For your blood is always full of poison whe poison you cat and drink and breathe into your system. It is the pur-pose of the bloed to absorb and carry off this very poison. And the kidneys, which are the blood filters, are expected to cleanse the blood and send it back through the system clean to gather more poison which they, in turn, will climi-net. This German chemical is not the only ingredient I use in Dr. Shoop's Rheumatic Cure-but if made the remedy possible-made possible an achievement which, 1 doubt not could have been made in no other way.

This chemical was very expensive. The duty, too, was high. In all it cost me \$1.50 per pound. But what is \$1.30 per pound for a REAL remedy for the world's most painful disease?-for a REAL relief from the greatest torture human beings know?
